EXECUTIVE SUMMARY

Subject to the qualifications and limitations stated in Section 1 of this report, TRC Engineers, Inc. (TRC) was retained by CSX Transportation (CSX) (also known as “Client” or “User”) to perform a Phase I Environmental Site Assessment (ESA) of the University Heights Yard facility located Exterior Street in the Bronx, NY (herein referred to as the “Site”). TRC’s assessment was conducted in connection with the Client’s planned sale of the Site. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the ASTM International (ASTM) Practice E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13). Limiting conditions and/or deviations from the ASTM E 1527-13 standard are described in Section 1.3 of this report.

The approximately 11-acre Site is located on Exterior Street in the Bronx, New York in an urban mixed commercial/industrial/residential area. Approximately 10 acres of the northern portion of the Site, which comprises the University Heights Yard, is bordered to the west by the Harlem River; to the north and east by Metro North Railroad tracks; and, to the south by Fordham Road Concrete (aka Titan) cement plant. In the southwestern area of the University Heights Yard portion of the Site, there is an approximately 6,000 square-foot area that has an elevation approximately 10 feet higher than ground level. . The southern portion of the Site consists of an access road, Exterior Street, which is approximately 1,350 long, sandwiched between Metro North Railroad tracks and the Fordham Road Concrete (aka Titan) facility, and provides access to the Site and the industrial and commercial buildings located south of the University Heights Yard.

According to information obtained from the New York City Department of Finance (NYCDOF) tax map, the legal designation for the Site is Block 3244, Lot 1 and Block 3245, Lot 3. The New York City Department of City Planning (NYCDCP) Zoning Map 3c indicates that the northern part of the Site is zoned M1-1 and the southern part is zoned M3-1 and M-2-1, each designating manufacturing uses. The current owner of the Site is New York Central LLC/CSX Transportation, Inc. A Site location map is included as **Figure 1**.

The topography of the Site slopes downward toward the west. Based on proximity of the Site to the Harlem River and local topography, shallow groundwater likely flows west towards the Harlem River. According to the United States Geological Survey (USGS) topographic map, Central Park and Yonkers, NY quadrangles dated 2013 (**Figure 1**) and information contained in the regulatory agency database report, the elevation of the Site property is approximately 6 feet above mean sea level (amsl).

As a result of the Phase I ESA, including but not limited to our visual observation of the Site; review of historical information, environmental databases, and information provided by the User; interviews with current Site representative(s); and TRC’s professional judgment, this assessment has revealed no evidence of RECs (including CRECs) in connection with the Site, except for the following:

On-Site RECs:

- Review of historical documentation indicates that the Site was partially submerged by the Harlem River and subsequently filled. Additionally, up to 18 inches of crushed concrete were placed on the Site by the neighboring concrete plant facility. Fill material of unknown origin is present at the Site and is a REC.
- Uncontrolled concrete washout associated with the neighboring concrete plant facility operations is present on the Site.
- An area of the Site was previously utilized by the neighboring concrete plant facility for concrete truck repair. The ground surface was recently paved and, therefore, unable to be inspected.

Off-Site RECs:

- Review of Sanborn Maps indicates a single-story structure with a basement was constructed in close proximity to and up-gradient of the Site in 1907 and utilized as a N.Y. Central and Hudson R. R. transformer house with a battery room.
- Adjacent and nearby facilities are listed in the following regulatory agency databases: Environmental (E) Designation, New York (NY) Manifest, Resource Conservation and Recovery Act (RCRA) Large Quantity Generator (LQG), NY Aboveground Storage Tanks (AST), NY Spills, Environmental Data Resources (EDR) US Historic Cleaners, EDR Historic Auto, NY Underground Storage Tanks (UST), NY Leaking Storage Tank Incident Reports (LTANKS), RCRA Non-Generator (Non-Gen), Integrated Compliance Information System (ICIS), US AIRS, Facility Index System (FINDS), and Enforcement and Compliance History Online (ECHO).
- Review of historic documentation and the regulatory agency database report revealed the presence of a manufactured gas plant located in close proximity to and up-/cross-gradient of the Site.

The following environmental concern was identified:

- A cement mixer cylinder, railway car, and derelict vehicles (four trucks and one car) were observed along the access road and may require disposal. No evidence of a release was identified in connection with these vehicles.

This Executive Summary is part of this complete report; any findings, opinions or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for all supporting information related to findings, opinions and conclusions.

Legal Notice

This document was prepared by TRC solely for the benefit of the User and its affiliates and lenders. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates and subsidiaries, from any liability for direct, indirect, economic, incidental, consequential or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

1.0 INTRODUCTION

TRC Engineers, Inc. (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for CSX Transportation, Inc. (CSX) (hereinafter “Client” or “User”).

This report was prepared for and may be relied upon by the Client and its affiliates and lenders for the purposes set forth herein; it may not be relied on by any party other than the Client and reliance may not be assigned without the express approval of TRC.

1.1 Purpose and Scope of Services

The following Phase I ESA was performed for the University Heights Yard property located at Exterior Street, Bronx, New York (hereinafter the “Site”). A Site location map is included as **Figure 1**. This Phase I ESA has been prepared by TRC in accordance with ASTM International (ASTM) E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13) and is intended for the sole use of the client (as per the letter proposal dated May 18, 2017).

The purpose of this assessment is to identify *Recognized Environmental Conditions* (RECs) at the Site, as defined by the ASTM E 1527-13 standard. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting *all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice* as defined by 42 U.S.C. §9601(35)(B) of CERCLA.

TRC understands that this assessment is not funded with a federal grant awarded under the United States Environmental Protection Agency (USEPA) Brownfields Assessment and Characterization program.

The Scope of Services for this Phase I ESA included the following tasks:

- Site and vicinity reconnaissance;
- Site and vicinity description and physical setting;
- Historical source review and description of historical Site conditions;
- Interviews with owners, operators, and/or occupants of the Site, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User; and
- Preparation of a report summarizing findings, opinions and conclusions.

1.2 Additional Services

Items outside the scope of the ASTM E 1527-13 standard include, but are not limited to, the following:

- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to *releases of hazardous substances or petroleum products* into the environment
- Biological agents
- Mold

No additional services were performed outside the scope of the ASTM E 1527-13 standard.

1.3 Deviations to ASTM E 1527-13 Standard

No deviations or deletions to the ASTM standard were made during this Phase I ESA except the following:

1. TRC was unable to inspect the northern-most area of the northern part of the Site due to dense vegetative cover that made this area inaccessible. This limiting condition is not expected to impact the results of this Phase I ESA.
2. The User Questionnaire was not completed as of the date of this report. Based on the information received and reviewed to date, it is unlikely that the absence of the information that would be contained in the User Questionnaire will affect the ability of TRC's environmental professional to identify RECs at the Site.
3. TRC was unable to interview Fordham Road Concrete representatives regarding the apparent concrete washout liquid located in the southwest corner of the site because contact information was not readily available. This limiting condition is not expected to impact the results of this Phase I ESA.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The approximately 11-acre Site is located on Exterior Street in the Bronx, New York in an urban mixed commercial/industrial/residential area. Approximately 10 acres of the northern portion of the Site, which comprises the University Heights Yard, is bordered to the west by the Harlem River; to the north and east by Metro North Railroad tracks; and, to the south by Fordham Road Concrete (aka Titan) cement plant. In the southwestern area of the University Heights Yard portion of the Site, there is an approximately 6,000 square-foot area that has an elevation approximately 10 feet higher than ground level. The southern portion of the Site consists of an access road, Exterior Street, which is approximately 1,350 long, sandwiched between Metro North Railroad tracks and the Fordham Road Concrete (aka Titan) facility, and provides access to the Site and the industrial and commercial buildings located south of the University Heights Yard.

According to information obtained from the New York City Department of Finance (NYCDOF) tax map, the legal designation for the Site is Block 3244, Lot 1 and Block 3245, Lot 3. The New York City Department of City Planning (NYCDCP) Zoning Map 3c indicates that the northern part of the Site is zoned M1-1 and the southern part is zoned M3-1 and M-2-1, which designates manufacturing. The current owner of the Site is CSX Transportation. A Site location map is included as **Figure 1**.

2.2 Site Improvements

Current on-Site improvements are listed in the following table. A Site layout plan is included as **Figure 2**.

Table 2.1 - Site Improvements

Site Feature	Description
Buildings (stories)	No buildings
Construction date(s)	N/A
Exterior areas	The Access Road is asphalt-paved. The University Heights Yard area is covered with crushed concrete surrounded by patches of vegetative cover. The northernmost area of the University Heights Yard is covered in dense vegetation.
On-Site roads/rail lines	Based on review of publically available information, the Access Road, Exterior Street, runs north/south through the site and ends at the dense vegetative cover at the northern part of University Heights Yard. The exact limits of Exterior Street are unknown.
Other large equipment	None
Potable water supply	N/A
Sewage disposal system(s)	N/A
Heating/Cooling system fuel source(s)	N/A

Table 2.1 - Site Improvements

Site Feature	Description
Back-up fuel source(s)	N/A
Electricity supplier(s)	N/A
Storm water system	N/A

N/A = Not Applicable.

2.3 Current and Historical Site Use

2.3.1 Current Site Use(s)

The approximately 11-acre Site is currently owned by New York Central LLC/CSX Transportation, Inc. and is vacant land.

2.3.2 Previous Owner and Operator Information

Based on information provided by the User (Section 3), the historical record review (Section 4), and/or interviews conducted during this Phase I (Section 6), historical Site ownership and operator information is provided in the tables below.

**Table 2.2 - Previous Owner and Operator Information
 For Block 3244, Lot 1**

Site Owner	From	To
Unknown	Unknown	1966
Manufacturers Hanover Trust Company/New York Central Railroad Company	1978	1984
Commissioner of Finance, City of New York	1966	1978
Penn Central Transportation Company/Consolidated Rail Corporation	1978	1984
Commissioner of Finance, City of New York	1984	2000
New York Central LLC/CSX Transportation, Inc.	2004	Present

For Block 3245, Lot 3

Site Owner	From	To
Unknown	Unknown	1978
Penn Central Transportation Company/Consolidated Rail Corporation	1978	1984
Commissioner of Finance, City of New York	1984	2000
Consolidated Rail Corporation/New York Central Lines LLC	2000	2007
New York Central LLC/CSX Transportation, Inc.	2007	Present

2.4 Physical Setting

According to the United States Geological Survey (USGS) topographic map, Central Park and Yonkers, NY quadrangles dated 2013 (**Figure 1**), the northern part of the Site is bordered to the

west by Harlem River. The Site topographic elevation is approximately six (6) feet above mean sea level (amsl), and local topography slopes downward toward the west. The topographic downward slope observed at the Site during the Site reconnaissance is generally towards the west. Based on local topography, the assumed direction of shallow ground water flow is to the west, towards the Harlem River. However, a subsurface investigation would be required to determine actual ground water flow direction.

The database radius report supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was reviewed to obtain information regarding the dominant soil composition in the Site vicinity. This information is summarized below:

Hydric Status:	Soil does not meet the requirements for a hydric soil
Soil Surface Texture:	Variable: silt loam, loamy sand, sandy loam, fine sandy loam
Soil Component Name:	Urban Land
Deeper Soil Types:	Unweathered bedrock, very gravelly - loamy sand, stratified, sandy loam

Please refer to the Geotcheck Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the Site vicinity.

The Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for the Site area (Community Panel Number 3604900814F) was reviewed to assess whether the Site is located within a designated flood plain or flood zone. A copy of the FEMA map is included in **Appendix D**. The Site is located in the 100-year flood zone, which is considered a business environmental risk.

3.0 USER PROVIDED INFORMATION

According to the ASTM E 1527-13 standard, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User. These tasks include: providing, or authorizing the *environmental professional* to obtain, recorded land title records for environmental liens or activity and land use limitations (AULs); providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the *property* that is material to RECs in connection with the *property*; and informing the *environmental professional* if, as believed by the User, the purchase price of the *property* is lower than the fair market value due to contamination. A list of requested information was included in TRC's signed proposal dated May 18, 2017 (see Section 1.1). The User did not provide any additional helpful documents as defined in the ASTM E 1527-13 standard. A User Questionnaire was not provided at the time of the report submission.

3.1 Title & Judicial Records for Environmental Liens or Activity and Use Limitations

In addition to reviewing the EDR report (discussed in Section 4.2), local municipal records (Section 4.4), and the New York Land Records on-line database (Section 4.4), TRC obtained supplemental information regarding AUL-listed properties within the Bronx from EDR. No Environment Liens or AULs associated with the Site were identified.

3.2 Specialized Knowledge

The User was not aware of specialized knowledge related to RECs at the Site.

3.3 Property Value Reduction Issues

The User was not aware of property valuation reduction issues regarding the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information was provided to TRC by the User.

3.5 Reason for Conducting Phase I

It is TRC's understanding that the User requires a Phase I for potential leasing of the property.

4.0 RECORDS REVIEW

4.1 Historical Use Information

Information regarding Site and vicinity historical uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs (scale: 1" = 500') dated 1951, 1954, 1961, 1966, 1974, 1976, 1984, 1989, 1991, 1995, 2006, 2009, and 2011;
- Sanborn fire insurance maps dated 1896, 1900, 1914, 1922, 1928, 1945, 1950, 1977, 1978, 1979, 1980, 1981, 1984, 1986, 1989, 1991, 1992, 1993, 1995, 1996, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007;
- Topographic maps dated 1897, 1898, 1900, 1947, 1956, 1966, 1979, 1997/1998, and 2013;
- City directories dated 1927, 1931, 1940, 1949, 1956, 1961, 1965, 1971, 1976, 1983, 1993, 2000, 2005, 2010, 2014;
- Local municipal records;
- An environmental database report; and
- Interview with Site representative(s).

Historical research documentation is included in **Appendix B**.

4.1.1 Site History

Operational History

Table 4.1 - Site History

Year	Site History
1896 - 1914	<p>The southwestern portion of the University Heights Yard portion of the Site was submerged by Harlem River. The elevation of the remainder of the Site ranged from 0 to 5 feet amsl.</p> <p>The Sanborn maps show several streets on the Site: E. 192nd St. and E. 191st St. traverse the Site in an east/west direction; Exterior Street connects E. 191st and 190th in a north/south direction.</p> <p>There is a line with a label "Proposed Bulkhead Line" along the coast of the Harlem River. By 1900, the label has changed to "Pier and Bulkhead Line."</p>
1914 - 1956	<p>By 1914, Exterior Street has been expanded in a north/south direction, running parallel along the railroad tracks east of the Site. The Site was partially filled in 1928. The 1951 aerial photograph shows evidence of land disturbance on the Site. The 1954 photograph also has evidence of land disturbance.</p>
1956 – 1991	<p>By the 1961 aerial photograph, the land appears flat. A portion of the Site was filled in 1966 and there is evidence of land disturbance on the 1966 through 1991 photographs. On the 1977 Sanborn map, north of West 192nd Street is labeled "Boat Yard."</p>

Table 4.1 - Site History

Year	Site History
1991 – 1995	In 1991, approximately 30 concrete trucks are present on the southwestern portion of the Site.
1995 - 2009	The concrete trucks are no longer present. There is evidence of land disturbance and heavy equipment usage throughout the Site
2009 – 2013	The Site appears asphalt-paved in the aerial photograph and vegetation was present along the perimeter of the Site.

4.1.2 Adjoining Property History

Table 4.2 - Adjoining Property History

Year	Adjoining Property History
North	The Site was adjoining to the north by “Ship Canal”, a waterway that connected Harlem River and the Hudson River, from approximately 1896 to 1914 when the northern channel of the canal was filled and the east-adjoining railroad tracks were expanded to the northwest. A single-story structure with a basement was constructed northeast of the Site in 1907 and utilized as a N.Y. Central and Hudson R. R. transformer house with a battery room. Additionally, by 1914 a single story building was constructed just south of the transformer house, which was depicted as a “Signal Station”. Furthermore, by 1977 a two-story industrial building was constructed just north of the adjoining railroad tracks, which was occupied by a Furniture Warehouse on the first floor, a “Factory” on the second floor, and other “various occupancies” from at least 1977 to approximately 2003. Prior to 2004, the southern portion of the two-story industrial building was modified/redeveloped. Apparent features associated with this industrial building include rooftop parking and loading bays.
East	The Site has been adjoined to the east by railroad tracks, “N.Y. Central and Hudson River Railroad (Putnam Division)”, later “Penn Central and Hudson River Railroad (Putnam Division)” (1995 to present). The tracks have been adjoined to the east by the Major William F. Deegan Expressway/I-87 since approximately 1954.
South	<i>Note that properties located south of the University Heights Yard portion of the Site, west adjacent to the Exterior Street access road, are discussed in the “West” section.</i> To the south of the Site is the railroad that is in existence since at least 1897. In 1954, the adjoining property located south and west of the Site, consisted of paved areas, and a dock, which was removed by 1961. By 1966, this property was improved with a building, which was razed by 1977, and the property was then utilized as a playground until approximately 1989, and has since been utilized as a sand bed.

Table 4.2 - Adjoining Property History

Year	Adjoining Property History
West	The University Heights Yard portion of the Site has been adjoined to the west by Harlem River since the earliest available records (1896). The access road-portion of the Site, Exterior Street, has been adjoined to the west since by various industrial and commercial occupants since the land, previously submerged by Harlem River, was filled between approximately 1928 and 1978. NY Edison Co “Cable Ho”, a single-story building depicted as offices and lockers, and a tennis court were present west of the Site from at least 1945 to approximately 1977 when the building depicted for office/locker room use was no longer utilized for locker rooms and the tennis courts were replaced by “Butler Lumber Co. Inc.” lumber yard operations and a warehouse building utilized for lumber storage. An automobile junk yard has been located west of the Site since approximately 1977 and “Redi-Mix Batch Plant”, a single-story cement plant and the associated single-story truck repair shop has been located on the west-adjacent property since approximately 1984.

4.1.3 Surrounding Property History

Table 4.3 - Surrounding Property History

Year	Surrounding Property History
North	An island surrounded by a “Ship Canal” was present north of the Site until approximately 1914 when the northern canalway was filled and the area was developed with low- to high-rise buildings. Jerome Park reservoir has been located northeast of the Site since at least 1897.
East	The surrounding area east of the Site was intermittently developed since 1897 (earliest records) and the neighborhood was identified as Fordham. A “Gas Co.” / “Consolidated Edison Co.” facility was located on the property directly east of the railroad tracks from at least 1914 to 1950; a large aboveground storage tank associated with Manufacture Gas Plant (MGP) activities is depicted on the 1947 topographic map and the 1951 aerial photograph. The “U.S. Veterans Hosp” has been present east of the Site since approximately 1947. The area beyond the veteran’s hospital consists of residential, commercial, and institutional (church, school, post office, library, etc.) facilities.
West	The Manhattan neighborhood, Inwood, is located west of the Harlem River. Inwood was sparsely developed since at least 1897 and more densely developed since approximately 1947. A rail yard, “NYC Rapid Transit Yard” / “PC Rapid Transit Yard”, has been located in Inwood along the Harlem River since approximately 1947.
South	With the exception of the railroad tracks that follow the Harlem River, from at least 1897 to approximately 1947, the surrounding area south of the Site was undeveloped and identified as Fordham Heights. By 1947, “University Heights Br” was constructed over the Harlem River. Additionally, the surrounding area to the south of the Site was densely developed by 1947, including University Park and N.Y. University development.

4.2 Database Report & Environmental Record Review

A database search report that identifies properties listed on state and federal databases within the ASTM-required radii of the Site was obtained from EDR and is included in **Appendix A**.

The environmental database report identified 494 properties/listings that did not include the Site. These properties included those that could be mapped and those that could not (i.e., orphan properties).

No environmental liens or activity and use limitations (AULs) associated with the Site were identified based on the review of the EDR report, local municipal records, and New York State Land Records.

4.2.1 Adjoining & Surrounding Property Record Review

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

- (1) Whether the property is up-gradient or down-gradient of the Site vis-à-vis **ground water migration** based on the local topography, and the assumed ground water depth and easterly shallow ground water flow direction;
- (2) Whether the property is up-gradient or down-gradient of the Site vis-à-vis **vapor migration** based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);
- (3) Property case status (i.e., whether the New York State Department of Environmental Conservation or applicable regulatory authority has issued a No Further Action letter or other similar closure document);
- (4) Type of database and whether the presence of contamination is known; and
- (5) The distance between the listed property and the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below, since the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low.

4.2.1.1 Adjoining Properties

Adjoining property information included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Address(es)	Lot 60, Taxblock 3245 300 West Kingsbridge Road Bronx, NY
-------------------------------------	---

Approximate Location Relative to Site	0.075
EDR Map No(s).	27
Database(s)	E DESIGNATION
Description/ID No(s).	E-303
Presumed Hydrogeologic Setting	Up-gradient
Database Review Summary	The effective date of the listing of E DESIGNATION is 9/12/2013 for Hazardous Materials Phase I and Phase II Testing Protocol. The last remediation date is not reported.

Facility Name(s) and/or Address(es)	Target Store 1798 Former Presbyterian Hosp Serv Ctr 40 W 225 th St 50
Approximate Location Relative to Site	0.080-0.087 miles
EDR Map No(s).	H37, H43, H44, H45
Database(s)	MANIFEST, RCRA-LQG, AST
Description/ID No(s).	Various, NYR0000134122, 2-111112
Presumed Hydrogeologic Setting	Up-gradient
Database Review Summary	<p>In August 2011, the Target Store 1798 shipped one (1) pound each of various P-, D-, and U-class wastes.</p> <p>In February 2015, the Target Store 1798 shipped small amounts of D002, D035, and P001 wastes.</p> <p>Target Store 1798 is listed as a RCRA-LQG since 7/21/2004. The facility received a violation on 11/30/2009 that was “written informal” and the action was satisfied.</p> <p>The Former Presbyterian Hosp Serv Ctr is listed in the AST database for one (1) 20,000-gallon tank containing No. 2 Fuel Oil (on-Site Consumption) installed on 6/1/1954; the status is temporarily Out of Service.</p>

Facility Name(s) and/or Address(es)	Marble Hill Pump Station West 225 th Street
Approximate Location Relative to Site	0.1 mile
EDR Map No(s).	H78, H79

Database(s)	NYSPIILLS
Description/ID No(s).	8704431, 8708755
Presumed Hydrogeologic Setting	Up-gradient
Database Review Summary	On 8/28/1987, less than one (1) gallon of raw sewage was released due to a power outage. The spill was closed the same day. On 1/14/1988, less than one (1) gallon was of raw sewage was released due to a power outage. The spill was closed the same day

4.2.1.2 Surrounding Properties

Surrounding property information included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Address(es)	CW Cleaning Svce Inc 2455 Sedgwick Ave
Approximate Location Relative to Site	0.064 miles
EDR Map No(s).	D6
Database(s)	EDR HIST CLEANERS
Description/ID No(s).	N/A
Presumed Hydrogeologic Setting	Up-gradient
Database Review Summary	The facility was listed on the EDR HIST CLEANERS from 1993 to 1995.

Facility Name(s) and/or Address(es)	Zegan Service Center, Inc. Global Montello Group Corp. #54132590 2590 Bailey Ave/BX/GETTY0 Getty Petroleum Corp 2590 Bailey Avenue
Approximate Location Relative to Site	0.064/0.069 miles
EDR Map No(s).	A7/A17-A21
Database(s)	EDR HIST AUTO/NY UST/NY AST, NY LTANKS, RCRA NONGEN/NLR, ICIS, US AIRS, FINDS, ECHO, NY MANIFEST
Description/ID No(s).	PBS Facility ID No. 2-153001
Presumed Hydrogeologic Setting	Up-gradient

Database Review Summary	<p>Listed in the EDR HIST AUTO from 1969 to 2014 as a Gasoline Service Station , General Automotive Repair Shop, and Used Car Dealers, under the names “ZEGAN SERVICE CENTER, INC.,” “MONLEY MIKE AUTO REPAIR INC.,” “LAS BRISAS SERVICE STATION,” RIVERSIDE SERVICE STATION,” “RIVERSIDE GASOLINE SVC STN INC,” and “ZAM ZAM.”</p> <p>Global Montello Group Corp. #5413 is listed on the underground storage tank (NY UST) and aboveground storage tank (AST) databases. Three (3) 4,000-gallon USTs containing gasoline are in service; and 15 UST of various sizes that contained petroleum product have been closed and removed. One (1) 240-gallon AST that contained #2 Fuel Oil has been closed and removed and one (1) 240-gallon AST is in service and contains waste oil/used oil.</p> <p>2590 Bailey Ave/BX/GETTY0 is listed on the NY LTANKs database.</p> <p>Getty Petroleum Corp is listed on RCRA NONGEN/NLR, ICIS, US AIRS, FINDS, ECHO, and NY MANIFEST databases. The facility does not currently generate hazardous waste. The facility received a violation (administrative – informal) for AIR. There are two (2) reported manifests, one from 1997 for 145 pounds of D018 waste and one from 1993 for 60 pounds of D008 waste.</p> <p>Getty#264 is on the NY SPILLS database due to minor historic gasoline and petroleum spills.</p>

Facility Name(s) and/or Address(es)	Fordham Speed Zone Inc, 248 Fordham Rd
Approximate Location Relative to Site	0.121 miles
EDR Map No(s).	M142
Database(s)	EDR HIST AUTO
Description/ID No(s).	N/A
Presumed Hydrogeologic Setting	Up-gradient
Database Review Summary	Listed from 2003 to 2008 as "General Automotive Repair Shops."

4.3 Previous Reports

The following environmental report regarding the Site was prepared for the Site:

- January 22, 2016 Memorandum Subject: Encroachment on CSX Property, Exterior Street, Bronx New York, prepared by Daniel Schmidt, P.E., Project Manager, TRC Engineers, Inc.

The memorandum summarizes the inspection conducted at the Site by TRC representatives on January 18, 2016. The purpose of the inspection was to identify environmental conditions of concern, if any, particularly related to crushed concrete placed on the CSX property by the south adjoining concrete facility (Titan Concrete, Inc. aka Fordham Road Concrete). The inspectors noted that a large part of the University Heights Yard area was covered in crushed concrete from the ground surface to approximately 18 inches below the ground surface (bgs). The inspectors noted an area being utilized for concrete truck wash-out and maintenance. This area was part of an approximately 6,000 square foot sectioned-off area that was apparently filled with crushed concrete/aggregate to approximately 10 feet above the ground elevation, which was contained by a wall of concrete blocks. In other areas of the Site, inspectors observed various steel rebar/wire visible protruding from the crushed concrete; two (2) approximately 300-gallon empty plastic totes (one partially encased in concrete); one (1) abandoned generator; pile of tires and debris; several truck batteries and debris; ten (10) unlabeled 55-gallon drums (5 plastic/5 steel) filled with unknown contents; and stained soil/aggregate.

4.4 Other Environmental Record Sources

Per the ASTM standard, local or additional state and federal records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. These additional records include NYSDEC and New York State Department of

Health (NYSDOH). Local sources that were contacted to obtain this information include: New York City Department of Health and Mental Hygiene (NYCDOHMH) and the New York City Department of Environmental Protection (NYCDEP). A Freedom of Information Law (FOIL) request was filed with each of these agencies to determine if the agency holds additional records pertaining to the Site. TRC has not yet received a response from the request. Upon receipt of this information, TRC will review the response and, if conclusions contained within this report are affected, TRC will submit an addendum to the Client.

In addition to local and state records, TRC reviewed the NYCDOF, New York City Department of City Planning (NYCDCP), the New York City Searchable Property Environmental E-Databases (SPEED) map, Property Shark report and Automated City Register Information System (ACRIS). Information from these sources is discussed in this report, as applicable, and is included in **Appendix D**.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Ms. Carla Stout, TRC Environmental Scientist, conducted a Site reconnaissance of accessible areas on and around the Site on May 31, 2017 for the purpose of identifying potential RECs, and was accompanied by Railroad Police Special Agent Patrick McGee of CSX Transportation, Inc. Photographs taken during the reconnaissance are provided in **Appendix C**. A Site layout plan is included as **Figure 2**. During the Site reconnaissance the northern area of the Site was inaccessible due to dense vegetative cover. This limiting condition is not expected to impact the results of this Phase I.

5.2 Site Description and Observations

The approximately 11-acre Site is located on Exterior Street in the Bronx, New York in an urban mixed commercial/industrial/residential area. Approximately 10-acres of the northern portion of the Site, which comprises the University Heights Yard, is bordered to the west by the Harlem River; to the north and east by Metro North Railroad tracks; and, to the south by the Fordham Road Concrete (aka Titan) facility. In the southwestern area of the University Heights Yard portion of the Site, there is an approximately 6,000 square-foot area that has an elevation approximately 10 feet higher than ground level. The southern portion of the Site consists of an access road, Exterior Street, which is approximately 1,350 long, sandwiched between Metro North Railroad tracks and the Fordham Road Concrete facility, and provides access to the Site and the industrial and commercial buildings located south of the University Heights Yard.

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Table 5.1 - Interior and Exterior Site Observations

Item	Present (Current/ Historic/ No)	Description
Hazardous material storage or handling areas	No	
Aboveground storage tanks (ASTs) and associated piping	No	
Underground storage tanks (USTs) and associated piping	No	
Drums & containers (≥5 gallons)	Current	(see Section 5.2.1)
Odors	No	

Table 5.1 - Interior and Exterior Site Observations

Item	Present (Current/Historic/No)	Description
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	Current	See below for a description.
Polychlorinated Biphenyls (PCBs) / Transformers	No	
Stains or corrosion	Current	See below for a description.
Drains & sumps	No	
Pits, ponds & lagoons	No	
Stressed vegetation	No	
Historic fill or any other fill material	Current	Crushed concrete reaching a depth of 18 inches is present through most of the University Heights Yard
Wastewater (including storm water or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site)	Current	See below for a description.
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells)	No	
Septic systems or cesspools	No	

In the southwestern area of the University Heights Yard portion of the Site, there is an approximately 6,000 square-foot area that has an elevation of approximately 10 feet higher than ground level. The elevated area is bounded by concrete blocks (measuring approximately 2 feet high by 4 feet wide by 2 feet deep) and the surface of the area consists of crushed concrete/aggregate. Special Agent Patrick McGee (see Section 6.0) who accompanied TRC during Site reconnaissance, stated that the area was cleaned approximately 18 months prior, but further explained, consistent with TRC’s memorandum summarized in Section 4.3, that it was previously used for concrete truck wash-out and maintenance for a period of approximately 3 years. The area had been paved with concrete; therefore, the ground surface was not able to be inspected.

Adjacent to the southwest corner of the elevated area, a rectangular area barricaded by concrete blocks was observed containing a shallow (approximately six inches at the highest depth) pool of light blue-green liquid. Due to the color, the liquid may be concrete wash-out, which is regulated by Local Law No. 70 of the City of New York. Adjacent to the southeast corner of the platform, another rectangular area barricaded by concrete blocks was observed containing concrete objects and a pool of water that appeared to be rain water runoff accumulation. Special Agent McGee informed TRC that the Site boundary runs through the center of each of these rectangular areas.

A layer of crushed concrete that is approximately 2 feet deep is spread throughout the University Heights Yard portion of the Site. No staining or debris was identified in this area.

From the north going south, TRC identified the following additional items during the Site Reconnaissance:

- A pile of unknown debris in the northwestern area of the Site;
- Two (2) piles of concrete aggregate in the northwestern area of the Site that, according to Special Agent McGee, were deposited there approximately 20 years ago by a company that had leased the property. Special Agent McGee indicated that the lease was of short duration and did not indicate other lessees to the property.
- Along the eastern side of the access road portion of the Site, TRC observed a cement mixer cylinder, a railway car, and derelict vehicles (four trucks and one car), the interiors of which were not inspected.

5.2.1 Hazardous Substances

One apparently empty tote was observed in the northern part of the Site. .

5.2.2 Aboveground and Underground Storage Tanks

No ASTs or USTs were identified at the Site.

5.2.3 Staining

TRC observed one area of staining in the southwest corner of the elevated area of the Site, which represents a de minimis condition.

5.3 Adjoining and Surrounding Properties Reconnaissance

5.3.1 Adjoining Properties

During the Site reconnaissance, TRC viewed the adjoining properties from the Site and publicly accessible areas (e.g., public roadways, etc.).

Table 5.2 - Adjoining Properties Reconnaissance

Direction from Site	Current Land Use Description
North	The northern area of the Site could not be assessed due to dense vegetative cover.
East	Metro North Railroad is located east of the Site followed by the Major Deegan Expressway/Interstate Highway 87 (I-87)
South	Fordham Road Cement is located south of the University Heights Yard portion of the Site followed by Fordham Scrap Metal, a vacant lot, and Storage Post facility.
West	The Site is adjoined to the west by Harlem River.

5.3.2 Surrounding Properties

Surrounding properties generally include mixed commercial and residential development to the north, east, and south. To the west is the Harlem River.

6.0 INTERVIEWS

The following persons were interviewed to obtain historically and/or environmentally-pertinent information regarding RECs associated with the Site.

- Patrick McGee, Railroad Police Special Agent for CSX Transportation, 9 years – Key Site Manager (as defined by the ASTM standard and identified by the property owner/User)

The information provided by each is discussed and referenced in the text or provided below. Other references and sources of information are included in **Appendix D**.

7.0 FINDINGS, OPINIONS AND CONCLUSIONS

Potential findings can include RECs, historical RECs (HRECs), controlled RECs (CRECs) and *de minimis* conditions, pursuant to the ASTM E 1527-13 standard.

RECs are defined as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to any *release* to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.

CRECs are defined as a REC resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

HRECs are defined as a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

De minimis conditions are defined as a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13 at the property located at Exterior Street in the Bronx, New York (Site). TRC Environmental Professional Qualifications and Environmental Professional Statement are provided in **Appendices F and G**, respectively. Deviations from this standard are described in Sections 1.3 and 7.6 of this report.

7.1 RECs and CRECs

This assessment has revealed no evidence of RECs (including CRECs) in connection with the Site, except for the following:

On-Site RECs:

- Review of historical documentation indicates that the Site was partially submerged by the Harlem River and subsequently filled. Additionally, up to 18 inches of crushed concrete

were placed on the Site by the neighboring concrete plant facility. Fill material of unknown origin is present at the Site and is a REC.

- Uncontrolled concrete washout associated with the neighboring concrete plant facility operations is present on the Site.
- An area of the Site was previously utilized by the neighboring concrete plant facility for concrete truck repair. The ground surface was recently paved and, therefore, unable to be inspected.

Off-Site RECs:

- Review of Sanborn Maps indicates a single-story structure with a basement was constructed in close proximity to and up-gradient of the Site in 1907 and utilized as a N.Y. Central and Hudson R. R. transformer house with a battery room.
- Adjacent and nearby facilities are listed in the following regulatory agency databases: E-Designation, NY Manifest, RCRA LQG, NY AST, NY Spills, EDR US Historic Cleaners, EDR Historic Auto, NY UST, NY LTANKS, RCRA Non-Gen, ICIS, US AIRS, FINDS, and ECHO.
- Review of historic documentation and the regulatory agency database report revealed the presence of a manufactured gas plant located in close proximity to and up-/cross-gradient of the Site.

7.2 HRECs

This assessment has revealed no evidence of HRECs in connection with the Site.

7.3 *De Minimis* Conditions

This assessment has revealed no evidence of *de minimis* conditions in connection with the Site, except for the following:

- TRC observed one area of staining in the southwest corner of the elevated area of the Site, which represents a *de minimis* condition.

7.4 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historical ownership and use of the Site back to 1896 per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). Data gaps identified during this assessment include the following:

1. TRC was unable to inspect the northern-most area of the northern part of the Site due to dense vegetative cover that made this area inaccessible. This limiting condition is not expected to impact the results of this Phase I ESA.
2. The User Questionnaire was not completed as of the date of this report. Based on the information received and reviewed to date, it is unlikely that the absence of the information which would be contained in the User Questionnaire will affect the ability of TRC's environmental professional to identify recognized environmental conditions at the Site.
3. TRC was unable to interview Fordham Road Concrete representatives regarding the pool of unknown liquid at the southwest corner of the site because contact information was not readily available. This limiting condition is not expected to impact the results of this Phase I ESA.

7.5 Other Noteworthy Issues

There were no noteworthy issues identified during the Phase I ESA that, while not strictly a REC or *de minimis* condition, in TRC's opinion warrant further discussion.

7.6 Environmental Concerns

One environmental concern identified during the Phase I ESA that, while not strictly a REC or *de minimis* condition, in TRC's opinion warrant further discussion include the following:

- A cement mixer cylinder, railway car, and derelict vehicles (four trucks and one car) were observed along the access road and may require disposal. No evidence of a release was identified in connection with these vehicles.

7.7 Limiting Conditions and Deviations

7.7.1 Accuracy and Completeness

The ASTM E 1527-13 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.4.
- Not Exhaustive – A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property – A review of standard historical sources at intervals less than five years is not required.

The Client is advised that the Phase I ESA conducted at the Site is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the Site is free of RECs or environmental impairment; iii) that the Site is "clean"; or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the conditions implied by surface observations, and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.7.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-site location(s) (with possible impact to the Site) not published in publicly available records.

7.7.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E 1527-13 standard, for a period of 180 days from completion, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to the ASTM E 1527-13 standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

7.7.4 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

8.0 REFERENCES

Table 8.1 - References Information

Description/Title of Document(s) Received or Agency Contacted	Date Information Request Filled/Date of Agency Contact	Information Updated	Reference Source
New York State Department of Environmental Conservation	May 23, 2017	6/22/2017	The file search conducted by the NYSDEC produced no responsive records.
New York State Department of Health	May 23, 2017	6/21/2017	No records responsive to the request to the NYSDEOH were located.
New York City Department of Environmental Protection	May 23, 2017	N/A	TRC has not yet received a response from NYCDEP.
New York City Department of Health and Mental Hygiene	May 23, 2017	N/A	The record search conducted by the NYCDHMH revealed no record of an investigation.

Note that if any additional responses from the regulatory agencies are received, TRC will review the response and, if conclusions contained within this report are affected, TRC will submit an addendum.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

LANDING ROAD
BRONX, NY 10468

COORDINATES

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL..... National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY..... Federal Facility Site Information listing

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

Federal RCRA CORRACTS facilities list

CORRACTS..... Corrective Action Report

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System

Federal ERNS list

ERNS..... Emergency Response Notification System

State- and tribal - equivalent CERCLIS

NY VAPOR REOPENED..... Vapor Intrusion Legacy Site List

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF..... Facility Register

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land
NY HIST LTANKS..... Listing of Leaking Storage Tanks

State and tribal registered storage tank lists

FEMA UST..... Underground Storage Tank Listing
NY CBS UST..... Chemical Bulk Storage Database
NY MOSF UST..... Major Oil Storage Facilities Database
NY MOSF AST..... Major Oil Storage Facilities Database
INDIAN UST..... Underground Storage Tanks on Indian Land

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/05/2017 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 9

EXECUTIVE SUMMARY

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 7 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/14/2016 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/06/2017 has revealed that there are 111 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 24 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/06/2017 has revealed that there are 43 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 111 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/31/2015 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NAVY TRAINING SCHOOL		ENE 1/2 - 1 (0.760 mi.)	492	1348

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 11/25/2013 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
HUDSON RIVER PCBS	NO STREET APPLICABLE	WNW 1/2 - 1 (0.964 mi.)	0	8

CONSENT: Major Legal settlements that establish responsibility and standards for cleanup at NPL (superfund) sites. Released periodically by U.S. District Courts after settlement by parties to litigation matters.

A review of the CONSENT list, as provided by EDR, and dated 09/30/2016 has revealed that there is 1 CONSENT site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and

EXECUTIVE SUMMARY

non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated 1.1 million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million (ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when the level of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabilize the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act (CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authorize a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action at the remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for parties potentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Site Description: The Hudson River PCBs Site includes a nearly 200 river-mile stretch of the Hudson River in eastern New York State from the Village of Hudson Falls to the Battery in New York City. The Hudson River has been designated an American Heritage River because of its important role in American history and culture. This federal Superfund Record of Decision (ROD) addresses the risks to people and ecological receptors associated with polychlorinated biphenyls (PCBs) in the in-place sediments of the Upper Hudson River. The Site is divided into the Upper Hudson River which is the length of river between Hudson Falls and the Federal Dam at Troy, New York and the Lower Hudson River which is the

HUDSON RIVER PCBs (Continued)

1000384273

length of river between Federal Dam at Troy and the Battery. For purposes of this project, EPA further divided the Upper Hudson River area into three main sections known as River Section 1, River Section 2, and River Section 3. The Site also includes five Remnant Deposits, which are areas of PCB-contaminated sediment that became exposed after the river water level dropped following removal of the Fort Edward Dam in 1973. The Upper Hudson River portion of the Site extends from the Fenimore Bridge in Hudson Falls to the Federal Dam at Troy, a distance of just over 43 river miles. The Lower Hudson River extends from the Federal Dam to the southern tip of Manhattan at the Battery in New York City. The Mid-Hudson River, which is primarily a subset of the Lower Hudson River, extends from the Federal Dam at Troy to just south of Poughkeepsie. The predominant sources of PCB contamination to the Upper Hudson River were two capacitor manufacturing plants owned and operated by GE. The plants are located adjacent to or near the Hudson River in the Village of Hudson Falls and the Town of Fort Edward. Over a 30-year period, the plants discharged a substantial amount of PCBs into the river. At the GE Hudson Falls plant, leakage of non-aqueous phase PCB-bearing oils through bedrock to the river continues to be a source of PCB contamination. Regarding the former outfall to the Hudson River from the GE Fort Edward plant, New York State Department of Environmental Conservation (NYSDEC) issued a Record of Decision in January 2000 that calls for the excavation of PCB-contaminated soil and sediment in this area of the Upper Hudson River shoreline in order to eliminate this source of PCBs to the river. EPA's analysis assumes a significantly reduced PCB loading to the river from these sources once the State's plans for remediation are implemented. PCBs, the chemicals of concern addressed in this decision document, have been classified by EPA as probable human carcinogens. They are also linked to other serious non-cancer adverse health effects based on observations in animals and emerging evidence in humans. Once discharged from the GE plants, the PCBs adhered to river sediment and accumulated downstream as they settled in impounded pools and other depositional areas. Historic fish and sediment data indicated PCBs were accumulating downstream of the old Fort Edward Dam as well as accumulating behind the dam. The removal of the dam in 1973 resulted in a remobilization and downstream distribution of PCBs that had accumulated behind the dam. Historically, the highest PCB sediment concentrations have been detected in the cohesive sediments within the Upper Hudson River. River scouring/ erosion and other mechanisms have mobilized PCB-contaminated sediments from the extensive cohesive deposits, redepositing them farther downstream all the way to the Battery. The preponderance of data indicates that burial of contaminated sediment by cleaner materials is not universally or uniformly occurring. Data also indicate that contaminated sediments in River Sections 1, 2 and 3 continue to serve as the major source of PCBs to the water column and the fish within the Upper Hudson River. During an approximate 30-year period ending in 1977, PCBs were used in capacitor manufacturing operations Hudson Falls and Fort Edward, New York facilities. PCB oils were discharged both directly and indirectly from these plants into the Hudson River. This included both non-permitted and permitted discharges. Even after permits were received in 1975, permit exceedances occurred. Estimates of the total quantity of PCBs discharged directly from the two plants into the river from the 1940s to 1977 are as high as 1,330,000 pounds (about 605,000 kg). Many of the PCBs discharged to the river adhered to sediments and accumulated with the sediments as they settled in the impounded pool behind the Fort Edward Dam, as well as other depositional areas farther downstream. Because of its deteriorating condition, the Fort Edward Dam was removed in 1973. Five areas of PCB-contaminated sediments were exposed due to the lowering of the river water level when the Fort Edward Dam was removed. These five areas are known as the Remnant Deposits. During subsequent floods, PCB-contaminated sediments from the

Fort Edward Dam area were scoured and transported downstream. EPA notified the company that had the two plants of the remedy selected in the 1984 ROD and offered the company with the opportunity to implement the selected remedy with respect to the Remnant Deposits and the Waterford drinking water supply evaluation. The company declined EPA's offer. NYSDEC, with funding provided by EPA, conducted the evaluation at the Waterford Water Works. In addition, NYSDEC prepared a design for the in-place containment of the Remnant Deposits. This design was completed in 1988. In March 1989, the company offered to assume responsibility for the implementation of the in-place containment remedy for the Remnant Deposits. EPA issued a September 27, 1989 Administrative Order on Consent to the company which required the company to prepare a remedial design report for the construction of access roads to the Remnant Deposits and to submit a design for the in-place containment of the Remnant Deposits incorporating the NYSDEC-prepared design, plus any EPA-approved refinements to that design. EPA also issued a September 27, 1989 Administrative Order to the company requiring the company to construct and maintain the access roads to the Remnant Deposits. The company constructed the in-place containment of the Remnant Deposits under a 1990 Consent Decree with EPA. EPA will evaluate the need for further remedial action for the Remnant Deposits after completion of a 5-year review of the Remnant Deposit containment remedy, performed pursuant to CERCLA §121(c). The company's manufacturing plants in Hudson Falls and Fort Edward are listed under the New York State Inactive Hazardous Waste Disposal Sites Remedial program. The company currently is conducting remedial activities near the Hudson Falls and Fort Edward plants pursuant to Orders on Consent with NYSDEC. The company has thus far declined to implement the January 2000 NYSDEC Record of Decision for the Fort Edward plant Outfall 004. The NYSDEC is conducting the remedial design for that ROD. As one of America's great rivers, the Hudson has played and will continue to play a major role in the history, culture, and economy of the area. The Hudson has been designated an American Heritage River because of its important role in American history and culture. Current and reasonably-anticipated future land use and surface water use are described below. Current land use includes a variety of residential, commercial and industrial activities. Use of the river and lands surrounding the river are projected to remain the same. At this time, no changes in future land use are known, nor are any new uses expected. The Site passes through 14 different counties as the river flows to its final discharge point in New York Harbor. Four counties (Albany, Washington, Rensselaer, and Saratoga) lie adjacent to the more highly contaminated portions (areas of proposed active remediation in River Sections 1, 2 and 3) of the Upper Hudson River between Troy (Federal Dam) and Hudson Falls. Within these four counties, forests and farmlands surround urban centers and historic villages. There are apple orchards and dairy farms, parks, nature preserves and gardens. In addition to the GE Hudson Falls and Fort Edward plants, the area is home to technology companies, oil service companies and food companies. Saratoga and Washington Counties have experienced population growth between 1990 and 1999 of 10.2 percent and 1.4 percent, respectively, while Rensselaer and Albany Counties have experienced population declines of 1.9 percent and 0.3 percent, respectively. Total population of these four counties, according to July 1999 estimates by the US Department of Commerce Bureau of the Census, is just under 700,000. Warren County, in which the City of Glens Falls is located, has a population of just over 60,000 and is just to the northwest of the Hudson River PCBs Site. A Record of Decision (ROD) addressing operable unit 1 (OU 01) was completed in September 1984. A Record of Decision addressing OU 2 was completed in February 2002.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL Doing cleanup at bronx cable house. some silt and mud at base of pump cable house. one sample came back with 61 ppm pcb's took three samples other 12 & 15 ppm. don't know if it is random PCBs. spill cleanup contractor to be there tomorrow at 8:00am. spill on CON ed property, no exposure to general public. cable house is below grade. to his knowledge, no groundwater contact. cable dielectric? not sure. rep stated no visible sign of oil just silt and mud. just wanted to remove mud from base of building. came in contact with mud. on site at 10:15 hours. pete cooney - con ed electric construction division. tom willis - clean harbors. clean harbors on-site and will do cleanup at low tide, guzzling into rolloffs. will start tues or wed next week. expect 2 rolloffs of sediment. (MMM) 10/23/95: Joe Deveny, Con Ed - Are under cable house sampled at request of Env. Affairs (Mariela Gonzalez). Oil found from retired oil regulator leaking. (CAE) 10/24/95, 8:55 AM - Mariela Gonzalez (Con Ed EA). Clean Harbors assigned to clean up on site this morning. Will remove 30 - 40 yards. (CAE) 10/27/95: Mariela Gonzalez - Clean Harbors working today - expected to finish today. Remove 35 yards of oily soil - found concrete slab under soil - going to remove. (CAE) 10/30/95: site visit with Bob DePass (Con Ed EA). Requested copies of lab analytical. (CAE) 11/6/95: lab data submitted by Con Ed. Results range from non detect to 86 ppm from various locations within the cable house. 11/8/95: Wipe samples collected from below-grade concrete slab following initial clean up. 11/15/95: results forwarded to DEC - six of eight samples equal or exceed EPA clean up standard for indoor surfaces of 10 ug/100 cm2. 11/22/95: Letter from Con Ed formally transmitting wipe sample results. Will consider these surfaces cleaned. EPA requires low contact indoor surfaces to be <10 ug/100 cm2, and low contact outdoor surfaces to be <100 ug/100 cm2. As of 2/9/96, EPA considers manholes to be indoor. They are awaiting documentation from Con Ed to categorize these as outdoor. Since the highest concentration is 20 ug/100 cm2 and the area is restricted access and the structure is not a work place for anyone (people only go there every couple of years) will accept this level of clean up. (CAE) 2/9/96: spoke to Dorothy Zoledziowska of USEPA Region 2 TSCA (908) 906-6811. Asked her if cable house would be considered low contact indoor restricted area or low contact outdoor restricted area fro purpose of clean up criteria. She said that this question has been asked by Con Ed before, concerning manholes. EPA would consider classifying manholes as outdoor structures, but are awaiting written request with information from Con Ed. So presently EPA considers manholes indoor surfaces thus requiring clean up to be done to <10 ug/100 cm2. We will apply this until EPA gives further guidance. Spill of original oil contained 136 ppm PCB by analysis. If this is the case, then Con Ed is only required to do a double wash/rinse. (CAE) 4/96: Draft Scope of Work for Subsurface Environmental Investigation submitted for review. 7/10/96: Phone call to Bob DePass (EA) - Con Ed has petitioned EPA (Dan Kraft - Region 2) to relax cleanup standards in MH to 100 ug/100 cm2 in cases where they have cleaned up multiple times. Agreed w/ DePass on plan for investigation: 6 borings less than or equal to 25' from manhole offset by 30 degrees from one another. Also, one upgradient (background) boring as close to property line as possible. (CAE) 7/11/96: letter to Bob DePass confirming agreement of scope of work

for investigation. (CAE) 6/02: NYCDEP indicates their intention to purchase the property from Con Ed as part of Croton Water Treatment Plant Project. Spill transferred from Engelhardt to O'Connell. (JHO) 7/18/02: Unable to find file on spill, I contacted Joe Coletta, Con Ed. He said he recalls that spill was to soil inside the cable crossing house (similar to a tunnel head house). He says Engelhardt responded, and All State was used to vac out soil. He will try to find out more info and get back to me. (JHO) 2/7/03: Attempted to track down Joe Coletta - he retired from Con Ed in December. Joe Susco (SSO) indicated that he would try to track down more info on the spill - he thinks it is under the Distribution Group (where Coletta worked in 1995). Susco called back, said he spoke with Jim McCabe (Bronx/Westchester EH&S), who may have some info. (JHO) 2/26/03: found original spill file containing all info from spill date through July 1996. Entered info in database, will contact McCabe to track down Bob DePass for update - was investigation ever conducted? Results? (JHO) 3/3/03: called Maureen Sicherman (Con Ed Remediation) - requested she attempt to track down file for this site. (JHO) 11/30/04: Spill transferred to Arakhan for follow up. (JHO) Closed. 12-30-05. see eDocs. G. Breen "

Remarks:

"61 parts per million in soil sample taken from above location. unknown how much pcb oil is in ground. conctor will be on site sat 10/21/95. clean harbor is contractor."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "8/25/2015: Rashad Prepared and will send CSL to owners address per NYC property records: American Self Storage Landing Road LLC 788 Shrewsbury Avenue Tinton Falls, NJ 07724 CSL document uploaded to D2. 8/28/15-Zhune called Arseen from GZA 973-774-3300. She said this site entered the OER VCP program. During excavation as part of development, soil contaminated was identified with petroleum odor and PID readings. 8/28/15-Karen Pinto from American Self Storage Landing Road, LLC sent a letter dated 8/27/15. The letter stated please be advised that we no longer own this property. It was sold to West 25th Street Housing Development Fund Corporation on March 27, 2015. Karen Pinto 732-741-0707 Phone 732-741-1188 Fax 3/23/16-Benjamin Alter from GZA sent the spill closure report for this site. The report stated that a nine story residential building with a cellar is currently being constructed at the site. During the construction, the site was divided into eight sampling and excavation grids. Two impacted areas were discovered during site gridding, one in the north of Grid-5 at 4 feet below ground surface and another in the eastern portion of grid -3 to a depth of 10 feet below ground surface. Soil samples TP-1, TP-2 and Hotspot-TP were collected from test pits TP-1, TP-2, TP-3 (installed north of Grid-5) respectively to characterize the soil. Soil contaminated in TP-3 was excavated. The final excavation was approximately five feet by five feet in area and five feet deep. GZA collected endpoint samples TB-3East, TB-3North, TB-3South, TB-3West at a depth of 4.5 feet bgs, and bottom samples TB-3CTR at 5 feet bgs. The soil analytical result indicate no VOCs exceedance. All five samples indicate benzo (a) anthracene, benzo (a) pyrene, benzo(b)fluoranthene, chrysene, dibenzo(a,h)anthracene and indeno (1,2,3-cd)pyrene at concentration above the NYSDEC Cp-51 guidance. The impacted area in the Easter portion of grid-3 was excavated. The excavation area is five foot by five foot, ten foot deep area. Four endpoint samples were collected from sidewall Grid-3E, Grid-3W, Grid-3N and Grid-3S and one sample from bottom Grid-3W. The soil analytical result indicate no VOCs exceedances in these samples.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Tyree submitted a letter/closure which states the following: On July 11, 2007 it was reported that a customer hit a dispenser for regular and premium grade gasoline. The NYSDEC was immediately notified and spill No. 07-04058 was assigned to the site. On July 11, 2007 Metro Environmental Services, LLC dispatched a crew to the site in order to inspect the dispenser and test the product dispenser lines. The regular and premium grade dispenser lines were tested and passed. A copy of the testing results is included with this report. It was noted that all of the piping was in sound condition and that there was no release of gasoline to the soil or groundwater at the site. Based upon the aforementioned information Tyree, on behalf of Getty Petroleum Marketing Inc., kindly requests the closure of NYSDEC spill no. 07-04058. ***** Spill Closed"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 3/23/05-Vought-File review by Vought: Tank Closure Report (Tyree Org)-June 1997. Tank removal performed as part of service station upgrade. One dispenser island adjacent to Bailey Avenue. Currently the new underground storage tanks are located in the area of the forme gasoline tanks . The surrounding area consists of wooded tracts of land interspersed with multi-story apartment buildings . Removal of pump island, twelve (550-gallon) gasoline USTs, one (550-gallon) waste oil UST and one (550-gallo) fuel oil UST. Approximately 500 cubic yards of impacted soil was excavated and stockpiled . Sixteen endpoint soil samples were collected. Soil analyticals show: 1040ppb benzene(nothwall fuel oil 4'bgs), 9890ppb xylene(north wall fuel oil 4'bgs), 23100ppb 1,2,4-trimethylbenzene(north wall fuel oil 4'bgs), 3880ppb toluene(S5 7.5'bg), 11700ppb ethylbenzene(S5 7.5'bg), 85300ppb xylene(7.5'bg), 3270ppb MTBE(S5 7.5'bg), 31500ppb xylene(S6 7.5'bg), 2240ppb MTBE(S6 7.5'bg), 3030ppb xylene(S7 7.5'bg) and 1600ppb MTBE(S7 7.5'bg). Approximately 591.33 tons of impacted soil was removed from the site. Subsurface Investigation Report (Tyree Org)-March 1998. Residential located across Heath Avenue and expressway located across Bailey Ave. North of site is parking lot. Four borings performed and three monitoring wells installed. Depth to water is 16-28' below grade and flow to the west. Soil analyticals show 638ppb MTBE(B2 0-5'bg), 1956ppb xylene(B3 0-5'bg). Groundwater analyticals show 184ppb MTBE(W-1). Letter from DEC O'Dowd to Getty Ochotorena-4/2/98. However, additional investigation is warranted and required... ..the Department is requiring that Getty Petroleum Marketing Inc conduct and adequate subsurface investigation to delineate the full extent of gasoline contamination on-site and off-site . Report deadline to DEC by 7/31/98. Quarterly Monitoring Reports (Tyree Org) 7/9/98 thru

10/21/98. Three monitoring wells onsite and groundwater flow to the west. Depth to groundwater is 16-29 with monthly gauging and quarterly sampling. Groundwater shows no TOGs exceedences. Initial Subsurface Investigation Report (Tyree Org)- December 1998. Same report as March 1998 report above. Letter from Tyree Org (Conroy) to DEC O'Dowd-3/22/99. Tyree requests that NYSDEC close the spill number for this site . Quarterly Monitoring Reports (Tyree Org) 10/21/98 thru Jan 2000. Three monitoring wells onsite. Groundwater at depths of 14-29'bg and flow to the west-southwest. Quarterly sampling and quarterly gauging. Groundwater analyticals show 52.5ppb MTBE(W1). Environmental Site Investigation and Monitoring Well Installation (Tyree Org)-January 2000 thru January 2002. Two additional monitoring wells were installed in January 2000. Soil analyticals show no TAGM 4046 Soil Cleanup Objective exceedences. Groundwater analyticals show 579ppb MTBE(W4), 13ppb benzene(W5), 374ppb ethylbenzene(W5), 243ppb xylene(W5) and 1320ppb MTBE(W5). No Further Action Request (Tyree Org)-3/31/02. Site monitoring and gauging changed to a semi-annual basis. No Further Action Request (Tyree Org)-5/3/02. Site monitoring and gauging changed to a semi-annual basis. Status Report (Tyree Org) January 2002 thru June 2003. Five monitoring wells onsite and groundwater flow to the west. Semi-annual monitoring and gauging. Groundwater analyticals show 35ppb ethylbenzene(MW5), 47ppb xylene(MW5) and 1450ppb MTBE(MW5). Semi-Annual Monitoring Report (Tyree Org) July 2003-June 2004. Five wells onsite and groundwater flow to the west. Semi-annual monitoring and gauging. Groundwater analyticals show 284ppb MTBE(MW4), 6ppb ethylbenzene(MW5) and 73ppb MTBE(MW5). Geoprobe Workplan (Tyree Org)-7/29/04. Proposal for the installation of five soil borings downgradient of the tanks, pumps, and MW's 4 and 5 on the sidewalk of Bailey Avenue. Unless you indicate otherwise, Tyree will proceed with the work mentioned above in the August 2004 . Subsurface Investigation Report (Tyree Org)-10/26/04. On behalf of Getty Properties Corporation, the Tyree Organization requests that Spill No. 9611209 be issued a No Further Action... Soil analyticals show no TAGM 4046 Soil Cleanup Objective exceedences. Semi-Annual Monitoring Report (Tyree Org)-July 2004 thru December 2004. Five wells onsite and groundwater flow to the west. Semi-annual monitoring and gauging. Groundwater analyticals show 27ppb MTBE (MW5) with no nearby sensitive receptors. 3/23/05-Vought-No Further Action Letter sent by Vought. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "e2mis no 157632 16-Mar-2005 03:48hrs. FOD field Op. A. Martucci discovered approximately 3 gallons of oil on 100 gallons of water. No sewers, waterways or private property affected. ENv. tag 43787 placed in vault. Chain of custody DD13465 tracking a PCB sample. Clean up will be scheduled at 1500hrs pending sample test results. 16-Mar-2005 20:55hrs. Env. Flush Mech O. Negron 18400 reports partial cleanup completed. Unit is leaking. Fdr Control verifies unit and three sections of cable will be replaced. Once feeder is Live, end capped and setions and vault are isolated, I&A will schedule a removal of the unit with a complete cleanup. CFS tanker took on 100 gallons of liquid for transport and disposal at the Astoria WWTF. Env. vactor took on 85 lbs. of flush debris for transport and disposal at the hellgate flush facility. Env. tag 43787 remains in place. 28-Mar-2005 07:21 Lab Sequence Number: 05-02340-001 TOTAL PCB 29 ppm 29-Mar-2005 15:45 D. Rohrer 12788 Flush Mech T. Brown 44432 reports cleanup complete performing a double wash and rinse removing 300 lbs of flush solid debris to be brought to Hellgate Pit for temporary disposal. CFS tanker removed 296 gallons of non-hazardous liquid to be brought to Astoria WWTF. Env tag 43787 was removed and the source of the oil was the transformer which was removed from the structure."
Remarks: "Transformer possibly still leaking. Spill was on 100 gallons of water. Spill is contained. Coming off 24 hour program. Con-Ed #157632" Not reported

- . Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

- . Waste code: U188
- . Waste name: PHENOL

- . Waste code: U200
- . Waste name: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

- . Waste code: U201
- . Waste name: 1,3-BENZENEDIOL (OR) RESORCINOL

- . Waste code: U279
- . Waste name: CARBARYL (OR) 1-NAPHTHALENOL, METHYLCARBAMATE

Date form received by agency: 01/01/2007
Site name: TARGET #1798
Classification: Small Quantity Generator

Date form received by agency: 01/01/2006
Site name: TARGET #1798
Classification: Not a generator, verified

Date form received by agency: 08/02/2005
Site name: TARGET #1798
Classification: Conditionally Exempt Small Quantity Generator

FEEDER M51 - MANHOLE 29001 (Continued)

S108764064

Contact Phone: (212) 580-8383
DEC Memo: "09/20/07 - See eDocs for Con Ed report detailing cleanup and closure. 207748. See eDocs. This spill is believed to be related to discovery of cable oil in manhole in Bronx, spill 0706033 (emis 207751). Alarm is for feeder M51. Leak rate is low - about one gallon per hour. The Sedgwick Avenue spill, 0706033, for cable oil in a manhole in the Bronx, is being closed out so that the information can be consolidated in one place, which is this spill 0706027. 08-28-07. Breen went to MH 29001 at Sedgwick Ave, site of Spill 0706027. All State vac d out concrete vault. About 200 gal recovered. Leak is very slow. ConEd found it very quickly after feeder alarm went off. Feeder is operating and under full pressure. Excavated on the south side of the vault. I did not see any contaminated soil in the excavation. Leak is believed to be on bottom of feeder where it exits the south wall of vault. ConEd has to break concrete around feeder penetration of wall to install clamp. Mike Pillig was there with Ed Conway, former omsbudman who has just been promoted, and Tony DelGardo and new ERT from Indian Point. Leak is slow. Most or all of release is into the vault. Little or no impact to soil, or so it seems at this point in time. Plan is to expose feeder to locate leak. Then apply first a clamp and then weld on a barrel over the damaged area. ConEd will break the south wall around where the feeder penetrates in order to locate the leak. In the process of excavating, it will come clear where cable oil got out of the vault. After the repairs are made, ConEd plans to investigate the north wall of the vault by excavating there. 09-14-07. See spill 0706480 for an additional release from this feeder near 231 Street. "

Remarks: "POTENTIAL SPILL AMOUNT IS 500 GALLONS; FEDDER RUNS FROM ABOVE ADRESS TO SPRAIN BRROK SUBSTATION IN WESTCHESTER - 245 TUCKAHOE RD; FEEDER NAME- M51- 345 TRANSMITION FEEDER; NRC #847038; 207748."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Double walled tank, line, sump and they found oil in the sump. When F&N opened up the boot they found the whole secondary containment was filled with oil. DOS foreman said that the tank & system was taken out of service for repairs. 8-6-2008 An e-mail was sent to DDC/URS/V. Brevdo: There is a new spill caused by a hydraulic oil tank. The spill records state that oil was found in the sump. F&N found that the whole secondary containment was filled with oil. DOS foreman said that the tank & system was taken out of service for repairs. The tank area should be investigated. Please submit an investigation plan to DEC. AZ 8/21/2008 There was a duplicate spill number for this tank test failure. Spill # 0802569 was closed out and referred to this case. 8-21-2008 Received a NYC DOS report stating that the motor oil tank #2 (2,000 gallon UST) failed an air tightness test. Follow up testing by Fenley & Nicol showed that there is a leak in the piping (suction line). NYC DOS suspended use of this tank. I sent an e-mail to DDC/URS/V. Brevdo requesting investigation of the spill. AZ 3-9-2010 Reviewed URS report dated August 20, 2009. The report stated that the cause of this spill was a failed tightness test of the suction line associated with 2,000-gallon motor oil UST. In May 2009 Franklin Company Contractors initiated work by tightness testing the

Remarks: suction line. The primary, inner line was tested at 30 psi and the secondary, outer pipe was tested at 5 psi for 30 minutes. During the test, Franklin observed that pressure in the primary pipe dropped while pressure in the secondary pipe increased. These results indicated that there was a break in the primary line but that the secondary pipe was tight. Any release from the primary pipe was contained by the secondary pipe and returned to the tank sump. Franklin excavated and removed the entire length of the old suction line. Franklin found no break in the secondary line and no evidence of soil contamination. Franklin installed and tightness tested a new double-walled suction line. Based on the above information, URS requested closure of this spill number. The request is granted. The e-mail confirming spill closure was sent to J. Staten, Ms. Asbagh (NYC DDDC) and V. Brevdo. AZ"

"Motor oil line failed. Material is leaking into the piping sump. No impact to the environment. The line will be taken out of service and repaired. Unknown who is doing the repair work."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "7-13-2005 This site is remediated under NYCDDC CO. Monitoring borings were completed in April 2005 and the results showed compliance with TAGM 4046. Contacted Steve Frank (LiRo). Requested to map exact location of the excavated tanks, excavate all contaminated soil, install new soil borings/wells if this area is not covered by the previous investigation. AZ 7-18-2005 Requested original laboratory data and tank closure report. AZ 3-23-2006 Contacted Steve Frank (LiRo) and requested an update for the site. AZ 3-21-2007 Reviewed monitoring report for November 2006 - January 2007. On December 6, 2006 the MPE system was off due to the blockage in the seal water piping. The system was repaired.M W-02 was destroyed. No gw compounds exceeded DEC Quality Criteria. Soil sampling will be performed. I requested that downgradient wells are sampled. AZ 4-30-2008 An e-mail requesting identification, investigation and remediation of the tanks associated with the spill was sent to Jane Staten (URS)/VB. Conversation w/Jane Staten. I confirmed that DEC requested information about this tank closure but never received it. URS has to map the tanks and sow locations of sampling points and their results in the USTs area. J. Staten will look into it. AZ 7-8-2008 I have reviewed a report for the above spill number dated June 2, 2008. URS stated in their report that in June 2005, The Franklin Company (Franklin) excavated three of five USTs contained in a vault located at the Manhattan 12 site. The USTs were identified as ##7, #10 and #11. The remaining two USTs located in the same tank vault, identified as #8, and #9, were previously closed in place (filled with concrete) in September 1996. Following removal of tanks #7, #10, and #11, Franklin collected five post-excavation samples. The analytical data showed that no compounds exceeded the NYSDEC TAGM #4046. Additional soil samples were collected in the vicinity of the tank vault. In July 2004 and April 2005, Liro collected confirmation soil samples to evaluate the effectiveness of the multiple-phase extraction system that began operating in March 2003. The analytical data showed that no compounds exceeded the NYSDEC TAGM #4046 recommended soil cleanup criteria. Collectively, the analytical data showed that soil in the vicinity of the tank vault had been remediated. Based on the submitted information, spill #0504296 is closed. An e-mail was sent to Jane Staten/DDC/V. Brevdo. AZ "FLORENE , TRIMETHELBEZINE. WAS FOUND ON THE N POINT SAMPLES TAKN AFTER TANK REMOVAL. THREE TANKS REMOVED."

report LiRo proposed to shut down Header No.2 and only operating the system on Header No.1. This will allow the system to operate on the remaining area of contamination. The Department concurred with this proposal. AZ 7-18-2005 Reviewed a Monitoring Report for April-June 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. In the report LiRo recommends installing ORC socks in wells MW-8 and MW-10 to treat MTBE in groundwater. The Department concurred with this proposal. AZ 12-27-2005. Reviewed a Monitoring Report for July - September 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. In the report LiRo recommended installing ORC socks in wells MW-9 and MW-13 to treat groundwater contamination. The Department concurred with this proposal. Also, the Department concurred with LiRo proposals to shut down extraction wells EW-5, EW-6, EW-9 and EW-10. Remaining extraction wells should continue to remediate remaining groundwater contamination. Proposed confirmation soil borings were approved. AZ 4-5-2006 Reviewed a Monitoring Report for October - December 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. Gw and soil contamination exists in the area of MW-8, MW-10, and MW-13. LiRo recommended turning on wells EW-11,EW-12, EW-18 and EW-19. AZ 5-11-2006 Reviewed a Monitoring Report for January - March 2006 received on April 13, 2006. The report presented remedial system performance and groundwater monitoring data. The system was shut down for 14 days in March 2006 due to sensor replacement. As of March 2006 LiRo is no longer the consultant fr the site. Gw and soil contamination exists in the area of MW-8, MW-10, and MW-13. AZ 11-13-2006 Reviewed a Monitoring Report for April - July 2006 received on August 23, 2006. The report presented remedial system performance and groundwater monitoring data. MW-03 is apparently short circuited by EW-08. Wells MW-05, MW-10 and MW-14 were not accessible for sampling. A confirmation soil plan will be prepared by URS. AZ 1-2-2006 Reviewed a Confirmation Soil Plan dated September 26, 2006, and a Monitoring report for August through October 2006 dated November 14, 2006. Low vacuum in MW- 3, MW-7, MW-14. URS recommended advancement of three new borings in contaminated areas. AZ 1-3-2006 Could not locate borings which encountered contaminated soil in previous investigations on the site plan. GW Samples were not collected from MW-10, MW-12, MW-09 since they were unaccessible due to the parked vehicles. I informed Jane Staten that all wells should be sampled in order to apply for NFA. Contacted Jane Staten (URS) via e-mail and phone and requested clarification of the boring locations. AZ 3-20-2007 Contacted Jane Staten (URS). URS provided clarifications following DEC request for existing borings locations. 3 confirmation borings will be advanced. The dual phase system is down due to the liquid ring pump failure since February 17, 2007. System repairs will be postponed until the full round of gw and soil sampling is performed. AZ 3-21-2007 Reviewed monitoring report for November 2006 - January 2007. On December 6, 2006 the MPE system was off due to the blockage in the seal water piping. The system was repaired.M W-02 was destroyed. No gw compounds exceeded DEC Quality Criteria. Soil sampling will be performed. I requested that downgradient wells are sampled. AZ

S103478327

11-20-2007 Reviewed report dated Aug.7, 2007. A spike in MTBE level in MW-12 (2,100 ppb). The soil analytical results showed slight exceedances but PID readings were high and petro odor noticed. URS proposed additional soil borings UBR-04,UBR-05 and UBR-06 near UBR-01,UBR-02 and UBR-03. No groundwater map with the plume was submitted. Spoke with Jane Staten and sent the following e-mail: As per our discussion of the above site, proposed soil borings are approved. The report submitted on August 13, 2007, did not contain groundwater map with the contaminant plume. Whenever groundwater sampling is performed, groundwater plume map with the latest sampling results should be compiled. I concur with your proposals to sample all existing groundwater wells. Special attention should be given to sampling the downgradient wells. AZ 4-29-2008 Reviewed Contamination Soil Sampling Results/Recommended strategy report dated February 5, 2008. MTBE contamination ranged from 24 ppb to 1,100 ppb in two wells. There is a slight rise in MTBE concentrations in MW-12 over the last three sampling events. Recent soil sampling showed a significantly elevated concentration of total xylenes in UBR-04 (8' TO 10' bgs) - 44, 000. MPE system is off-line. The Harlem River is situated approximately 200' from the site. Discussed the site with Jane Staten (URS). I proposed to install ORC socks in MW-12 and leave MPE system in-place. Jane Staten proposed quarterly monitoring of the select wells. An e-mail with these conclusions was sent to URS/DDC/VB. AZ 12-24-2008 Reviewed Groundwater monitoring data through 2nd quarter 2008 dated August 8, 2008. ORC sock was installed in MW-12 in June 2008. Monitoring was performed on July 14, 2008. Well MW-12 exhibited MTBE at a concentration of 340 ppb. No other VOCs were detected in MW-12. The improved groundwater quality in MW-12 may be attributed to the ORC socks. AZ 1-8-2009 Reviewed Groundwater monitoring data through 3rd quarter 2008 dated November 14, 2008. It appears that the ORC sock placed in MW-12 should be replaced, however MW-12 box needs repair, the sock will be installed after the repairs are made. The work was planned for December 2008. In October 2008 all wells were sampled.. MTBE was the only contaminant detected. Concentrations ranged from 23 ppb to 720 ppb. Concentration of MTBE has increased from 340 ppb to 720 ppb in MW-12. AZ 5-14-2009 Reviewed groundwater monitoring data through 1st quarter 2009 dated February 16, 2008. In January 2009 all wells were sampled. MW-08 and MW-12 exhibited MTBE at concentrations of 260 ppb and 42 ppb respectively. MW-12 also exhibited benzene slightly above criteria. Well MW-08 exhibited an unexpected increase in MTBE concentrations. AZ 9-21-09 Reviewed groundwater monitoring data through 2nd quarter 2009 dated May 27, 2009. In April 2009 all wells were sampled. MW-08, MW-10 and MW-13 exhibited MTBE at concentrations ranging from 25 ppb to 260 ppb. DEC requested installation of ORC socks which were consequently installed. The ORC socks in MW-12 are improving groundwater quality MTBE concentrations in this well continues to decrease. Well MW-9 was destroyed. AZ 1-26-10 Reviewed groundwater monitoring data through 3rd quarter 2009 dated August 25, 2009. In July 2009 all wells were sampled. MW-08, MW-10, MW-12 and MW-13 exhibited MTBE at concentrations ranging from 12 ppb to 310 ppb. DEC requested installation of ORC socks which were consequently installed. URS will replace ORC sock in well MW-12 to reduce MTBE concentrations. Well MW-9 was destroyed. AZ 2-16-2010 Reviewed groundwater monitoring data through 4th quarter 2009 dated October 28, 2009. Wells exhibited MTBE at concentrations ranging from 11 ppb to 85 ppb. Well MW-9 was destroyed. AZ 4-21-2010 Reviewed groundwater

S103478327

monitoring data through 1ST quarter 20010 dated February 17, 2010. Well MW-08 exhibited MTBE at concentrations of 100 ppb and MW-12 exhibited MTBE at concentrations of 260 ppb. ORC sock was placed in well MW-12 and may have contributed to the decrease of MTBE concentrations. Analytical data for well MW-08 sine October 2007 shows fluctuating MTBE concentrations and there is no decreasing contamination trend in this well. AZ 4-23-2010 An e-mail was sent to J. Staten (URS): I have reviewed groundwater monitoring data through 1st quarter 2010 for the above site. Well MW-08 exhibited MTBE at concentrations of 100 ppb and well MW-12 exhibited MTBE at concentrations of 260 ppb. ORC sock was placed in well MW-12 and may have contributed to the decrease of MTBE concentrations. Analytical data for well MW-08 sine October 2007 shows fluctuating MTBE concentrations and there is no decreasing contamination trend in this well. URS proposed spill closure for this site. Spill closure can not be granted at this time. However, monitoring reports could be submitted semi-annually. ORC sock should be placed in MW-8, if this has not been done before. AZ 2-17-2011 An e-mail was sent to K.Shenahan/Asbagh/V. brevdo: I have reviewed semi-annual monitoring report for the above site dated October 13, 2010. Monitoring well MW-06 can be removed from the scheduled sampling. AZ 2-18-2011 Discussed this site with URS at the quarterly meeting. URS informed DEC that MW-06 had a reading of about 300 ppb in January. DEC requested continuing monitoring of MW-06. An e-mail was sent to URS on 2-18-2011. AZ 7-8-2011 Reviewed gw monitoring report through February 2011 and dated May 19, 2011. An email was sent to URS/DDC/V. Brevdo: Dear Kevin, I have reviewed a quarterly monitoring report through February 2011 and dated May 19, 2011, for the above site. The report states that there are some discrepancies in the tank inventory between URS's records and PBS records. This discrepancy should be clarified. A site visit should be conducted to confirm the tanks status. If necessary, GPR studies should be performed to verify if the tanks in question are removed or closed in place. After discrepancies are clarified, a corrected PBS form should be submitted to NYSDEC PBS Section. Contamination was unexpectedly found in a monitoring well MW-6. As per URS recommendation, if re-sampling confirms contamination, an investigation should be performed to determine the extent of the problem. AZ 8-6-2012 The spill was discussed at the DEC/DDC/URS meeting on August 2, 2012. Groundwater monitoring report for the fourth quarter 2011 and first quarter 2012, dated May 17,2012 was discussed. The report stated that all available wells were sampled. However, wells EW-08 AND EW-20 were blocked, EW-09 was destroyed, EW-02 and EW-11 had obstructions in the well. It was decided that URS will attempt to sample blocked wells. Regarding the wells which were destroyed and/or had obstructions, historical data will be submitted to DEC. Groundwater results in nine wells exceeded VOC criteria. Also, after removal of ORC socks, concentrations in three wells rebounded: MW-12 (from 30 ppb to 300 ppb),EW-11 (from 0 ppb to 171 ppb) and EW-13 (from 0 ppb to 200 ppb). URS will continue monitoring this site. I have discussed the site with K. Shenahan over the phone. AZ 8-7-2012 E-mail received from K. Shenahan: Alex, We are sampling the extraction wells they are designated as EW wells. Only two EW wells are not functioning. EW-02 could not be sampled due to an obstruction. It is relatively close to the boundary of dissolved-phase contamination, located between wells MW-13 and MW-14, and about 15 feet or so from each. Analytical data from MW-13 and MW-14 over the past 5 years shows low contamination.

EW-09 is reported as being destroyed. It is upgradient from the plume, and total VOCs in nearby wells have been 2 ppb or Not Detected over the past 5 years. I recommend that we sample the wells listed and if the levels are such that we could petition for closure we could see if it is necessary to acquire data from these locations. AZ 6-7-2012 An e-mail received from URS: From: McDaid, Daniel Sent: Tuesday, August 07, 2012 4:19 PM To: Shanahan, Kevin Subject: RE: Man W12 sampling Wells within the boundary of dissolved-phase contamination: MW-06 MW-08 MW-10 MW-12 EW-01 EW-11 EW-12 EW-15 EW-18 The following wells were not sampled (green font indicates that the sample collection could be re-attempted): EW-02 Obstruction EW-08 Vehicle parked over well EW-09 Destroyed EW-16 Not enough water EW-20 Vehicle parked over well In summary, here is a full list of wells to be sampled during the upcoming site visit: MW-06 MW-08 MW-10 MW-12 EW-01 EW-08 Vehicle parked over well EW-11 EW-12 EW-15 EW-16 Not enough water EW-18 EW-20 Vehicle parked over well Notes EW-02 could not be sampled due to obstruction. It is relatively close to the boundary of dissolved-phase contamination, located between wells MW-13 and MW-14, and about 15 feet or so from each. Analytical data from MW-13 and MW-14 over the past 5 years shows minimal contamination (See attached). EW-09 is reported as being destroyed. It is upgradient from the plume, and total VOCs in nearby wells (See attached) have been 2ppb or ND over the past 5 years. URS has never sampled any of the extraction wells before, and there is no historical data for these wells in the ISRP. AZ 11-19-2012 Discussed the site with K. Shenahan. There is persistent MTBE contamination probably related to soil MTBE contamination. A soil map attached to the report is not legible. URS will submit another map. AZ 11-20-2012 Email from K.Shanahan: Alex, Yesterday you called me to discuss the above referenced site and specifically URS' report dated September 21, 2012 . You indicated that Figure 3 in Attachment B was not legible enough to discern the boring locations. I have sent you a hard copy in a separate letter. In the meantime, the pdf version is attached. AZ 11-21-2012 An e-mail was sent to K. SHenahan and V. Brevdo Dear Kevin, We have discussed this site yesterday and today. The groundwater at the site still has MTBE contamination which exceeds the standards by an order of magnitude. A reason for this contamination could be that soil at the site was grossly contaminated with MTBE. In order to trace groundwater contamination we need to prepare detailed soil maps showing original soil contaminant levels and the latest confirmation soil borings results. It was agreed that URS will submit these maps to DEC. Sincerely, Alexander Zhitomirsky 5-13-2013 On April 3 and 4, 2012, URS sampled monitoring wells. The data showed that the groundwater in the northeastern corner of the sanitation garage continued to be impacted with low concentrations of volatile organic compounds (VOCs) including MTBE. The highest total VOC concentration detected was in MW-12 with 300 ppb (MTBE was the only compound detected). I have reviewed a Historical Soil Sampling Analytical Results report dated February 1, 2012. The report stated that free phase at the site was treated by a passive product recovery system which was converted to operate as an active groundwater and product recovery system. Also, product recovery was performed using a vac truck. A multi-phase extraction system was constructed at the site in 2003 and was shut down due to equipment failure in 2007. The site still has lingering groundwater impacts detected in the northeastern corner near the dispensers. Given the most current soil and groundwater data for the site, URS recommended natural

S103478327

attenuation of remaining soil and groundwater contamination. URS recommended no further action for this site. The report stated that soil sampling completed after MPE system was terminated. In 2007 soil samples were collected. PID screening had elevated measurements indicating petroleum constituents. Moderately elevated VOC exceedances were present in the sample collected from UBR-04. AZ 8-5-2013 Reviewed Groundwater Monitoring Report and Request for Spill Closure dated May 10, 2013. A total of 1,018 gallons of product were reported as being collected by RES through 1999. LiRo reported collecting an additional 88 gallons of free product.. No free product has been observed at the site since September 2003. The most recent soil sampling was conducted in 2007/2008. The soil data indicated that a limited area of contamination remained in the area of MW-08, MW-12, and MW-13 near the former dispenser area. The highest total VOC concentration was about 46,000 ppb. groundwater sampling from from January 2013 ranged from 52 PPB TO 224 PPB in those wells with exceedances of the the NYSDEC criteria. In the latest sampling event in April 2013, the highest total VOC concentration observed was 175 ppb. Based on the above information, URS requested that DEC close spill number 9604262. This request is approved and the spill number is closed. However, there are some discrepancies between the PBS registration and URS' current understanding of the tanks status. A number of tanks are listed in the PBS database as aboveground tanks (ASTs) tanks were closed in place. It is assumed that most if not all of these ASTs were removed from the site. Additionally, PBS lists tanks Nos. 008 and 009 as closed in place, although URS believes that these tanks have been removed. URS should perform a site inspection and very the tanks status. An updated PBS information should filed. URS inform NYSDEC when the above information is filed. AZ 8-6-2013 The following e-mail was sent to Kevin Shenahan, M. Asbagh and Vadim Brevdo: Dear Kevin, I have reviewed Groundwater Monitoring Report and Request for Spill Closure dated May 10, 2013. A total of 1,018 gallons of product were reported as being collected by RES through 1999. LiRo reported collecting an additional 88 gallons of free product. No free product has been observed at the site since September 2003. The most recent soil sampling was conducted in 2007/2008. The soil data indicated that a limited area of contamination remained in the area of MW-08, MW-12, and MW-13 near the former dispenser area. The highest total VOC concentration was about 46,000 ppb. Groundwater sampling results from January 2013 sampling event, ranged from 52 ppb to 224 ppb, in those wells with exceedances of the NYSDEC criteria. In the latest sampling event in April 2013, the highest total VOC concentration observed was 175 ppb. Based on the above information, URS requested that DEC close spill number 9604262. This request is approved and the spill number is closed. However, there are some discrepancies between the PBS registration and URS' current understanding of the tanks status. A number of tanks are listed in the PBS database as aboveground tanks (ASTs) tanks closed in place. It is assumed by URS that most, if not all of these ASTs, were removed from the site. Additionally, PBS lists tanks Nos. 008 and 009 as closed in place, although URS believes that these tanks have been removed. URS should perform a site inspection and verify the status of the tanks. An updated PBS information should filed with the PBS Section of NYSDEC. URS should inform NYSDEC when the above information is filed. Based on the documentation provided to date, the New York State Department of Environmental Conservation (the Department) has closed the spill case number 9604262. All wells

associated with this project should be closed according to the Department's Groundwater Monitoring Well Decommissioning Procedures. All wells should gaged for the presence of free product before closure. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates the corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts must be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alexander Zhitomirsky "

Remarks: "upon drilling for wells soil contamination was discovered still under investigation at this time"

 DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY This site was investigated by Promatec/TRC, and later by URS/OBK. Significant soil contamination and moderate groundwater contamination were identified. In September 2001, URS proposed installing an SVE system to address soil contamination and applying ORC to groundwater followed by groundwater monitoring. DEC approved these recommendations in correspondence dated 9/26/01, and approved the Design Analysis Report with details of the remedial action plan in letter dated 4/29/02. SVE system was installed and started up in July 2003. Permeox Plus (an oxygen releasing compound) was injected into groundwater in June 2003. In August 2004, URS issued a confirmation soil sampling plan to evaluate remedial progress; DEC approved the plan in letter dated 1/7/05. - J. Kolleeny 7/14/05: On 7/12/05 URS issued request via email to temporarily suspend SVE system operation pending results of confirmation soil sampling. The email included SVE system performance, air influent/effluent monitoring, and groundwater monitoring data as an attachment. After reviewing the data, DEC approved the temporary system shutdown via email on 7/14/05. - JK 7/7/06: Received Additional Site Investigation

111 PRECINCT NYPD -DDC (Continued)

S102149427

Work Plan from Roux (consultant to Greyhawk, new CM for this site). Plan is same as Confirmation Soil Sampling Plan issued by URS in Aug. 2004 and approved by DEC in Jan. 2005. I told Wendy Shen of Roux that plan was already approved and they could proceed with the fieldwork.

- J. Kolleeny 03/23/07: Reviewed Roux's Quarterly Monitoring Report for July-Sept. '06, dated Jan. 5, 2007. Report presents results of confirmation soil sampling performed in July '06 and groundwater sampling performed in August and November '06. Soil results show several areas still have high levels of contamination, ranging up to 235.5 ppm total VOCs. GW was sampled in only two wells, MW-3 and MW-4; MW-4 was ND both events, MW-3 had 898 ppb total VOCs in Aug. '06 and 865 ppb total VOCs in Nov. '06. Report recommends (1) evaluating cost-effectiveness/feasibility of resuming SVE system operation, (2) reducing GW monitoring frequency from quarterly to semi-annual, (3) Removing well MW-4 from GW mon. program, and (4) evaluating remedial alternatives (e.g., nat. atten. or enhanced biorem) to address GW contam. in MW-3. I emailed review comments to Brian Morrissey of Roux on 3/23/07 saying soil results show gross contamination remaining and that wells in areas of soil contamination (MW-1, MW-2, MW-5/5A, MW-8) must be re-sampled in order to evaluate Roux's recommendations. - J. Kolleeny 05/03/2007: This spill case was transferred to A. Doronova. AD Reviewed file. Awaiting results of groundwater re-sampling in monitoring wells MW-1, MW-2, MW-5/5A and MW-8. 05/30/2007: Received QMR from Roux for period October 2006 through March 2007, dated May 24, 2007. On November 6, 2007 and February 21, 2007 Roux sampled 2 monitoring wells (MW-03 and MW-04) and one ventilation well IW-12 for VOC compounds. Lab results show increasing of TVOC concentrations: MW-03 from 865ug/L in November, 2006 to 1418ug/L in February, 2007; MW-04 from ND in November, 2006 to 17ug/L in February, 2007. VOC were not detected in the ventilation well IW-12. Roux recommend: - reducing groundwater monitoring frequency to semi-annual if another monitoring round's results show low-level residual concentration; - removing ventilation wells IW-07 and IW-12 from the groundwater sampling program due their access difficulties. AD 10/20/2008: Received QMR for period of October 2007 through July 2008. Will review. AD 11/12/2008: Reviewed the report. It states that during the reporting period, Roux conducted monitoring program in November 2007, February 2008 and April 2008. Monitoring wells MW-1 through MW-4 were sampled. MW-8 could not be sampled because there was not enough water in the well. During the April 2008 sampling round, VOCs were detected only on MW-3 (994 ppb). Concentrations of VOC in this well show clear increasing trend. November 2007 - 259 ppb; February 2008 - 528 ppb and April 2008 - 994 ppb. On July 28, 2008 Roux installed replacement well MW-5 (RXMW-01). A minor amount of visual evidence of petroleum contamination was observed on the field during soil boring at the depth of 25-30 feet. Soil sample was collected for analysis. No VOCs or SVOCs were detected in the soil sample. However, based on Roux July 2006 confirmatory soil sampling, site-wide residual vadose zone soil contamination (2 feet to 21 feet bls) remains at the site. Greyhawk personnel visited the site on October 6, 2008 to determine if the SVE system could be restarted. The motor needs to be replaced. Roux recommends: to reduce GW sampling frequency from quarterly to semi-annual; remove wells MW-1, MW-2 and MW-4 from sampling program; restart and test SVE system. Will write a letter. AD 11/17/2008: Sent an email to Afsar Samani of DDC. Approved the recommendations with the comment to continue quarterly groundwater monitoring program for

111 PRECINCT NYPD -DDC (Continued)

S102149427

the newly installed well MW-05 and also for the well MW-03 due to its consistently increasing levels of VOCs. DL to eDocs. AD In February 2010, NYCDDC replaced Greyhawk/Roux with LiRo Engineers, Inc. to serve as a CM for this site. 07/06/2010: Received a Site Status Turn-Over report from LiRo. Will review. AD 08/25/2010: Reviewed the report. In this report LiRo summarizes most recent Roux's soil and groundwater data. The report states that GW samples were collected by Roux in October 2009. No VOCs were detected in any of the site wells. The 2006 soil investigation conducted by Roux indicated that significant soil contamination was present at that time in the northern portion of the site. LiRo recommends to continue quarterly groundwater sampling, to conduct soil sampling in six months and to place ORC sock into well MW-03. AD 11/09/2010: Received a Third Quarter Monitoring Report for 2010. DL to eDocs. Will review. AD 01/05/2011: Reviewed the report. Groundwater sampling was completed by LiRo on June 3 and 4, 2010. Wells MW-01, MW-02, MW-03, MW-04, MW-07, MW-10, MW-12, MW-13, MW-14 and MW-15 were gauged and sampled for VOCs and SVOCs. Well MW-05 was inaccessible and MW-08 was dry. Groundwater was observed between 36.46 and 39.01 ft bgs. No free phase product was detected during the June 2010 gauging event. A groundwater general flow direction is towards the north. Total VOC concentrations ranged from non-detect to 1.7 micrograms per liter (?g/L) in wells sampled. No VOCs were detected above TOGS 1.1.1 Ambient Water Quality Standards and Guidance Values. No SVOCs were detected in sampled wells. The results indicate that groundwater is no longer impacted. Moreover, data from monitoring well MW-03 which historically has had total VOC concentrations as high as 994 ?g/L, is negligible. The sampling confirmed previous results showing no impact to groundwater from SVOCs. The SVE system is recovering contaminants from the vadose zone and appears to be operating as designed. However, further operational data is required to characterize the effect of the Greyhawk/Roux installed packers or if additional system modifications are warranted. ased on the conclusions cited above, LiRo recommends the following: -Continued operation of the modified SVE system with packers installed. -In order to gauge the success of the SVE system modifications, a round of soil sampling should be conducted six months following startup of the SVE system (approximately February 2011). -Reduction of groundwater sampling and gauging from quarterly to semi-annual. LiRo also recommends removal of all wells from the sampling program with the exception of well MW-03. The semi-annual MW-03 sample will be analyzed for STARS list VOCs +MTBE+naphthalene. The semi-annual gauging will continue to include all site wells. -Continue quarterly system air compliance sampling and routine O&M activities. AD 03/09/2011: Received an e-mail from S. Frank of LiRo with an attached site plan with the proposed soil borings locations. Hi Ainura, In our last Quarterly Report (dated Nov. 2, 2010), we recommended progress monitoring soil borings after 6-months of system operation at the 111th Pct. We have that boring work scheduled for next week. The planned boring locations for the work are attached as are the results from previous soil sampling (the site has not been sampled since 2006). The ten borings will be terminated at the water table (approximately 38 to 40 ft bgs) or upon refusal. At each boring location, soil samples will be collected via split spoon sampling every 2 ft. and evaluated for petroleum contamination using a photo-ionization detector (PID) and visual observations. A minimum of two soil samples will be collected and submitted for laboratory analysis; one sample will be collected

MAP FINDINGS

111 PRECINCT NYPD -DDC (Continued)

S102149427

from the interval exhibiting the highest PID field screening measurement and one sample just above the water table. If additional contaminated zone(s) are observed, there may be more than 2 samples collected. I don't think we need formal (i.e. written) approval of boring locations for ongoing monitoring, however, we could easily modify the program. If there is something you would like changed please let me know by the end of this week. Thanks, Steve Frank LiRo Engineers, Inc. 718-321-3136 x236 DL the plan to eDocs. Reviewed the site plan. Will discuss it with J. Kolleeny of DEC. 03/10/2011. Discussed the soil boring plan with Jon. Will issue an approval letter. Ad 03/11/2011: Sent the approval letter to A. Samani. DL pdf copy of the letter to eDocs. AD 03/24/2011: Received a Quarterly Monitoring and System Performance Report for October-December period and Additional Site Investigation Plan. DL pdf copy to eDocs. Will review. AD 03/30/2011: Reviewed the report. It states that the 111th Police Precinct site is currently on a quarterly gauging and sampling program. Routine quarterly groundwater sampling was completed by LiRo on October 8, 2010. Accessible wells MW-02 through MW-05, MW-07, MW-10, MW-12, MW-13, MW-14 and MW-15 were gauged and sampled for VOCs and SVOCs. Well MW-01 could only be gauged and not sampled because a car was parked over the well during the sampling phase. Well MW-08 was not sampled because it was dry. Groundwater was observed between 37.05 and 46.50 ft bgs. No free phase product was detected during the October 2010 gauging event. The interpreted general GW flow direction is towards the north/northwest. VOCs were only detected in monitoring wells MW-03 and MW-05. Total VOC concentrations in MW-03 were 0.82 ?g/L and 12.4 ?g/L in MW-05. The VOC compound n-propylbenzene was detected above NYSDEC TOGS in well MW-05. No SVOCs were detected in the sampled wells. Total VOC concentration for the wells stayed the same for this sampling event when compared to the June 2010 sampling event, except for monitoring well MW-05. The total VOC concentration went from non-detect (June 2010) to 12.4 ?g/L (October 2010) in well MW-05 and went from 1.7 (June 2010) to non-detect (October 2010) in well MW-03. Quarterly SVE air samples are collected at the effluent stack for laboratory analysis of benzene via USEPA TO-15 Method. The air sample for this monitoring period was collected on December 31, 2010. The analytical results for the December sampling indicate a benzene effluent concentration of 9.71 micrograms per cubic meter (?g/m³). Based on the discharge flow rate of 303 cfm the day the sample was collected the system was discharging 1.1 X 10⁻⁵ lb/hr of benzene. Both the weekly PID readings and the quarterly air sample of the SVE system's effluent demonstrate that the system is operating in compliance with the benzene emission requirement of the Stipulation Agreement (i.e., the benzene concentration is below 5.53 ppm). Quarterly influent and effluent air samples from the vapor phase carbon absorption units were collected by EAR on October 12, 2010 and December 31, 2010. The air samples were analyzed for STARS list VOCs. Based on an average flow rate of 323 CFM during this monitoring period and the results of the December 31st influent sample the system removed an estimated 0.12 pounds of VOCs from the soil during the monitoring period. Conclusions: Groundwater sampling conducted at the site in October 2010 showed that there is only a minor exceedance in monitoring well MW-05. Although there was a minor exceedance in monitoring well MW-05, the groundwater results for the other wells indicates that groundwater is no longer impacted. Moreover, data from monitoring well MW-03 which historically has had total VOC concentrations as high as 994 ?g/L, is negligible. The sampling

111 PRECINCT NYPD -DDC (Continued)

S102149427

confirmed previous results showing no impact to groundwater from SVOCs. Based on the conclusions cited above, LiRo recommends the following: Actions: - Continued operation of the modified SVE system with packers installed. - Continue quarterly system air compliance sampling and routine O&M activities. - LiRo has instructed the system contractor to procure an instrument that can read vacuum flow readings below 0.1 CFM. - In order to gauge the success of the SVE system modifications, additional soil borings are scheduled to be completed in early March 2011. See additional site investigation below. Proposals: - Reduction of groundwater sampling and gauging from quarterly to semi-annual. LiRo recommends that during the semi-annual sampling event, all the monitoring wells should be gauged and monitoring wells MW-03 and MW-05 be sampled. The semi-annual MW-03 and MW-05 samples will be analyzed for NYSDEC STARS Memo #1: Petroleum Contaminated Soil Guidance Policy list VOCs + methyl tert-butyl ether (MTBE) + naphthalene via United States Environmental Protection Agency (USEPA) method 8260. AD 06/16/2011: A Quarterly Monitoring and System Performance Report for January - March 2011 period was submitted to DEC. DL pdf copy to eDocs. Will review. AD 08/15/2011: Reviewed the report. It states that the SVE system had a 100% uptime during this monitoring period and is recovering contamination from the vadose zone (0.77 pounds during this monitoring period). Based upon an average of the weekly PID effluent readings and quarterly effluent air sample, the SVE was operating in compliance with the STIP during this monitoring period. Vacuum and air flow measurements indicate the system is operating within the design parameters. Site-wide groundwater sampling was conducted on February 17, 2011. Result for the wells indicates that groundwater is no longer impacted. Moreover, data from monitoring well MW-03 which historically has had total VOC concentrations greater than 1,000 µg/L is negligible. The sampling confirmed previous results showing no impact to groundwater from SVOCs. The soil borings completed in March 2011 as part of an evaluation of the SVE system indicates that the subsurface zone from 10 to 16 ft bgs, north of the former location of the 8,000-gallon UST is still impacted by VOCs. Shallower soil impacts (6 to 8 ft bgs) were observed in the sidewalk area along Northern Boulevard. During the completion of LSB-02: a sewer pipe located at 9 ft bgs was damaged during the completion of LSB-02 in the sidewalk north of the subject building. The sewer pipe was repaired by Empire between March 21 and March 31, 2011. As part of the sewer pipe repair, approximately 48.83 tons of soil was removed and disposed of at Soil Safe. Four sidewall and one bottom confirmatory soil sample were collected from the excavation. VOC exceedances were detected in the east sample (SS-04) and the bottom sample (SS-05). Based on the conclusions cited above, LiRo recommends the following: - Continued operation of the modified SVE system with packers installed. - Continue quarterly system air compliance sampling and routine O&M activities. Proposals: - Reduction of groundwater sampling and gauging from quarterly to semi-annual. LiRo recommends that during the semi-annual sampling event, all the monitoring wells should be gauged and monitoring wells MW-03 and MW-05 only be sampled. The semi-annual MW-03 and MW-05 samples should be analyzed for STARS list VOCs + MTBE + naphthalene. LiRo recommends removal of SVOC analysis from the groundwater sampling program. - LiRo proposes to install packers in SVE-02 and SVE-04. The screened interval for SVE-02 and SVE-04 is 3 to 40 ft bgs. The packers should be installed so that the screened interval within the extraction

S102149427

wells is 5 to 20 ft bgs. AD 09/16/2011: A Quarterly Monitoring and System Performance Report for April - July 2011 period was submitted to DEC. DL pdf copy to eDocs. Will review. AD 10/11/2011: Reviewed the report. The report presented results of groundwater sampling completed on July 7-8, 2011. The report states that site wide groundwater sampling indicate minimal impact to the groundwater. Based on the data, LiRo recommends reducing the groundwater monitoring frequency (gauging and sampling) from quarterly to semi-annual and removing wells MW-01, MW-02, MW-04, MW-07, MW-10, MW-12, MW-13, MW-14 and MW-15 from the groundwater sampling program. AD 10/12/2011: Sent the following e-mail to A. Samani: Dear Ms. Samani: DEC has reviewed the Quarterly Monitoring and System Performance Report, dated September 13, 2011 pertaining to the above-referenced site, submitted by LiRo, Engineers, Inc. (LiRo). The report states that site wide groundwater sampling indicate minimal impact to the groundwater. Based on the data, LiRo recommends reducing the groundwater monitoring frequency (gauging and sampling) from quarterly to semi-annual and removing wells MW-01, MW-02, MW-04, MW-07, MW-10, MW-12, MW-13, MW-14 and MW-15 from the groundwater sampling program. The Department approves these recommendations. Feel free to contact me if you have any questions or comments. Sincerely, Ainura Doronova AD 01/17/2011: A Quarterly Monitoring and System Performance Report for August - October 2011 period was submitted to DEC. DL pdf copy to eDocs. Will review. AD 02/17/2012: Reviewed the report. The report states that the site is currently on a semi-annual gauging and sampling program. On October 20, 2011, accessible site monitoring wells were gauged. Groundwater was observed between 36.56 and 39.96 ft bgs. No free phase product was detected during the October 2011 gauging event. Historically well MW-08 has been dry. The water level (25 ft bgs) reported for MW-08 in October 2011 is considered erroneous and was therefore not utilized in the production of groundwater elevation contours. The interpreted general flow direction is towards the north/northeast with a low hydraulic gradient measured between 0.002 to 0.0004 ft/ft across the site. A groundwater sampling occurred on October 20, 2011. VOCs were reported at concentrations above AWQSGVs in both wells (MW-03 and MW-05) for n-propylbenzene and 1,2,4-Trimethylbenzene in well MW-03 only. The total VOC concentration in well MW-03 was 32 ug/L and 18 ug/L in well MW-05. The active SVE system had a 100% uptime during this monitoring period and is recovering contamination from the vadose zone (0.2 pounds during this monitoring period). Based upon an average of the weekly PID effluent readings and quarterly effluent air samples, the SVE system was operating in compliance with the STIP during this monitoring period. Vacuum and air flow measurements indicate the system is operating within the design parameters. Based on the data, LiRo recommends the following: - Continued operation of the modified SVE system with packers installed. - Continue quarterly system air compliance sampling and routine O&M activities. - Packers were installed so that the screened interval within the extraction wells SVE-02 and SVE-04 is 5 to 20 ft bgs. Installation of the packers was completed in November 2011 and will be detailed in the next monitoring report. There are no proposals requiring NYSDEC approval at this time. AD 03/29/2012: A Quarterly Monitoring and System Performance Report for November 2011 - January 2012 period was submitted to DEC. DL pdf copy to eDocs. Will review. AD 05/02/2012: Reviewed the report. It states that the 111th Police Precinct site is currently on a semi-annual gauging and sampling program. Packers were

111 PRECINCT NYPD -DDC (Continued)

S102149427

installed on November 22, 2011, in SVE wells SVE-02 and SVE-04. The packers isolated a screened zone of 5 to 20 ft bgs. Wells SVE-02 and SVE-04 remained offline in December 2011 and January 2012 to complete installation of the packers and modify existing wellheads. On a weekly basis, LiRo receives SVE system performance monitoring data collected by EAR. - Benzene concentrations in the air emissions from the treatment system are estimated at two percent of the PID readings. The highest recorded reading of 14.5 ppm corresponds to a 0.29 ppm concentration of benzene. - Quarterly air samples are collected at the effluent stack for laboratory analysis of benzene. Air samples were collected on January 12, 2012. The analytical results for the January 2012 sampling indicate a benzene effluent concentration of 6.39 ug/m3. Based on the discharge flow rate of 243 cfm, the day the sample was collected, the system was discharging 6.0 X 10-6 lb/hr of benzene. Both the weekly PID readings and the quarterly air samples of the SVE system s effluent demonstrate that the system is operating in compliance with the benzene emission requirement of the STIP (i.e., the benzene concentration is below 7.35 ppm / 0.02206 lb/hr). On December 12, 2011, accessible site monitoring wells were gauged. Groundwater was observed between 36.48 and 38.84 ft bgs. No free phase product was detected during the December 2011 gauging event. The general GW flow direction is towards the northeast/southeast with a hydraulic gradient measured between 0.01 to 0.02 ft/ft across the site. The routine groundwater sampling occurred on December 12, 2011. Two wells were sampled: MW-3 and MW-5. The total VOC concentration in well MW-03 was 36 ug/L and 94 ug/L in well MW-05. VOC groundwater concentrations have decreased more than an order of magnitude in well MW-03 compared to historical data. Based on the conclusions cited above, LiRo recommends the following:

- Continue operation of the modified SVE system with packers installed in all four SVE wells.
- Continue quarterly system air compliance sampling and routine O&M activities.
- Continue semi-annual sampling of monitoring wells MW-03 and MW-05. There are currently no proposals requiring NYSDEC approval. AD 12/03/2012: Received SAMR for the period February - July 2012. DL the report to eDocs. Will review. AD 01/14/2013: reviewed the report. It states that on March 22, 2012, accessible site monitoring wells were gauged and sampled. Groundwater was observed between 36.79 and 40.21 ft bgs. No free phase product was detected during the March 2012 gauging event. The interpreted general groundwater flow direction is towards the northeast. The number of wells in the monitoring program was reduced following NYSDEC approval and currently includes wells MW-03 and MW-05 only. VOCs were reported at concentrations above AWQSGVs in the sample from well MW-03. The total VOC concentration in well MW-03 was 39 ug/L. The MW-05 sample results for the March 2012 sampling indicate no VOCs reported at concentrations above AWQSGVs. LiRo states that VOC groundwater concentrations have decreased more than an order of magnitude in well MW-03 compared to historical data. VOC concentrations in well MW-05 were reduced to below AWQSGVs. On March 25, 2011, an Oxygen Releasing Compound (ORC) sock was installed in monitoring well MW-03. The ORC sock was removed and replaced during the July 2011 sampling event and the March 2012 sampling event. Quarterly influent and effluent air samples from the vapor phase carbon absorption units were collected by EAR on April 2, 2012 and July 10, 2012. The air samples were analyzed for STARS list VOCs, MTBE and naphthalene. Based on an average flow rate of 231 CFM from February through April 2012 and the results of the April 2012

111 PRECINCT NYPD -DDC (Continued)

S102149427

influent sample, 229.16 ug/m3 of total VOC vapors, the system removed an estimated 0.44 pounds of VOCs from the soil. Additionally, based upon an average flow rate of 190 CFM from May through July 2012 and results of the July 2012 influent sample of 119.16 ug/m3 of total VOC vapors, the system removed an estimated 0.19 pounds of VOCs between May to July 2012. The combined total estimated VOCs removed between February 2012 and July 2012 is 0.63 pounds. LiRo concludes that the SVE system had a 100% uptime during this monitoring period and is recovering contamination from the vadose zone (0.63 pounds during this monitoring period). Since system start-up (August 16, 2010) approximately 4.47 pounds of VOCs have been removed from vadose zone soils. Based upon an average of the weekly PID effluent readings and quarterly effluent air samples, the SVE system was operating in compliance with the STIP agreement during this monitoring period. The SVE system equipment is operating within design parameters and the vacuum influence at the connected SVE wells are creating a zone of vacuum as per design radius. However, the system appears to be reaching asymptotic conditions. Based on the data, LiRo is recommending that the SVE system be evaluated to determine the vapor recovery rates from each SVE well. If after this evaluation it is determined that: " vapor extraction rates remain low at all locations; " zone of vapor recovery (vacuum influence) is as designed; " soil concentrations of petroleum-related compounds continue to be above SCLs; and " minimal petroleum impacts on groundwater are reported. Based on the conditions cited above, LiRo would recommend permanent shut-down of the system and monitored natural attenuation as the remedial action for the site. There are currently no proposals requiring NYSDEC approval. AD 04/03/2013: Received the following e-mail from S. Frank: Hi Ainura, Just a note to let you know that we have mailed a Report for 111th Precinct with a spill closure request. The report has also been posted to our ftp site that is now up and running. S. Frank DL the report to eDocs. Will review. AD 04/24/2013: Reviewed the report. It states that the 111th Police Precinct site is currently on a semi-annual gauging and sampling program. The soil borings completed in March 2011 as part of an evaluation of the SVE system indicated that the subsurface zone from 10 to 18 ft bgs, north of the former location of the 8,000-gallon UST is still impacted by VOCs at concentrations above SCLs. Shallower soil impacts (6 to 8 ft bgs) were observed in the sidewalk area along Northern Boulevard at boring LSB-02. With the exception of boring LSB-02, depths of contamination were limited to between 10 to 18 ft bgs and in localized areas. VOCs were reported above SCLs in LSB-02 from 6 to 8 ft bgs. Total VOC concentrations reported above SCLs in the March 2011 data ranged from 16,560 ug/kg to 719,500 ug/kg in soil boring LSB-02. These petroleum impacted soils were removed (up to 9 ft bgs) in the former fill port area around and including boring LSB-02 as part of the sewer repair completed in March 2011. Confirmatory end-point soil samples indicated lower levels of VOCs in the samples. Semi-annual groundwater sampling was conducted on August 24, 2012. Results for the monitoring wells sampled (MW-03 and MW-05) indicate low levels of TVOCS. Only two site wells (MW-03 and MW-05) are minimally impacted. Groundwater analytical results from the latest sampling event report low level of VOCs. LiRo summarizes that the remedial measures completed at the site include operation of an SVE system for a total of nine years and vapor recovery rates are reaching asymptotic conditions. Additional remedial measures include: injections of

S102149427

oxygen-generating compound (PermeOx Plus), petroleum impacted soil excavation in the vicinity of LSB-02 and RXSB-02 (up to 9 ft bgs), and use of ORC socks in select monitoring wells. Soil contamination remains limited to vadose zone soils (10 to 18 ft bgs) and is spotty or localized in discrete areas north of the former 8,000-gallon #2 fuel oil UST. VOC soil impacts remain above NYSDEC CP-51 SCLs. However, residual soil contamination has had a negligible effect on groundwater. Groundwater at the site is at depths > 35 ft bgs. There are no known groundwater wells located in the immediate vicinity that are utilized for drinking water purposes. The nearest municipal groundwater wells are located greater than 2,000 feet south of the site. According to the New York City Department of Environmental Protection (NYCDEP), most of the municipal groundwater supply system wells have not operated in over ten years. The nearest surface water is Oakland Lake located greater than 2,000 feet southeast and Little Neck Bay located greater than 3,600 feet to the northeast. Based on the conditions cited above, LiRo proposes closure of NYSDEC Spill No. 9414053. Following spill closure approval, site monitoring wells, SVE wells, vapor monitoring wells and components of the SVE system will be decommissioned. Will discuss the spill closure recommendation with J. Kolleeney of DEC. AD 04/26/2013: Discussed the spill closure recommendation with J. Kolleeney of DEC. Soil contamination remains limited to vadose zone soils (10 to 18 ft bgs) and is spotty or localized in discrete areas north of the former 8,000-gallon #2 fuel oil UST. VOC soil impacts remain above NYSDEC CP-51 SCLs. However, residual soil contamination has had a negligible effect on groundwater. Groundwater at the site is at depths > 35 ft bgs. Based on the actions completed and data provided such as: Operation of an SVE system; Injections of oxygen-generating compound (PermeOx Plus); Excavation of petroleum impacted soil in the vicinity of LSB-02 and RXSB-02 (up to 9 ft bgs); Use of ORC socks in select monitoring wells; Very low levels of TVOCs in only two site wells (12ppb); No off-site migration of GW contamination; No free product in any of the site wells; Analytical results for soil samples indicated that concentrations of VOCs and SVOCs in soil did not exceed their respective NYSDEC Part 375 Restricted Residential Use SCOs with the exception of two compounds (Trimethylbenzene and Xylenes) in 3 out of 21 soil samples. DEC decided to approve the spill case closure. Issued and sent an approval letter to A. Samani. DL pdf copy of the letter to eDocs. Case closed. AD "

Spiller Contact: ROBERTO
Spiller Phone: (718) 782-4200
Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 196875
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 12/5/03-Vought-See also closed Spill #8705665. 9/20/05 - oBLIGADO -Spill transferred from Vought to obligado 12/5/05 - Obligado - File review. Baseline Assessment Report, Delta, 10/3/02. At time of assessment site was an active Gaseteria with 3 4000 gallon gasoline USTs and 1 4000 gallon diesel UST installed in 1989. Sensitiver receptor survey shows Harlem River located 375 ft west, no wells within 1 mile, Bronx Community college is located 375 ft to the southeast. 1 park 375 ft north. Commercial/residential buliding with basement 20 ft south. Ground water at 10 to 13 ft bgs and flows west. Soil is brown fine to coarse sand with gravel. Weathered rock from 7 to 11 ft bgs. Bedrock at between 2 and 11 ft. 4 soil borings advanced and 4 soil samples collected. Soil results show only one impact of 1720 ppb MTBE. 4 temporary ground water wells installed into bedrock. Ground Water results in ppb: (2/7/02) MW1 - 5.67 benzene, 33.2 toluene, 10.2 ethylbenzene, 158 xylenes, 876 MTBE, 207 BTEX, 1236 VOCs MW3 - 5.49 toluene, 11.5 xylenes, 20 BTEX, 436 MTBE, 478 VOCs MW4 - 2.52 benzene, 6.59 xylenes, 493 MTBE, 12 BTEX, 528 VOCs MW5 - 239 MTBE RCRA Mettals - MW1 - 1800 ppb chromium, 7040 ppb barium, 2160 ppb lead (8/7/05) MW1 - 37.3 benzene, 292 MTBE, 39 BTEX, 335 VOCs MW3 - 239 L benzene, 10.5 toluene, 6.77 ethlybenzene, 5730 MTBE, 6020 VOCs MW4 - 19 benzene, 749 MTBE, 19 BTEX, 768 VOCs MW5 - 208 L MTBE UST Closure Report, AGS, January 2004. USTs, piping, dispensers removed Dec 03. Soil endpoint samples show now VOCS above SCOs. Some PAH exceedences. Ground water sample from excavation show 350 ppb benzene, 1300 ppb toluene, 200 ppb ethylbenzene, 1430 ppb xylenes, 21000 ppb MTBE, 3280 BTEX. EXcavated soil was used as backfill. Conclusions: the operation of this site as a gasoline service station has caused impact to the subsurface soils to warrant further environmental site assessment or action. Upon completion of rebuild activities, AGS on behalf of Gaseteria will prepare a subsurface investigation workplan for NYSDEC approval which will outline additional field activities to investigate and delineate the detected contaminants. UST Closure Report Addendum, AGS, September 2004. Remaining product supply piping under the concrete to the pump islands were removed to facilitate replacment with new BP piping. 5 soil samples were collected from 4-6 inches below the trench bottom. 1 sample was collected from under each of the four removed pump islands and 1 sample from adjacent to the Kiosk. Soil Results in PPB: P3 piping - 3680 xylene P4 piping - 2100 toluene, 300000 xylene, TOTAL VOCs : 977110 P5 piping - 50000 toluene, 91000 ethylbenzene, 318000 xylenes, TOTAL VOCs : 1247000 The data set indicates very high VOCs; however, the lack of benzene and low MTBE relative to overall concentration is not typical of gasoline. The elevated level of naphthalene may indicate diesel fuel; however, no corresponding SVOC's were detected . Upon completion of the rebuilding activities AGS will prepare a Subsurface Investigation Work Plan . 6/2/06 - Obligado - Reviewed subsurface investigation workplan. Proposes 4 monitoring wells to be installed into bedrock. 6/6/06 - Obligado - Sent email to Steve Muller approving workplan with minor adjustments to boring

locations. Due date for summary report is 8/8/06. 7/19/06 - Obligado - Meeting with Gaseteria, ASR, DEC on 7/19/06. Wells have been installed at the site. Gaseteria will submit a schedule for submission of work. 9/12/06 - Obligado - Emailed multi-site stipulation agreement to Gaseteria on 9/8/06. Sent original on 9/12/06. Due date for ISR according to DEC approved Corrective Action schedule is 11/1/*06. 10/31/06 - Obligado - Multi Site Stipulation executed by Oliva on 10/31/06 12/6/06 - Obligado - Review ISR, submitted by ASR, dated 10/31/06. 3 monitoring wells installed. MW1 was to turbid for sampling. MW2 and MW3 were both nondetect. Recommended 2 additional monitoring wells. I sent an email to Steve Muller requiring Supplemental Investigation Workplan for additional monitoring wells and MW1 redevelopment submission by 1/6/07. 2/7/07 - Obligado - Review SIWP. Proposes 2 additional wells in the sidewalk west of the site and redevelopment of MW1. Approve of workplan with modification to attempt to collect soil samples via HSA and split spoons prior to switching to air rotary. 3/7/07 - Obligado - Sent sidewalk opening letter to Steve Muller. 6/1/07 - Obligado - Received ISR via email. 7/27/07 - Obligado - Final summary report submitted. 2 additional wells were installed west of down gradient of tankfield. During installation, 1 soil sample was collected for lab analysis, no VOCs detected in this sample. Ground water samples were collected. MW1 through MW3 were all ND, MW4 and M5 had minor exceedences of TOGS. MW4 had 65 ppb total BTEX, MW5 had 42 total BTEX. The report requested closure due to low numbers. I had a meeting with JOe Sun to discuss this site. Agree to spill closure based on the following. 1) Relatively low concentrations, exceedences of TOGS for only 3-4 compounds in two wells. GW concentrations are significantly lower down those found in Delta baseline assessment, suggesting natural attenuation is occurring 2) No receptors immediately down gradient, immediately down gradient of the site is a major deegan expressway which is an 8 lane highway (including service roads). Downgradient of the highway, according to the ASR report are industrial/commercial buildings. 3) Sensitive receptor survey was previously completed by DElta in 2002. According to this survey, no potable wells within 1 mile. Nearest surface water body is harlem river, 375 ft west of the site. However, due to small size and very low concentrations of contamination in gw, plume emanating from this site most likely will not reach or impact this river. There is a residential building with basement to the south, however, southern most well MW1 was ND so plume does not pose a risk in this dieection. The Data from this site do not indicate potential adverse impacts to human health and the environment. This spill is closed. I emailed an NFA letter to Gaseteria. "

Remarks: "contaminated soil and groundwater found. Delta reported spill to DEC despite Gaseteria knowledge as of 8/5/2002."

FINDS:

Registry ID: 110004419497

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004405625

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 9/18/03 1107 Hrs DDO Sawyer talked to Keith Williams (917)513-5240 of DEP Industrial Water who was on the scene of the spill. He said the waste because of a clogged or backed up sewer system was dumping sewage waste into the street, to the sewers and on ground across from 2575 Sedgwick Avenue. The Va Hospital is responsible and is in the process of cleaning up the street and the sewer areas. The ground is only going to be cleaned up cosmetically. Since this is a reoccurring problem, Mr. Williams thinks subsurface

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT DEC Sigona contacted Hess at 12:15 left message for Raymond Soja requesting call back at 718-482-4651. Contacted Ms. Cabrera who said oil spilled into basement causing odors in the building. No response by oil company as of 12:15 PM. DEC Vought to perform field response. 4/4/2003-Vought-Site visit by Vought. Spill came out of vent pipe and also out of top of tank manway onto tank room floor. Spill is #4 fuel oil from 5000 gallon AST. Spill entered sump pit. Vought notified NYDEP (DEP#600189). Delivery company was T&S Trucking. Eastmond & Sons will be performing cleanup (powerwash sidewalk, basement, and sump pit). Tank room floor and walls sealed with epoxy with no pathways (cracks) to subsurface. Spill closed by Vought."

DEC Memo: "158715. 22-May-2005 13:40 hrs. Bx/West EH&S Sr. Specialist J. Feeney # 86854 reported that while observing crews working at Mh # 247 @ Landing Rd & Fordham Rd, in the Bronx. he discovered ~ 4 Ounces of motor oil had been spilled from a portable generator onto bluestone. There was/is no smoke, fire or injuries involved. There was/is no sewers, waterways or private property affected. Sr. Specialist J. Feeney # 86854 removed the affected area of bluestone and cleaned the fill port of the generator of any excess motor oil. Generated 1 bag of non-hazardous waste which he will take to temporary non hazardous waste bin at The Van Nest Service Center for disposal. Cleanup complete. R. Browne # 21646 Closed."
Remarks: "portable generator spilled 4 ounces of motor oil on blue stone. Spill cleaned up by Con Edison. Waste generated 1 bag of non hazardous waste. 158715."

DEC Memo: "e2mis no 157522 09-Mar-2005 09:51 D. Rohrer 12788 EH&S Manager W. Hedeman 84455 reported while on location for an inspection of the Bronx Cable House discovered 1 quart of cable leaked on concrete from wrapped leaking dead end cables. No sewers, waterways, or private property affected. Env tag 46304 was placed and a pcb sample was taken on EE04834. This is being made a reportable spill due to the planning involved for the cleanup between remediation and scheduling of feeder outages. 09-Mar-2005 10:09 D. Rohrer 12788 This spill was voided and replaced - this site-previously under WEDS-157522. Lab Sequence Number: 05-02079-001 - PCBs < 1 ppm (BRONX CABLE HOUSE - LANDING N/O FORDHAM) Sample were taken from the floor of structure at each wall. The source of oil is unknown due to multiple D Faults. Because the feeders are covered in arc proof tape it is difficult to determine if a feeder is leaking or if it was leaked on from a feeder above. Due to the D Faults it is unsafe to enter this structure until every feeder is properly identified and de-energized. Source is potentially several leaking joints, cables or cable ends. When the feeders are taken out of service for repairs and cleanup, each source will be sampled to determine the equipment responsible for the high PCB results. Engineering, the underground and EH&S are currently working on a plan to take out every feeder in this structure out of service to determine which sections contain D faults. During this outage the leaking sections will be replaced and the cleanup conducted. Lab Sequence Number: 05-03620-001 - TOTAL PCB 5718 ppm (FLOOR OF NORTH WALL) Lab Sequence Number: 05-03620-002 - TOTAL PCB 46 ppm (FLOOR OF SOUTH WALL) Lab Sequence Number: 05-03620-003 - TOTAL PCB 65 ppm (EAST FLOOR OF NORTHERLY WALL) Lab Sequence Number: 05-03620-004 - TOTAL PCB 12 ppm (EAST FLOOR OF SOUTHERLY WALL) Walter Hedeman 84455. 21-May-2005 19:30hrs. EH&S Sr. Spec. L. Fischer

BRONX CABLE HOUSE (Continued)

S106867089

reports that the initial cleanup is complete. All 'D' fault feeders were de-energized prior to work within the cable house at Fordham landing. All Arc proofing and spill roll flooring material carpet removed and barrelled. Floors and lower wall areas scrubbed twice with 760 soap and spread with speedy dry to absorb and shoveled into barrels. Floor areas were re-carpeted with spill roll and splicers were sent into the cable house with appropriate PPE to begin re-racking of feeders and addressment of 'D' faults. 10 barrels of PCB waste generated and transported to Van Nest Service center under a one-trip rule by tool room personnel. Once all work is complete the floors will be wiped by chem lab technicians for analysis to investigate if cleanup achieved acceptable clearance results. Note, sampling and final cleaning are on hold do to sensitivity of feeders and potential for large outage requiring splicing work to progress prior to wipe samples and analysis. C. Blaich 87348 31-May-2005 22:40 hrs. UG Env Mech A Esham Gafur 19528 reported cleanup of north east wall and north floor started at 16:30 and completed at 21:30 hours using speedi dri, simple green 460 degreaser generating 1 drum of oily haz for PCB waste to be returned to VNESC under 1 trip rule. Partial cleanup complete. 2 empty drums left outside door of cable house for cleanup tomorrow 15:00 shift. Rich Benkwitt 38373 01-Jun-2005 22:14 hrs. UG Env Mech A Esham Gafur 19258 reports south floor cleaned with speedi dri, simple green and 760 degreaser generating 1 drum of oily haz waste to be transported under 1 trip rule to Van Nest SC for proper disposal. Gate locked, tag in place and one empty unmarked drum left outside entrance door. Rich Benkwitt 38373 21-Jun-2005 16:41. Chem-Lab was cancelled due to the crew's vehicle breaking down as per Oper Superv C. D'Alisera 48339. D. Rohrer 12788 22-Jun-2005 18:00 hrs. Flush Mech, Esham Gafur (19528) will assist Astoria Chem Lab in taking 11 wipe samples. The corresponding numbers, 9-10-11-13-14-16-17-21-22-23-24. L Fischer 55784 27-June-2005 08:13 Hrs. All 11 wipes samples pass cleanup criteria, spill cleaned up, environmental tag has been removed. 10-samples were less than 1.0 ug/100cm², 1-samples was 1.2 ug/100cm². Environmental tag has been removed. J.Siesfeld 84253. Closed. 8-9-05. George Breen "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 1
Tank Id: 60254
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
F04 - Pipe External Protection - Fiberglass
L00 - Piping Leak Detection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
K00 - Spill Prevention - None
B01 - Tank External Protection - Painted/Asphalt Coating
H00 - Tank Leak Detection - None
C01 - Pipe Location - Aboveground
J00 - Dispenser - None
I05 - Overfill - Vent Whistle

Tank Location: 1
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1970
Capacity Gallons: 5000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FORHDHAM HILL (Continued)

U000404307

DEC Region: 2
DER Facility ID: 329538
DEC Memo: "04/18/07-Vought-Off hours responder. Vought responded to site and FDNY 19th Battalion (Captain Roach 718-430-0219) onsite. Spill occurred when #4 fuel oil was being transferred from one 25000-gallon #4 fuel oil UST to another. Spill was discovered at 5am. Spill inside building coming out of entry port of supply return lines into wall. Concrete in good condition in boiler room however sump affected. DEC notified by FDNY and arriving on-site. No odor complaints received to date. Site maintenance director is Gildardo Arvelaez (718-365-9659) and owner of site is Fordham Hill (Everton Moore 718-365-9600). Oil came out of AST manway flowed down soil hill and impacted sewer. As per petrometer, 4300 gallons in North tank and 20000 gallons in South Tank. Unable to determine spill amount as petrometers may not be working correctly. Spill amount approximated at 300-gallons. Eastmond arrived onsite and began cleanup. Eastmond hired by Fordham Hill. DEC requires: 1)submission of Eastmond invoices 2)collection of endpoint soil samples 3)petrometer repair replacement. Vought sent letter with above requirements and one month due date to owners as per PBS: Fordham Hill Owners 1 Fordham Hill Oval Bronx, NY 10468 Ph: 718-365-9600 Fax: 718-733-0472 05/18/07-Vought-Office visit by Gildardo Arvelaez who provided endpoint soil analyticals from Eastmond (eight soil samples were collected and showed no TAGM 4046 Soil Cleanup Objective Exceedences and provided letter from Fordam Hill stating that two new petrometers were installed. Arvelaez also provided invoices from Eastmond that included pressure washing of basement and cleaning of three sump pits. Spill closed by Vought and NFA provided to Arvelaez."

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

with existing borings/wells and tank locations. A site visit will be arranged. AZ 3-17-2009 An e-mail was sent to Jane Staten (URS): What's the status of this spill? I do not have any updates since 2007. AZ 3-17-2008 J. Staten replied that she contacted Mike Murphy, DSNY, about this spill number. URS wants to make sure which tank the spill report is referring to before they spend the money for an investigation. AZ Michael R. Murphy NYC Department of Sanitation Facilities & Equipment 125 Worth Street, Room 823B New York, N.Y. 10013 (T) 646-885-4876 (C) 646-235-3041 (E) mrmurphy@dny.nyc.gov 9-2-09 URS in their report dated April 24-09 stated that they continue to research spill #9705837. AZ 1-11-10 Reviewed free product recovery and groundwater monitoring data for the period April through June 2009. VOCs were detected in wells LMW-09 and LMW-11 ranging from 1,530 ppb to 1,017 ppb respectively. Contaminant concentrations increased in a couple of wells this quarter. AZ 4-5-2010 Reviewed a URS's report dated February 1, 2010. No free product has been detected at the site in over six months. URS will reduce the frequency of the product recovery visits from monthly to quarterly. VOC concentrations ranged from 6 ppb to 350 ppb. AZ 6-3-2011 An e-mail was sent to K. Shenahan: Dear Kevin, I have reviewed a report covering the period of October - December 2010 and dated April 28, 2010. The report provided a table with bulk storage records. This table indicated that a number of discrepancies exist between the URS records and the current PBS records including contents, status and capacity of tanks. A field inspection should be performed by URS. A reconciliation of existing tanks, past site plans, tank closure reports and NYSDEC's PBS registry data should be performed. URS should verify how many USTs were historically present and/or may still be located on site. Size, status (active/closed in place/removed) and contents of the existing/closed in place/removed tanks should be confirmed. Corrected detailed information should be reported to the DEC PBS Section and included in next monitoring report. AZ 11-7-2011 An email was sent to URS (Kevin Shenahan): Dear Kevin, I have reviewed a report covering the period of January - March 2011 and dated July 28, 2011. The report provided a table with bulk storage records. This table indicated that a number of discrepancies exist between the URS records and the current PBS records including contents, status and capacity of tanks. During a recent site visit, URS confirmed the accuracy of the status of several tanks. However, the status of many tanks is still unknown. The tank status should be finalized in the next monitoring report. Corrected detailed information should be reported to the DEC PBS Section. Sincerely, Alexander Zhitomirsky Engineering Geologist 2 NYSDEC Region 2 Division of Environmental Remediation AZ 7-31-2012 The following e-mail was sent to URS/V. Brevdo/M. Asbagh: Dear Kevin, I have received a groundwater monitoring data report for the first quarter 2012 and dated May 1, 2012. This report evaluated criteria for closure of spill #9705837. According to the report, the source of contamination was at Tank Area 4 and 5, which contained a 2,000-gallon gasoline UST (Area 4) and 1,000-gallon waste oil UST (Area 5). The tanks in Area 4 were removed in 1994 and the tank in Area 5 was replaced in 2000. However, spill report #9705837 states that spill #9705837 was reported when 5,000-gallon #2 fuel tank failed the test. This discrepancy should be resolved. Sincerely, Alexander Zhitomirsky Engineering Geologist 2 NYSDEC Region 2 Division of Environmental Remediation AZ 3/15/2013 Reviewed report dated 10-11-2012. The report requested that this spill number is

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued)

S102659627

transferred to Manhattan West 8 site. This spill is already attributed to Manhattan West 8 site. AZ 5/28/2013 Reviewed a proposed Work Plan dated February 20, 2013. Discussed the site with K. Shenahan over the phone. An e-mail was sent to K. Shenahan/V. brevdo/M. Asbagh: Dear Kevin, I have reviewed a Work Plan for the above site dated February 20, 2013. The Work Plan calls for investigation of a 5,000 gallon UST which failed a tightness test. This tank was presumably closed in place. The Work Plan submitted by URS is conditionally approved. URS should proceed with a geophysical survey of the designated areas. However, the Work Plan has not recommended any investigation of the piping and fill port associated with this UST. Also, only one well was recommended for installation. If soil contamination is encountered, three monitoring wells should be installed. After geophysical survey is completed, a map with the proposed soil boring locations should be submitted to DEC. The Work Plan should be modified to reflect the above mentioned comments and submitted to DEC. Sincerely, Alex Zhitomirsky 5-28-2013 E-mail from K. Shenahan: Alex, Thanks for the conditional approval. We will send you the results of the geophysical investigation and review the best locations for borings and wells. In addition, we will include investigation of remote fill and piping to the extent feasible. This will also be reviewed with you prior to drilling. Kevin J. Shanahan 7-29-2013 Contacted Kevin Shenahan. The geophysical showed potentially 3 USTs. A lot of potential piping was discovered. Nothing has been done at the site before. There two options: 1. Sample soil and ground water and if contamination is found, excavate the tanks and piping, if feasible. 2. Excavate the tanks and piping if feasible. Kevin will contact DDC and look for their input. AZ 8-6-2013 The following e-mail was received from K. Shenahan (URS): Alex, As you requested, URS is re-issuing this e-mail documenting the boring locations and plan to install groundwater monitoring wells in accordance with the approved March 8, 2013 Work Plan. A total of 15 borings are proposed. If petroleum contamination is encountered, we will install at three groundwater monitoring wells around each tank and sample groundwater. We will also install additional wells as necessary to delineate the extent of free product or dissolved phase contamination. We have also attached the geophysical survey report for your files. Thanks, Kevin J. Shanahan 8-13-2013 The following e-mail was sent to K. Shenahan/V. Brevdo/M. Asbagh/H. Roberts: Dear Kevin, I have reviewed a modified Work Plan to install soil borings and groundwater monitoring wells. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Sincerely, Alexander Zhitomirsky 4-10-2014 The following e-mail was sent to K. Shenahan and V. Brevdo: Dear Kevin, I have reviewed an Investigation Summary and Remedial Plan for the above site. The Remedial Plan for this site proposed removal of tank#008 and any remaining piping within the footprint of the excavation. Also, limited soil excavation will be performed. I concur with this Work Plan. Former fill port should be located and excavated, if feasible. Post excavation samples should be taken. URS should include proposed number and locations of the post excavation samples in the Design Analysis Report. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Sincerely, Alexander Zhitomirsky 9-19-2014 An e-mail was sent to K. Shenahan/V. Brevdo: Dear Kevin, I have reviewed a Design Analysis Report (DAR) for this site received on July 1, 2014. DAR proposed removal of tank#008 and any remaining piping within the footprint of the

MAP FINDINGS

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued)

S102659627

excavation. Also, limited soil excavation and additional investigation will be performed. I concur with these proposals. Former fill port should be located and excavated, if feasible. Post excavation samples should be taken. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on and off site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alexander Zhitomirsky 10-13-2015 Reviewed a monitoring report through the Third Quarter of 2015, and dated December 19, 2014. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. Free phase product is found in one well at the site. URS will implement the proposed supplemental investigation. AZ 3-9-2016 Reviewed a monitoring report through the Fourth Quarter of 2014 and the first Quarter 2015, and dated June 5, 2015. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. URS will excavate test pits and collect other information to verify that excavation of the tank is feasible, and to collect information necessary for the final design of the tank removal. AZ 5-9-2016 Reviewed a monitoring report through the second Quarter of 2015, and dated October 20, 2015. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. URS will excavate test pits and collect other information to verify that excavation of the tank is feasible, and to collect information necessary for the final design of the tank removal. The dissolved phase contamination and the free product are found only in the immediate area surrounding Tank No. 8. AZ 8-15-2016 Reviewed a monitoring report through the third and fourth Quarters of 2015, and dated January 8, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. A test pit was excavated in June 2015 near Tank No.008. Piping was encountered pocket of stained soil was encountered. PID readings were elevated but there were no exceedances in three soil samples. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. The dissolved phase contamination and the free product are

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004442336

Environmental Interest/Information System
COMPLIANCE AND EMISSIONS REPORTING

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "11/2/05: This spill transferred from J.Kolleeny to S.Kraszewski. Refer to previous spill #9613005. 01/13/06: According to a letter sent in May 2003 by DEC, a Field Investigation was supposed to take place to satisfy the closure and removal of two 28K tanks. This spill seems to be the beginning work for this investigation but it seemed to be halted. Mentioned in the NYCHA spill report, the boring encountered what was initially thought to be contamination but was soon identified as coal ash fill material. No documentation of the field investigation report. Need to know if it was ever completed.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 18681
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
G00 - Tank Secondary Containment - None
L09 - Piping Leak Detection - Exempt Suction Piping
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None
C00 - Pipe Location - No Piping
I04 - Overfill - Product Level Gauge (A/G)
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
F00 - Pipe External Protection - None

Tank Location: 1
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 02/01/1927
Capacity Gallons: 3000

FINDS:

Registry ID: 110069646663

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DER Facility ID: 462828
DEC Memo: "5/26/15: Mahat DEC Mahat left a phone message to Mr. Isuf Celaj (718.882.8116) inquiring to follow up with the repair and retest. 6/11/15: Mahat DEC Mahat received an email from Renae Lewis (Retained Contractor) who performed the TT. Report has been uploaded on D2 for reference. Tank- Passed Fill- Passed Suction- Passed Return - Passed Vent - Passed with comporessin vent alarm removed. Renae will perfrom further repair and a completed report will be provided to the Department for a closure. 6/19/15: Mahat DEC Mahat received a call from Renae and he mentioned that tank has passed the pressure test once he removed the vent alarm. A complete closure reprot will be submitted to the Department for a closure. DEC Mahat received an email with the passing TT result. Tank will be removed from the site. and new tank will be instlled on site with smaller capacity. Based on the phone conversation and reprot, Department does not warrant any further investigation on the site. Hence, the spill case is closed in NYSDEC Spill Database. "
Remarks: "5000 gal tank."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:

Program: BCP
 Site Code: 529560
 Acres: 1.64
 HW Code: C231102
 SWIS: 3101
 Town: New York City
 Record Added Date: 06/30/2016
 Record Updated Date: 08/29/2016
 Update By: SRHEIGEL
 Site Description:

**Actual:
 14 ft.**

Location: The Site is located at the northeast corner of the intersection of 207th Street and 9th Avenue, in the Inwood section of Manhattan, City of New York, and State of New York. According to the New York City tax maps, the BCP Site is bounded by Ninth Avenue to its west, West 207th Street/University Heights Bridge approach to the south, West 208th Street to the north (mapped but not built street), and Exterior Street to the east (mapped but not built street). Beyond the Site boundary to the east and to the north the land is a natural wooded riparian area bounded by the Harlem River and North Cove, respectively. Site Features: Currently, the entire Site is an asphalt-paved lot used for parking. There is a parking attendant trailer in the northwestern corner of the parking lot, and the parking lot is surrounded by a chain link fence. Current Zoning and Land Use: The current zoning for the BCP Site is M1-1, which allows for light industrial uses. According to the NYC Department of Planning, offices, hotels and most retail uses are also permitted within M1-1 districts. The nearest residential properties are located approximately 500 feet northwest of the BCP Site. Surrounding land uses located immediately adjacent to the property include a New York City Transit rail yard and office building, a gas station, a parking

S118950501

facility and a food and beverage commercial store. Other land uses within the Site vicinity include: light commercial facilities, places of worship, multi-family housing, and a school. Past Use of the Site: The BCP Site was historically used for: auto repair and sales shop, auto wrecking, houseboat mooring, trailer parking, dumping and vacant land. Undocumented underground storage tanks may be present in the southwest section of Lot 1 associated with the auto repair and auto wrecking shops that were present from 1930s to at least the 1950s. The eastern portion of the property was part of the Harlem River until filling activities occurred between 1951 and 1968. The fill material was of unknown origin and the former Harlem River bed may contain hazardous materials. Site Geology & Hydrogeology: The Site is generally characterized by historic fill from ground surface to a depth of approximately 10 feet below land surface (bls) consisting of anthropogenic materials such as brick, concrete, ash, plastic and wood with intermittent sandy and/or gravely silt and silty sand layers. Silty clay, clay and vegetative matter (peat) was observed in several borings at depths ranging between 10.5 to 12.5 feet bls, consistent with the historical river and associated wetlands. The Site soils are reclassified as urban land, tidal marsh substratum (UmA), 0-3 percent slopes and urban land, reclaimed substratum, 0-3 percent slopes (UrA). The geology in the area of the Site consists primarily of metamorphic rock and bedrock consists of Cambrian-Ordovician Inwood Marble (USGS). Bedrock was not encountered during the AKRF Phase II investigation. The average depth to groundwater is 9.3 feet bls and the range in depth is 7.5 to 11.0 feet bls. Groundwater flow most likely flows in a northeasterly or southeasterly direction toward the Harlem River and it may be tidally influenced given the proximity to the Harlem River.

Env Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 200203
DEC Memo: "06/14/2007: This spill case was transferred to A. Doronova. AD 06/19/2007: Reviewed Tank Closure report. It states that: On July 16, 2003 one 3,000 gallon fuel oil UST was permanently abandoned in-place at the Harlem River Bridge site. It is DDC site. Visual inspection of the tank reveled no evidence of leakage. Since the tank was closed in place, post tank closure soil samples were not collected. However four soil borings, SB-01 through SB-04, were performed adjacent to UST on August 11, 2003. Analytical results of sampling revealed the presence of residual concentrations of VOCs in two of the four samples and SVOCs in one of the four samples, all at concentrations below ASCs (Allowable Soil Concentration). Based on the data consultant (Shaw) requested NFA for this spill. In lab data method detection limit is elevated and varies all the time for the same compound depending of the soil boring. Have to ask J. Kolleeny. AD Sent an email to A. Samani (DDC) with the request for additional soil and groundwater investigation in the vicinity of the closed in-place fuel oil UST. (cc: J. Kolleeny; T. Ahmad; J. Staten and H. Roberts). AD 09/17/2007: Received Additional Site Subsurface Investigation Work Plan dated September 17, 2007, submitted by URS. The plan proposes installation of two monitoring wells on the eastern and western sides of abandoned in-place UST. It states that monitoring wells cannot be installed north and south of the USt, because West 206th Street and a existing building located immediately north and south of the UST. URC proposes to collect soil and groundwater samples and analyze them for VOCs and SVOCs. Monitoring wells also will be surveyed for location and elevation. According to the Tank Closure Report, submitted by Shaw earlier, four soil borings were advanced around the fuel oil UST for collecting end-point samples. Soil samples from borings on the northern and southern sides of the UST indicated elevated concentrations of SVOCs. This data indicates, that installation of monitoring wells to the north and south of UST is feasible. Have to speak to J. Staten of URS. AD 09/27/2007: Spoke with J. Staten regarding feasibility of installation of the wells on the northern and southern sides of UST. She said that it involves obtaining a street permit, traffic plan and other procedures. I asked, if it possible to relocate MW-01 close to the UST. I sent a Figure 3 with indication of new location of MW-01 to Jane by fax. AD 12/17/2007: Received Field Investigation Summary and Request for Spill Closure from URS. The summary states that on October 16, 2007 two monitoring wells were installed at the approved locations. Two soil samples were collected from each well borehole at 3 to 5 feet bgs and 7 to 9 feet bgs. The analytical data indicated presence of trace levels of VOCs and SVOCs at concentrations below TAGM #4046 soil guidance values. On November 14, 2007, groundwater samples were collected from wells

Remarks: MW-01 and MW-02. According to labresults, presence of any VOCs or SVOCs were not detected in the sampled groundwater. Based on the data, URS recommended closure of the spill case. AD 12/18/2007: Spoke with J. Kolleeny regarding this site. Sent a No Further Action letter to A. Samani (cc: J.Kolleeny; M.Asbagh; H.Roberts and J.Staten). PDF version is in eDocs. AD "gross failure."

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110009462312

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

DER Facility ID: 369389
DEC Memo: "5/17/16-Zhune spoke to Isabel Potter from NYC Transit 646-252-5777. Isabel said the tank fail the test with a dry leak. Sprague will repair the tank. 5/20/16 aTTF letter sent to: NYCT Attention: Francine Ocampo 2 Broadway Floor 27 New York, NY 10004 Spill assigned to Rashad Omar (runner). 5/20/2016: Rashad 4065 10th Avenue has alternate addresses of 4056 9th Avenue, 4065-4079 10th Avenue, and 400-450 West 218th Street. Various other spills exist for this site. PBS 2-190209. Sent email to Francine: Just to let you know, I was also additionally assigned a spill that was called in on Tuesday May 17th, spill#1601622 (PBS# 2-190209) for the Kingsbridge Bus Depot. Thanks, have a nice weekend. 7/7/2016: Rashad Received email from Francine: Please find attached the formal request for closure of Spill #1601622, Kingsbridge Depot, DSL-1 sump failure. If you require any additional information please contact me directly, 646-252-5768. Attached to email was closure report, it has been uploaded to D2. Review of letter is as follows: On May 17th 2016 a hydrostatic test of the sump for the fill port of DSL-1 was tested and failed. The tank was taken temporarily out of service, the assessment indicated one of the pipe penetrations was found to be not tight . The sump was repaired and retested on June 29th and July 1st, the tank is now tight and passed the hydrostatic testing. Spill will be closed as no spill occurred, repairs made, and passing tightness test was conducted."
Remarks: "fill pump failed test. No product loss, tightness test"

DEC Memo:

"Liro Construction is installing a sewer line for NYC-DDC project - While digging a trench in front of an existing gas station (401 West 207th st) they found weathered petroleum contaminated soil. Sangesland asked Mr. Frank to confirm that the contaminated soil was NOT dumped back into the trench after the new line was installed. Mr. Frank will confirm and call back. Apparently there is already an open spill for the gas station at this location. 4/23/07 - Carlson - Received email from Steve Frank at Liro Engineering : The trench was excavated to install a new water line. Trench length is more than 100 ' but the affected area is only about 10' wide. The trench is about 10' deep there. The contractor reported that nothing unusual was noticed in the soil when the trench was dug and that no liquid was in the trench when excavated. The substance in the trench was not noticed until after the big rainstorm. We inspected the fluid Weds. AM, collected a sample and called the hotline as it smelled and looked like a petroleum product to us. The trench is still open and the Contractor does not intend to backfill with the soil that was removed from the trench. Received laboratory results of sample. DEC Carlson performed site inspection. The sewer line is being installed at approximately 8 ft below grade. One portion about 10ft long is contains water and floating product. This portion is directly downgradient of the Hess station. The portion with water and product is greater than 8 ft deep, and will have a concrete box and manhole around it. The construction operator reported seeing soil staining when groundwater was encountered at approximately 8 ft below grade. Met with the engineer on site Attef Farag (phone 973-623-2999, email afarag@kseng.com). Met with Hess's consultant, Jonathan Curran from Delta. Tim Fisher from Delta will be managing this incident. I indicated to Attef Farag that the water in the excavation will need to pumped out and properly disposed of. 05/14/07-Vought-Called Farag for update on trench installation and to notify him that spill will be closed and referred to Hess open spill at adjacent site. Vought left message for Farag to return call to DEC. 05/16/07-Vought-Called Farag for update as no call received and told to call 718-424-4157. Vought called Steve Frank (Liro) and left message to return call to DEC and will provide him with contact info for DEC Carlson and Hess (who will be managing remediation of source site). 06/21/07-Vought-Called Frank (718)321-3136x236 for update and left message that case will be closed and referred to open spill for source Hess Station located at 401W207th Street (spill #0201597). Spill closed by Vought."

Remarks: from VA: Given the age of the case (April 7, 1994) this documentation will be provided as quickly as possible and I will continue to update you by phone and/or by e-mail. 1/18/2013 Sangesland reviewed a package of information from Elaina Jones from the VA Medical Center. Documents (see eDocs) show Eastmond dug out and removed 8 USTs from the property (all buried tanks) and reinstalled several new fiberglass tanks during 1998 & 1999. The tank/s associated with this TTF has been removed. Spill case closed out."

Site ID: 336646
Spill Number/Closed Date: 0411453 / 2005-06-17
Spill Date: 2005-01-24
Spill Cause: Tank Overfill
Spill Source: Institutional, Educational, Gov., Other
Spill Class: Known release that creates potential for fire or hazard. (Highly Improbable)
Cleanup Ceased: Not reported
Cleanup Meets Standard: True
SWIS: 0301
Investigator: JMKRIMGO
Referred To: Not reported
Reported to Dept: 2005-01-24
CID: 444
Water Affected: Not reported
Spill Notifier: Other

DEC Region: 2
DER Facility ID: 259550
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 2-275 GALLONS ASTs show missing fuel oil during building renovation. Bayside is not servicing this building at this time. Unknown if oil was drained to sewer or stolen. AJS. 11/27/02. J.Krimgold spoke to Mary Langevin (718) 562-9427, the homeowner. The 4 story brownstone building has 2x275 gal tanks located in the basement. On November 25, 2002 oil was delivered to the building by Bayside Fuel, however, on November 27 she have found that the tanks are empty. She will contact her insurance co. and Milro (recommended by Bayside Fuel) to perform a cleanup. 11/29/02. J. Krimgold spoke to Mary Langevin. She informed that her insurance co. is not covering the cost of environmental cleanup. She will use her own funds to hire a contractor. She is currently negotiating with Miro as a potential contractor. 12/03/02. J. Krimgold spoke to Paul Basso (Milro). Milro went to the side and confirmed that tanks are empty, the bottom of one tank is porous and might developed a leak. There is a hall in the concrete floor in the vicinity of tanks, with evidence of oil in it. Paul B. also informed that a bedrock was found about one foot bellow the floor. Milro is planning to begin excavation on 12/5/02. 12/9/02. J. Krimgold @ site. Spoke to Steve Gordon (Trade Winds Env.) which

was hired by the homeowner to do the job. 2x275 gal tanks, contaminated concrete and soil was removed from the tank room. However, oil probably escaped through a fractured bedrock, which was found under the tank room floor. Based on the amount of oil left in the tanks, it was assumed that about 200 gal was lost, and not recoverable at this time. It was agreed that Trade Winds will apply bio-solution into bedrock fractures in hope to contain and biodegrade the oil. Trade Winds should follow with a report upon completion of bio-injection. 04/07/03. Spoke to Steve Gordon he should submit a report in two- three days. 05/05/03. Krimgold. Mary Langevin - homeowner called DEC and requested a spill closure letter. I explained that the case will be closed only after DEC receipt of the remedial report and a Non-Haz. Manifest. 08/18/03. Trade-Winds submitted remedial report and Non - Haz. manifest. NFA is required. YK."

DEC Memo: "need to trace property manager and send TTF letter 8/24/06 ttf letter sent today. bf 4/20/11 sent 2nd ttf letter. bf 2/8/12 PBS settlement conference scheduled for today. Plan is to hand deliver and explain what needs to be done to close the case. Case may be referred to General Counsel. I was informed by General Counsel that I need to open a separate case for the spill. This is the second PBS case with this facility and the spill was not addressed in the earlier case. That being said, I am going to send one more letter giving a final ultimatum to the respondent to resolve the case immediately or the case will be referred to General Counsel. bf 3/1/12 On 2/17/12, sent ttf letter to: Eugene Holland WK Nursing Home 100 West Kingsbridge Road Bronx, NY 10468 Letter allows ten days to resolve the issue. Entry to database was not made until today when I realized that I already sent the letter. bf 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 3/18/14-DEC Piper received and reviewed sub surface investigation report for spill 1309050 at same location. See report in spill 1309050. Passing tightness test could not be performed from 06 so a subsurface investigation was required. No contamination found. Fill line was replaced in 2006 and passed tightness in 2012. Based on findings, this spill is closed, no further action is warranted. See edoc if warranted for spill 1309050 "
Remarks: "PBS No: 2-602769 REMOTE FILL LINE."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN 06/16/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang. 06/21/2012 Spoke with Heather Sonnenberg of J.R. Holzmacher P.E., LLC, Consulting Engineers Tel: 631-234-2220. Ms. Sonnenberg is a consultant for Jewish Home for VCP project, however, she stated she does not deal with spills and gave me number for Ms. Rosa Cardona of Jewish Home (718-933-1501), stating Ms. Cardona would be the right person to speak to or she would refer me to right persons. Brevdo 06/22/2012 - Brevdo Brevdo's December 2, 1998 letter commenting on the RAWP for VCP site located at 2614 University Avenue seems to have been placed into e-docs for this site erroneously. 100 West Kingsbride Rd. and 2614 University Avenue are two different buildings at two intersecting streets. Brevdo. 06/22/2012 - Brevdo. Left message on Ms. Roda Cordona's (Jewish Home) voice mail ((718-933-1501) explaining that DEC has an open spill case at 100 West Kingsbridge Road and I want to discuss this with her. Left my number on Ms. Cardona's voice mail. Brevdo 06/22/2012 - Brevdo. Called and spoke with Neil Tomasetti of Al Eastman (718)-378-300 a company which removed the tank in 1997 and representative of which on

site noticed contaminated soil around the removed UST, and reported spill to DEC. Mr. Tomasetti stated that his company does not have any records regarding this UST removal case or spill case because 1997 is too old and they can not keep files that old. Mr. Tomasetti confirmed that Al Eastman, when removing UST and having encountered contaminated soil associated with removed UST, always and definitely remove such contaminated soil. Mr. Tomasetti expressed confidence that contaminated soil was removed in this case just like it would be removed at any UST removal where contaminated soil was encountered, that removed soil was tested and disposed off appropriately according to NYS regulations. Given that this is very old spill and no information or sampling data is available, and taking Mr. Tomasetti's explanation into account, it is appropriate to close this spill case.

Remarks:

Brevdo 06/26/2012 - Spill is closed effective 06/26/2012. Brevdo "TANK REMOVER STATES WHILE REMOVING TANK CONTAMINATED SOIL WAS DICOVERED. CONTACT BY CELL PHONE 917-771-6872"

DEC Memo: "03/11/11-Hiralkumar Patel. 2:19 PM:- spoke with Christie at ATS. she mentioned that property manager is looking for contractor to fix tank system and then ATS will go back for retesting. 2:22 PM:- left message for Evan Robert, property manager. alternate address: none no other spills. no PBS record. A & R Unity Mgt. LLC. **property owner** 36 East 37th Street New York, NY 10018 Attn.: Evan Robert **property owner** Ph. (212) 695-3510 Fax (212) 643-2061 email: evanrobertap@aol.com 03/14/11-Hiralkumar Patel. 12:59 PM:- left message for Evan Robert. 1:07 PM:- received call from Mr. Robert. asked him to conduct an isolation test or pump out tank by end of tomorrow to avoid any further release. 1:50 PM:- spoke with John at ATS. he mentioned that site has 1,000 gal tank. 2:04 PM:- sent TTF letter to Mr. Robert requiring isolation test. letter emailed to Mr. Robert. asked Mr. Robert to submit isolation test result by 9 AM on 03/16/11. 03/16/11-Hiralkumar Patel. 11:23 AM:- received call from Mr. Robert. he is still waiting for cost proposal for isolation test. during conversation, he mentioned that tank is aboveground. informed him that if tank is completely visible (including bottom) and there is no leak from tank bottom and lines to/from boiler are running aboveground with no leak, then no need for isolation test. but there should be no more oil deliveries until the tank system is fixed and tested tight again. informed him that if there is leak found in fill line and if portion of fill line is underground, then further investigation is needed. Mr. Robert will call back after talking to his super to confirm that tank is completely aboveground and not wrap with concrete. 03/17/11-Hiralkumar Patel. 10:28 AM:- received call from Daniel from DD Contracting, company hired to do tank repairs. Daniel is on site right now. he mentioned that site has 1,000 gal tank completely wrapped in concrete. he was told to fix the epoxy patch on top of tank. as per Daniel, during tank cleaning, contractor broke part of concrete wrap on top and cut hole in tank. after cleaning, tank cut was patched (approx. 15 inches by 13 inches). Daniel was told that during pressure test, air was coming out of this patch on top. Daniel observed five weep holes on concrete wrap and no sign of oil release from these weep holes. he did not see any sign of any oil release from the patch also. fill line runs aboveground and fill port is located on the building foundation wall. no sign of oil release found on foundation wall where fill line enters into building. supply/return lines runs aboveground, wrapped in concrete, along the basement floor. Daniel DD Contracting Ph. (646) 321-2646 03/21/11-Hiralkumar Patel. letter sent to Mr. Robert came back undelivered. 4:15 PM:- spoke with Daniel. he has finished repair and waiting for re-testing. he will call once retesting is scheduled. 03/24/11-Hiralkumar Patel. 3:41 PM:- sent email to Mr. Robert requiring to submit result of retesting of tank system. 03/29/11-Hiralkumar Patel. 11:54 AM:- spoke with operator at Mr. Robert's office. she mentioned that ATS went for retesting but

IN THE BASEMENT (Continued)

S110769618

required more repair. technician is on-site today for repair. she will ask technician to call. 12:25 PM:- received message from Daniel. 2:42 PM:- left message for Daniel. 4:18 PM:- received call from Daniel. he mentioned that tank system failed again after some repair. 4:22 PM:- spoke with Mr. Robert and Daniel. asked Mr. Robert to either prove that tank/supply/return lines are not leaking (by having isolation test of these parts) or pump out tank until the system is tested tight. also asked Mr. Robert to seal the fill port to prevent any more oil deliveries. told Mr. Robert that if required document is not submitted by end of tomorrow, case will be referred to legal. 03/30/11-Hiralkumar Patel. 10:30 AM:- visited site. met Daniel. site occupies by a five story building with a basement. a 1,000 gal AST is completely wrapped in concrete. tank is about 4.5 ft away from the boiler. all the lines running aboveground except about 4 ft of supply/return lines covered with concrete on top of boiler room floor (area between the tank and boiler). fill and vent line cross the foundation wall and then fill line runs aboveground to building line (about 4 ft from foundation wall). found old supply (or return) line connected to the tank. found open end of old fill line in building foundation wall where the current fill line enters into the building. five weep holes at the bottom of concrete wrap. no oil found seeping out of these weep holes. gauge was not working. Daniel mentioned that after they repair the patch on tank top, tank system failed again. so now they have to remove the old patch and fix it. super mentioned that about 600 gal oil delivered yesterday. 1:45 PM:- left message for Mr. Robert. 04/15/11-Hiralkumar Patel. 3:26 PM:- left message for Daniel inquiring updates. 05/26/11-Hiralkumar Patel. 1:30 PM:- left message for Mr. Robert. 1:36 PM:- received message from Shin, from Mr. Robert's office. 06/06/11-Hiralkumar Patel. 4:33 PM:- spoke with Mr. Robert and he mentioned that all work has been completed. spoke with Shin, Mr. Robert's assistance. she mentioned that tank passed the test. asked her to submit a statement (or invoice) from contractor including reason for tank test failure, repair done, any contamination during repair or not and passing tank test result. asked her to submit documents by end of 06/08/11. 4:40 PM:- sent email to Mr. Robert and asked him to submit spill closure report by the end of 06/08/11. 06/07/11-Hiralkumar Patel. 2:12 PM:- received email from Mr. Robert including copy of invoice. as per invoice from DD Contracting, they replace leaking epoxy patch on oil tank with fiberglass resin patch. 06/09/11-Hiralkumar Patel. 11:44 AM:- sent email to Mr. Robert and asked him to send letter report from contractor including following: - cause of tank system failure - type of repair done - any contamination found during repair or not - results of tank system test performed after repair done asked him to submit documents by 06/13/11 - final notice. 08/05/11-Hiralkumar Patel. 11:24 AM:- spoke with Shin. she has access to Mr. Robert's email account and she mentioned that they did not received email dated 06/09/11. informed her that email will be resent. asked her to submit report as per the email, by the end of 08/09/11. 11:28 AM:- sent email to Shin (at Mr. Robert's email address) requiring to submit report by 08/09/11. 11:30 AM:- spoke with Shin. she confirmed that she received the email and will send document by 08/09/11. 08/11/11-Hiralkumar Patel. 4:29 PM:- received email from Shin including letter from DD Contracting. as per Daniel from DD Contracting, tank system failed a test due to a faulty epoxy patch located towards teh top of the tank. the epoxy was completely removed and a new resin patch was applied. no contamination found during

repair. as per Daniel, tank was pressure tested and passed.
 08/15/11-Hiralkumar Patel. 2:33 PM:- spoke with Shin and asked her to submit tank system test result. 4:09 PM:- received email from Shin including tank pressure test result. result is not acceptable as includes tight tank and no information about system test.
 08/19/11-Hiralkumar Patel. 11:50 AM:- spoke with Shin and informed her that tightness test must be performed for entire system. she will call ATS, who performed test, for corrected result. 12:35 PM:- received email from Shin. she mentioned that Kristi Clune from ATS environmental will send tank test result. Kristi Clune ATS Environmental Ph. (800) 440-8265 Ext. 107 Email: kristi@atsenvironmental.com 12:36 PM:- spoke with Kirsti. she mentioned that they tested entire tank system. asked her to submit test result that shows tank system is tight. 1:16 PM:- received tank test result from Kristi. based on available information, case closed. **also see spill #: 1012134 as same managment and tank test failure.**"

 DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN Tank is a 25,000 gallon single wall steel UST in area of loading dock behind kitchen. Return line on north side of tank failed and was replaced with double walled piping by Eastmond. Eastmond also removed approx. 40 cubic yards of contaminated soil and vac'd out soil water mixture due to rain in the excavation. No sub-basements or sumps in area of tank. According to Wilson, groundwater is not a problem here. Top of tank asphalted, parking lot drainage adjacent to tank."
 Remarks: "RETURN LINE ABOVE OIL TANK IS LEAKING INTO THE OIL VAULT - PINHOLE LEAK - CALLER HAD 200 LBS OF OIL PUMPED OUT."

hired his company. But Geotrans hired North East Environmental Company, New York to pull the tank. When tank was pulled by North East Environmental Company. Geotrans checked and did not find any product to excavate. Mr. Rodger Riersen will fax me all the documents including soil sample report to close the spill. -QA 02/16/07: Called Mr. Rodger Riersen (Geotrans) at (908)534-2303 he was not in the office. Left message to call me back regarding spill. Discussed with Mr. Rodger Riersen regarding spill to make borings around the tank, to evaluate contamination of soil. -QA 03/01/07: Talked to Mr. Roger Riersen (Impact Environmental) to find out the contact number of Petro Co. to clear this point where they have changed the line and where they have found the soil contamination. Also asked that to send diagram showing fill port to tank and tank to boiler. These things should be cleared, Impact Environmental has to do borings around that to confirm the soil contamination. -QA 03/01/07: Called Mr. Roger Riersen to discuss regarding soil contamination and to find out the contact number of Petro Co. Where they change the line and where they found the soil contamination. Mr. Roger will be available on Monday March 5, 2007. I left message to call me back to discuss regarding this spill. -QA 03/14/07: Received a package from Mr. Roger Riersen, staff Geologist (GeoTrans, Inc.) on March 14. Reviewed the report based on his discussion with Mr. Reiner Ober, it is likely that historical references to contaminated soil were due to assumptions that were never confirmed by direct observation or laboratory analysis. Petro was never contracted to remove the pipeline and therefore no confirmation of the contaminated soil was ever conducted prior to tank removal activities. Furthermore, no contaminated soil was observed during the removal of the UST and associated pipes on January 10, 2007. GeoTrans inspected the area on March 6, 2007, demonstrates that the former leaking pipe ran through the basement stairwell and no petroleum or soil is present on the exterior wall or foundation where the former leaking pipe was located. On the basis of information provided by GeoTrans and by the approval of Mr. Jon Kolleeny (Supervisor) this spill is closed. -QA"

ENG CONTROLS:

Site Code: 57987
HW Code: V00181
Control Code: 15
Control Type: ENG
Date Record Added: 08/05/2008
Date Rec Updated: 10/31/2014
Updated By: SRHEIGEL
Site Description:

Location: The site is located in an urban area in Bronx County. The site encompasses about 0.5 acres and is located at 2614 and 2620 University Avenue, Bronx County, Block 3215, Lot 11 and Lot 14. Site Features: The new building (a home and hospital for the aged) has been constructed and consists of seven floors with 50 residential units of affordable housing for seniors. Current Zoning/Use: The current use is a home and hospital of senior citizens. Surrounding uses also include residential and commercial. Historical Use: The 2614 Kingsbridge Corporation had operated a parking garage at the site since it purchased the property in 1973. Historical information indicated that there were three 550-gallon gasoline underground storage tanks USTs located beneath the garage. Phase II investigation identified petroleum impacts to the soil and groundwater. Additional sampling identified a release of tetrachloroethene (PCE) believed to be from a former dry cleaner offsite at 2628 University Ave. and a gasoline release from the former underground storage tanks at 2614 University Avenue. Site Geology and Hydrogeology: The site is underlain by a thin veneer (less than 6-inches to 8-feet) of low permeability, unconsolidated overburden on top of dense crystalline bedrock. The overburden is primarily silt and clay (weathered bedrock) with pockets of fill and thin lenses of native fine sand and rock fragments. Groundwater is not present at all locations in the overburden. Groundwater has been measured to flow from University Avenue southeasterly toward Aqueduct Avenue at a gradient of approximately 0.03 ft/ft.

Env Problem: Nature and Extent of Contamination: Prior to Remediation - Contaminants of concern at the site included chlorinated volatile organic compounds (cVOCs) consisting of cis-1,2-dichloroethene, trichloroethene, and tetrachloroethene, as well as non-chlorinated petroleum VOCs such as benzene, ethyl-benzene, toluene, and xylene (BTEX). Impacted media included soil, soil gas, and groundwater. As a result of the remediation implemented at the site, concentrations of the contaminants of concern declined substantially. Post Remediation - The remedial measures commenced in 2000 and involved excavation and removal of the USTs and contaminated soils; installation and operation of a Soil Vapor Extraction (SVE) system to address any

residual contamination; a Sub-slab Depressurization System (SSDS) beneath the new building; and groundwater monitoring to assess the effectiveness of these remedial actions. A total of 3,070 tons of contaminated soil was removed and disposed off-site. The SVE system operated continuously for two years. The semi-annual groundwater monitoring program was implemented in June 2001, following completion of the remedy. Engineering and Institutional Controls (ECs/ICs), including a Site Management Plan and deed restrictions, are in-place. Engineering controls consist of a composite cover system, vapor barrier and active sub-slab depressurization system. The remediation was completed in April 2007 with the approval of the Site Management Plan and issuance of the VCA Release letter.

Health Problem: Volatile organic compounds are present in the groundwater at this site, however, exposure via ingestion is not expected as the area is served by public water. The potential for soil vapor intrusion in the on-site building has been mitigated by the installation and operation of a sub-slab depressurization system under the building.

The remediation was completed in April 2007 with the approval of the Site Management Plan and issuance of the VCA Release letter.
Health Problem: Volatile organic compounds are present in the groundwater at this site, however, exposure via ingestion is not expected as the area is served by public water. The potential for soil vapor intrusion in the on-site building has been mitigated by the installation and operation of a sub-slab depressurization system under the building.

Site Description: Location: The site is located in an urban area in Bronx County. The site encompasses about 0.5 acres and is located at 2614 and 2620 University Avenue, Bronx County, Block 3215, Lot 11 and Lot 14. Site Features: The new building (a home and hospital for the aged) has been constructed and consists of seven floors with 50 residential units of affordable housing for seniors. Current Zoning/Use: The current use is a home and hospital of senior citizens. Surrounding uses also include residential and commercial. Historical Use: The 2614 Kingsbridge Corporation had operated a parking garage at the site since it purchased the property in 1973. Historical information indicated that there were three 550-gallon gasoline underground storage tanks USTs located beneath the garage. Phase II investigation identified petroleum impacts to the soil and groundwater. Additional sampling identified a release of tetrachloroethene (PCE) believed to be from a former dry cleaner offsite at 2628 University Ave. and a gasoline release from the former underground storage tanks at 2614 University Avenue. Site Geology and Hydrogeology: The site is underlain by a thin veneer (less than 6-inches to 8-feet) of low permeability, unconsolidated overburden on top of dense crystalline bedrock. The overburden is primarily silt and clay (weathered bedrock) with pockets of fill and thin lenses of native fine sand and rock fragments. Groundwater is not present at all locations in the overburden. Groundwater has been measured to flow from University Avenue southeasterly toward Aqueduct Avenue at a gradient of approximately 0.03 ft/ft.

Env Problem: Nature and Extent of Contamination: Prior to Remediation - Contaminants of concern at the site included chlorinated volatile organic compounds (cVOCs) consisting of cis-1,2-dichloroethene, trichloroethene, and tetrachloroethene, as well as non-chlorinated petroleum VOCs such as benzene, ethyl-benzene, toluene, and xylene (BTEX). Impacted media included soil, soil gas, and groundwater. As a result of the remediation implemented at the site, concentrations of the contaminants of concern declined substantially. Post Remediation - The remedial measures commenced in 2000 and involved excavation and removal of the USTs and contaminated soils; installation and operation of a Soil Vapor Extraction (SVE) system to address any residual contamination; a Sub-slab Depressurization System (SSDS) beneath the new building; and groundwater monitoring to assess the effectiveness of these remedial actions. A total of 3,070 tons of contaminated soil was removed and disposed off-site. The SVE system operated continuously for two years. The semi-annual groundwater monitoring program was implemented in June 2001, following completion

of the remedy. Engineering and Institutional Controls (ECs/ICs), including a Site Management Plan and deed restrictions, are in-place. Engineering controls consist of a composite cover system, vapor barrier and active sub-slab depressurization system. The remediation was completed in April 2007 with the approval of the Site Management Plan and issuance of the VCA Release letter.

Health Problem: Volatile organic compounds are present in the groundwater at this site, however, exposure via ingestion is not expected as the area is served by public water. "Spoke with Rob Hill at RiteWay tank.They are doing conversion of heating system from #6 to #2. AST 7500 gallon. Tank failed the test at the suction line.No product released. Tank was empty. RiteWay will prepare a closure report for DEC.(sr) 5/29/14 - Austin - Reassigned from Rahman to Mahat - end 8/26/14: Mahat DEC Mahat received a closure report from David Chan including passing TT. He mentioned the reason for the failing TT was due to loose guauge on the manhole. The issue was resolved resulting a passing test. A narraive closure appeal, failing TT and Passing TT is uploaded on D2. This leak was a dry one and no further action is required by the Department. Hence the spill will be closed in the database. "

Raphael Ketani. I reached Diana. She gave me the phone number to Audubon (212) 544-2400. She said that they had a failed tank only test, abandoned the tank in place with slurry, had 2 275 gal. tanks installed in place, and other work. I called Audubon and was told to call Carmen Diaz after 12 noon. Ms. Diaz called me back to say that her contractor had sent her documents for the abandonment of the tank and other items. She asked which documents I needed. I told her I needed a revised PBS application for the 2000 gal. tank and any documents regarding cleanup and soil removal. She said she will call her vendor and get back to me. 7/11/06 - Raphael Ketani. I received a call from Nora Hines of the Audubon Partnership. She said that she was the assistant for Ms. Diaz. She said she had a bunch of papers that she could send me copies of regarding the work that was done at the site. Ms. Hines went through the list of documents, but none were the ones I needed. I checked the PBS record and the tank is still listed as in service. I told Ms. Hines that I needed a revised PBS application to show that the tank is abandoned and a report from PTC describing the abandonment work and the removal of any contamination. She said she will talk to Ms. Diaz on Monday when she comes back and get the proper paperwork. 7/13/06 - Raphael Ketani. Ms. Hines FAXed me a copy of the current PBS record, and the failing tank test results (in the dry portion). I still need an official document regarding abandonment of the tank (and any cleanup that was needed) and a revised PBS application. 7/20/06 - Raphael Ketani. I spoke to Ms. Diaz regarding the revised PBS application and the official letter regarding the abandonment of the tank and the replacement. She said that the person who normally handles these documents is on vacation and will be back on Monday. She said she will get me these documents. 7/25/06 - Raphael Ketani. Ms. Albertina Cabrera, assistant to Ms. Diaz, called up to ask what documents I needed from the Audubon Partnership. I told her that I needed a revised PBS and a letter describing the cleanup and the tank abandonment. She said she will send it. 8/15/06 - Raphael Ketani. Mark Salamack of PTC (718) 624-4842 called regarding the site. He said that he will submit to me a cover letter explaining what went on at the site, with soil test results, tanks test results, and a revised PBS application. 8/16/06 - Raphael Ketani. I received a FAX late yesterday from Mr. Salamack regarding the site. The FAX consisted of a letter to Sharif Rahman dated March 9, 2006 from PTC, soil analytical data, a site map, a copy of Mr. Rahman's tank test failure letter, and a copy of the closed record from the publicly accessible spill database. Mr. Rahman's spill case record number was 0507807 and was initiated due to a failed tank test for a 2000 gal. #2 fuel oil tank. His case was initiated on 9/29/05 and closed on 3/15/06. The case that I have, #0509515, also lists a 2000 gal. #2 fuel oil tank for the same site. This case was opened on 11/8/05 due to a tank test failure. The two cases appear to be exactly the same and are for the same site. I called up Mr. Salamack and he said that what they normally do is test the tank system first and then isolate the tank and test it alone. This would explain the two test dates. Based upon the documentation mentioned above that I received from Mr. Salamack, I am closing the spill case. "

Remarks:

"System test was done in October 2005 and failed. Tank was then evacuated and the holes in the line were plugged. A tank test was done today and it failed again. Now they are looking for a new tank and abandon the old one. (No release)"

355ppb benzene(MW6). Groundwater analyticals show 9430ppb benzene(MW1), 14000ppb benzene(MW2), 5270ppb benzene(MW3), 5550ppb benzene(MW5), 290ppb benzene(MW6), 1210ppb benzene(UW2-located on 5530 Broadway), 186ppb MTBE (UW1). Letter from Tyree to Getty-May 1995-SVE pilot testing began Feb 1995. An effective radius of .1 of water was achieved at well MW6 only. Recommendation is for another pilot test using a larger vacuum blower. SVE Pilot Test-June 1995-Tyree-SVE test yielded and effective ROI of 10'. A vacuum of .1 of water was achieved at 10'. Installation of eight additional wells will be installed to cover contaminated area. Remedial Action Plan-Oct 1995-Tyree-Proposal to install Dual Phase Extraction (DPE) system to achieve the required radius of 10' as determined by SVE influence test. DPE system will be manifolded to 15 on-site wells. Monitoring will include 1)pressure and temp gauges 2)vapor effluent using PID 3)sampling liquid effluent 4)sampling SVE system effluent Status Reports-April 1996 thru Nov 1996-Tyree-Sampling of nine monitoring wells-Groundwater at depths of 6-9'. MW5 was paved over. Sept 1996 groundwater samples show 2150ppb benzene(MW1), 8850ppb benzene(MW2), 1650ppb benzene(MW3), 6900ppb benzene(MW6), 1210ppb benzene(UW2). Letter from DEC to Scott Hanley(Getty)-1/21/97-Letter from DEC(O'Dowd) to Hanley including unsigned STIP agreement. Quarterly Status Reports-March thru May 1997-Sampling of nine monitoring wells-Groundwater at depths of 6-9'. MW5 was paved over. Sept 1996 groundwater samples show 2600ppb benzene(MW1), 8970ppb benzene(MW2), 2820ppb benzene(MW3), 2970ppb benzene(MW6), 131ppb benzene(UW2), 83.9ppb benzene(UW1). DPE Pilot Test -July 1997-Tyree-MW2 was pilot test well. In May 1997 three micro wells were installed for using during DPE pilot test. Included in pilot test were groundwater elevation monitoring, groundwater recovery rate, induced vacuum readings, VOC vapor monitoring and sampling, effluent sampling. Pilot test indicated that a 20 foot vapor ROI can be achieved. Test found that a DPE feasible due to 20' vapor and gw ROI. Quarterly Status Reports-June 1997 thru Nov 1997-Tyree-Sampling of thirteen monitoring wells-Groundwater at depths of 6-9'. MW5 was uncovered. Sept 1996 groundwater samples show 1810ppb benzene(MW1), 6560ppb benzene(MW2), 1460ppb benzene(MW3), 461ppb benzene(MW5), 4780ppb benzene(MW6), 2230ppb benzene(UW2), 17.9ppb benzene(UW1), 4420ppb benzene(MW7), 6720ppb benzene(MW8), 701ppb benzene(MW10). Quarterly Status Reports-Dec 1997 thru Aug 1998-Tyree-Sampling of ten on-site monitoring wells. Groundwater at depths of 11-14'. July 1998 groundwater samples show 3460ppb benzene(MW1), 8220ppb benzene(MW2), 1160ppb benzene(MW3), 963ppb benzene(MW5), 10600ppb benzene(MW6), 7340ppb benzene(MW7), 11600ppb benzene(MW8), 10400ppb benzene(MW9), 1280ppb benzene(MW10). Quarterly Status Reports-Sept 1998 thru Nov 1998-Tyree-DPHVE (Dual Phase High Vacuum Extraction System) started on Aug 28, 1998. Effluent air samples were collected for analysis and influent and effluent water samples were also collected for analysis. Groundwater flow to the south/southeast. Quarterly Status Reports-Dec 1998 thru July 24, 2003. System not operational from April 2001 thru June 2001 due to electrical problems. System not operational from May 2001 thru Aug 2002 due to replacement of transfer pump. System not operational during March 2003. Groundwater flow to the southeast. Monthly system checks and quarterly sampling of air discharge and water influent and effluent. Nine monitoring wells on-site. Groundwater at depth of 10-14'. 9/23/2003-Vought-After file review NYSDEC requires: 1)sampling/current status of wells at 5530 Broadway 2)submission of remediation system plan including stack height and

air flow(cfm) 3)Installation of two borings across West 230th Street and one boring west of MW1 4)sampling of system influent and effluent due to Not Accessible listing in data 5)Monthly sampling of influent and effluent versus current quarterly sampling. Vought sent letter with above requirements and a Stipulation Agreement on 9/24/03. Vought called David Pachan (Tyree-518-786-3200) and summarized the above. 9/25/2003-Vought-Spoke with Pachan and three adjacent wells were unable to be located due to debris as of 9/24/03. Debris is so thick that unable to get drill rig in. Vought called adjacent property owner (Murray Dweck-732-248-8200) and advised him to remove debris to obtain water sample and return call to DEC to obtain number of Pachan. 9/26/03-Email from Tyree(Pachan) to Dec(Vought)-9/26/03. Just confrimed today with the property owner and my tech that the off site wells are no longer there . We will have to get a Geoprobe rig in there for the groundwater samples and according to the property owner access shouldn't be a problem there is a 20 foot access gate and he is being very cooperative . 11/11/03-Received Investigation Plan (Tyree) as per STIP. Proposal for installation of six soil borings to soil and groundwater. Boring locations include two borings on the west side of West 230th Street, one boring west of MW1 and three boirngs on the adjacent property to the north (5530 Broadway). 12/1/03-Letter from DEC(Vought) to Tyree. This Department hereby approves Tyree Org for the installation of soil boirngs in sidewalks along Broadway and West 230th Street . Quarterly Monitoring Report (Tyree)-Oct 2003 thru Dec 2003. Nine wells on-site, no free product, groundwater flow to the southeast. Remedial activities include Dual Phase High Vacuum Extraction System with monthly system checks, quarterly sampling of air discharge and water influent/effluent. Groundwater analyticals show 51ppb benzene(MW1), 1350ppb benzene(MW2), 32.5ppb MTBE(MW3), 19.1ppb MTBE(MW5), 91ppb benzene(MW6), 244ppb benzene(MW7), 28.4ppb benzene(MW8), 8790ppb benzene(MW9) and 7.99ppb benzene(MW10). Water influent shows 175ppb benzene. 1/16/04-Email sent from Vought to Tyree requesting status of STIPs sent out on 9/24/03. Subsurface Investigation Report(Tyree-David Pachan)-1/19/04. Vacant property to the north, commercial properities to the south and west, commercial parking lot to the east. Six Geoprobe borings performed on 12/12/03. Report recommends Continue with quarterly groundwater monitoring and operation of the DPHVES. Results from this investigation show that the contaminatin does not appear to be migrating off-site. There may be an off-site source for the contamination that was found upgradient of the site in B2 and B3 . Soil analyticals show no TAGM 4046 exceedance in boring samples. Groundwater analyticals show: 366ppb benzene(B2), 1370ppb napthalene(B2), 328ppb benzene(B3) and 871ppb napthalene(B3). Boring logs show strong odors in soil at depth of 8 below grade . 2/2/04-Vought-Received copy of signed STIPULATION Agreement. Stipulation implemented on 2/3/04 by DEC Kunkel. 2/20/04-Vought-After file review DEC requires: 1)monthly influent/effluent sampling 2)stack height and air flow (cfm) of system 3)placement of remediation system on site plan 4)upgradient sources to contamination found in B2 and B3. Vought sent email to David Pachan (Tyree) with requirements to be included in RAP. 8/5/04-Vought-New file review by Vought: Email from Tyree (Pachan)-9/26/03. Just confirmed today with the property owner and my Tech that the off site wells are no longer there. Parking lot was torn up and replaced with undeveloped land. We will have to get a Geoprobe rig in there for groundwater samples . Vought approved of borings. Email from Tryee (Pachan)-10/2/03. Email

with stack statistics for comparison to SVE Benzene Emission Limits. 8/6/04-Vought-Sent email to Pachan and Lindell requiring: 1)water flow rate through air stripper 2)surrounding property map 3)formal copy of the RAP 4)possible expansion of the system to include 5530 Broadway 5)monthly influent and effluent sampling. 10/8/04-Vought-New file review by Vought: Email from Tyree (Pachan) to DEC Vought-8/9/04. The design flow rate through the stripper is 5 gallons per minute . I am also going to lower all the stingers in the wells that are connected to the system so that we can pull more water . The surrounding property map is attached below . The RAP is being overnighted to you . The DPE pilot test does show that the ROI's do cover the locations of B2 and B3 . Since the system has not been pulling water we have been unable to sample the influent and effluent streams monthly. I intend to modify the system. Vapor Extraction Influence Pilot Test-6/30/95. The greatest effective ROI obtained on this site was 10 feet . Remedial Action Plan-10/11/95. Proposal for Dual Phase Extraction. Dual Phase Extraction Pilot Test Report (Tyree)-7/2/97. This plot indicates that a 20 foot vapor ROI can be achieved . 08/31/2005 - Feng - Project transferred from Vought to Feng. 09/09/2005 - Feng - This Getty spill site is the source of contamination for the adjacent site on 5530 Broadway, Bronx, NY. For the concern of sensible receptors that arisen due to the future construction of a synagogue on the 5530 Broadway, a letter sent to Kevin Shea (Getty), Paul Hatcher (Tyree) and Paul Lindell (Delta) to requires additional investigation/remediation as listed below: 1. Delineation of Soil and Groundwater Contamination of Adjacent Site at 5530 Broadway (by November 11, 2005) 2. A revised Remedial Action Plan to include 5530 Broadway (by December 23, 2005) 10/18/2005 - Feng - Spill 04-12485 has been consolidated into this spill 11/8/2005 - Feng - Due day for soil/groundwater will be extended to the mid December because Tyree has to get the signed access agreement from the developer of 5510 Broadway. 12/22/2005 - Feng - 12/21/2005 Email from Scott Cunningham (Tyree) saying that the Subsurface Investigation Report for the adjacent property is in the way, will be here by next week. 2/2/2006 - Feng - Email Scott Cunningham asked about the status of the site investigation report. (RJF) 4/25/2006 - Feng - Reviewed the SIR dated 1/20/2006 submitted by Tyree. Tyree performed the offsite investigation at the sidewalk adjacent to West 230th Street (W-11 and W-12), sidewalk adjacent to Broadway Street (W-13) and the adjacent property 5530 Broadway (W-14, W-15 and W-16). W-12, high VOCs in groundwater. W-16, high SVOCs in soil and FP (sheen) detected in groundwater. Tyree recommended to: 1) tie W-16 into the DPVES and used as one of the vapor recovery wells. 2) reduce the vaccum in W-1, W-3, W-5 and W-10 to allow greater vaccum at extraction wells W-2, W-6, W-7, W-8 and W-16. 3) W-2 will have increased vaccum to provide influence at W-14, W-12 will be influence by the increase in vaccum at W-6 and W-8. 4) continue with quarterly monitoring and sampling of the monitoring wells will provide sufficient data collection to verify the groundwater conditions and the effectiveness of the existing DPVES on the 5510 Broadway property. Emailed Scott Cunningham I read the SIR, dated 1/20/2006. So there is contamination found in the sidewalk adjacent to West 230th St. (W-12) and 5530 Broadway (W-16) and remediation will be needed. So have you done what you recommended yet? And have you informed the owner of the property of 5530, Elite Murray about the investigation result and future remediation? Is he going to construct some building structure on top of 5530 this year? so let him know

what you guys doing on his property and make sure there is no misunderstanding. 4/25/2006 - Feng - Email from Scott Cunningham: The person I have been in contact with regarding 5530 Broadway is Eli Dweck from Kimberly Associates. He has told me that there will be a building on the property in the future, but not right away. He is leasing the property to Prude Construction so they can store equipment and materials there for work they are doing down the street. As far as the system recommendations, the vacuum adjustments have not been made due to the systems main vacuum blower is in the shop for repair. So right now the system is not operational. The repair to the blower should be completed hopefully this week, and we will get the system running, make the adjustments mentioned in the SIR, and see how those adjustments effect the levels on and off the site. I will notify you as soon as the system is operational. Thanks

11/15/2006 - Feng - Quarterly Monitoring Report, 8/2006 - 10/2006, 10/2006, by Tyree. Groundwater sampled and gauged 9/26/2006. 15 monitoring wells. DTW 10.64' to 15.41' bg. Flow direction southeast. No LNAPL. BTEX range ND to 6,007.3 ppb. MTBE range ND to 1,130 ppb. All ND for MW-14, MW-15 and MW-16 which locate in the adjacent property. DPES effluent was not sampled this month. (RJF) 2/7/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 12/2006, by Tyree. Groundwater sampled 12/11/2006. 15 monitoring wells. DTW 11.13' to 15.22' bg. Flows southeast. No LNAPL. MW-1, 1.07 ppb BTEX, 3.27 ppb MTBE. MW-2, 7,114 ppb BTEX, 58.9 ppb MTBE. MW-3, 1.04 ppb BTEX, 5.54 ppb MTBE. MW-5, dry. MW-6, 43.2 ppb BTEX, 20.1 ppb MTBE. MW-7, 410.6 ppb BTEX, 19.9 ppb MTBE. MW-8, BDL. MW-9, 6,672 ppb BTEX, 1,410 ppb MTBE. MW-10, Not accessible. MW-11, BDL. MW-12, 21.19 ppb BTEX, 1 ppb MTBE. MW-13, 3.62 ppb BTEX, 2.14 ppb MTBE. MW-14, MW-15, and MW-16, not accessible. Noted that DPVES operational as of 7/12/2006, Liquid phase not operational as of 12/2006, and new belts for the system will be installed prior to next quarter sampling event. (RJF) 6/19/2007 - Feng - Quarterly Monitoring Report, 12/2006 - 3/2007, 3/2007. Groundwater sampled 3/13/2007. 15 monitoring wells were sampled. DTW 11.16' to 14.53' bg. Flows to southeast. No LNAPL. MW-2, 4,061 ppb BTEX, 28 ppb MTBE. MW-7, 341 ppb BTEX, 18 ppb MTBE. MW-9, 6,885 ppb BTEX, 938 ppb MTBE. Other wells were low. MW-14, MW-15 and MW-16 were not accessible. DPES running. The system is currently off due to electrical difficulties. Tyree contacted Con Ed about the situation. (RJF) 9/27/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 6/2007, 7/2007. Groundwater sampled 6/15/2007. 15 monitoring wells were sampled. DTW 9.95' to 15.56' bg. Flows to southeast. LNAPL in MW-16 (0.01'). MW-1, 1.1 ppb BTEX, MTBE BDL. MW-2, 4,534 ppb BTEX, MTBE BDL. MW-3, BTEX BDL, 2.8 ppb MTBE. MW-5, BDL. MW-6, 28.7 ppb BTEX, 12.5 ppb MTBE. MW-7, 345.2 ppb BTEX, 20.4 ppb MTBE. MW-8, BDL. MW-9, 6,217.9 ppb BTEX, 1,350 ppb MTBE. MW-10, BDL. MW-11, BDL. MW-12, BDL. MW-13, 1.5 ppb BTEX, MTBE BDL. MW-14, BDL. MW-15, BDL. MW-16, BDL. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. There is been electrical problem and the system is not operational. DEC required to have EVR events on MW-16 for MW-16 has shown some sheen in the last few quarters as Tyree mentioned. (RJF) 1/28/2008 - Feng - Quarterly Monitoring Report, 7/2007 - 10/2007, 11/2007. Active gasoline retail/service station. Groundwater gauged and sampled 10/1/2007. 15 monitoring wells. DTW 12' to 16.56' bg. Flows to southeast. NO LNAPL. BTEX range ND to 7,903.4 ppb (W-9). MTBE range ND to 1,380 ppb (W-9). Email to D. Madigan (Tyree) for status of the EVFR events and the restart of the DPES. (RJF) 3/19/2008 - Feng - eDoc Quarterly Monitoring Report

4Q2007. (RJF) 3/24/2008 - Feng - Quarterly Monitoring Report, 11/2007 - 2/2008, 2/2008. Active gasoline retail service station. Groundwater was gauged and sampled 12/26/2007. 15 monitoring wells. DTW 11.29' to 15.48' bg. Flows to southeast. No LNAPL. BTEX range ND to 7,697 ppb (W-9). MTBE range ND to 1,210 ppb (W-9). (RJF) 8/27/2008 - Quarterly Monitoring Report, 3/2008 - 5/2008, 6/2008. Active gasoline retail service station. Spill cause, tank test failure 12/14/1993. Spill source, former USTs onsite. Groundwater was gauged and sampled 5/2/2008. 15 monitoring wells. DTW 10.26' to 16.88' bg. flows to southeast. BTEX range ND to 6,264 ppb (MW-9). MTBE range ND to 415 ppb (MW-9). (RJF) 9/4/2008 - Getty Properties portfolio meeting with Tyree and Delta. Will check the Sandborn map for history research of the vacant property. W-2, w-9 to be operational, RAP by 10/2008. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Tyree is having problem getting the electrical power. Tyree will send Con Edison contact information for DEC's assistance. SanBorn maps in the submitted quarterly report. (RJF) 4/30/2009 - Quarterly Monitoring Report, 8/2008 - 10/2008, 12/2008, by Tyree. Active gasoline retail/service station. Groundwater was gauged and sampled 10/31/2008. 15 monitoring wells. DTW 11.11' to 16.40' bg. Flows to southeast. NO LNAPL. BTEX range nD to 6,840 ppb (W-9). MTBE range ND to 1,060 ppb (W-9). 10/23/2008, EVR was conducted on MW-16 and removed 270 gallons of water/gasoline mixture, waste manifest is included. Dual Phase High Vacuum Extraction System is monthly checked, quarterly sampled of the air discharge and water influent and effluent. The system is off due to the electrical difficulties. SanBorn maps are attached. email Jen Kotch (Tyree) for review summary of the SanBorn maps because the maps are hard to read (small and blur letters). (RJF) 7/24/2009 - Jim Lantowski from Tyree called. They are removing the tanks and asked if they need to remove the encased concrete or could drilling through the concrete to take endpoint samples. Told him to remove the concrete bottom and then take the samples because the concrete might impede from future drilling at this area. (RJF) 7/24/2009 - email from Jim Smith. They reported a spill based on petroleum impacted soil newly discover below the formerly encased tanks bottom slab. Spill 09-04799 was assigned for the new spill. They asked for game strategy for removal of impacted soils. (RJF) 7/27/2009 - email replied to Jim Smith (Tyree). I couldn't come out today. Please remove as much impacted soil as possible based on safety and practical extent, then take post excavation samples. If there is no new tanks to be in this area, then the next step I would require a couple of monitoring wells to be installed over here for groundwater data. The site will be then re-evaluate based on the new data, further investigation and remediation may be required. (RJF) 7/28/2009 - Jim Smith called. They think that the impacted soil is not from Marketing, but rather from the old spill. They propose to put a poly sheeting and backfill. Called Jim Smith back and left voice message, follow by email. DEC will call Getty Properties to see if they want to take the opportunity to remove the soil, leave the excavation open for now. And endpoint samples shall be taken and submit the tank closure report. Tibbe called Paul Lindell. Paul Lindell said they will work something out with Getty Marketing. (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active gasoline retail service station. 15 monitoring wells. Groundwater was gauged 4/23/2009, 5/26/2009, 6/11/2009, 6/26/2009 and 7/14/2009. NO LNAPL. DTW 9.8' to 14.43' bg. Flows to southeast. Groundwater was sampled 7/16/2009.

BTEX range ND to 3,400 ppb (MW-9). MTBE range ND to 531 ppb (MW-9). Remedial strategy will be determined by divestment activities. (RJF) 11/12/2009 - Tank Closure Report, dated 10/8/2009, pdf, by Tyree. On July 21 to 29, 2009, Tyree was contracted by Getty Petroleum Marketing to remove 3 (4,000-gallon) single wall steel USTs (2 gasoline and 1 diesel) encased in concrete and 5 dispensers at this site. The tank vessels appeared to be in good shape with no evidence of holes, scaling or pitting. 1 (550-gallon) ghost UST was observed upon removing the concrete slab from underneath the encased USTs, as well as petroleum stained soil. No soil, neither the ghost tank was removed. A new spill number 09-04799 was assigned to the site. The 3 USTs were cleaned and transported to Gershow Recycling in Medford, NY. 11 post excavation soil samples were collected from the tankfield and 4 were collected from the dispenser and run for 8260 and 8270. North Tank Bottom, 1,530 ug/Kg benzene, 50,900 naphthalene, 818,000 xylene, 126,000 ethylbenzene, 115,000 toluene. North Dispenser, 590 benzene, 27,470 xylenes, 3,970 ethylbenzene, 14,600 toluene. (RJF) 7/6/2010 - Subsurface Investigation Report, dated 4/29/2010, by Tyree. On October 21, 2009, Tyree oversaw Associated Environmental Service during the advancement of 9 soil borings SB-1 to SB-9 using Geoprobe 6620DT drill rig and direct push method. Soil borings were drilled from 7-20 feet bg. 18 soil samples were collected. SB-1 (5-10'), BDL. SB-1 (15-20'), BDL. SB-2 (0-5'), 1,830 xylenes, 2,042 BTEX. SB-2 (5-7'), 1,570 xylenes, 1,679 BTEX. SB-3 (5-10'), BDL. SB-3 (10-15'), 1,620 xylenes, 8,400 xylenes, 10,839 BTEX, 4,010 1,2,4-trimethylbenzene. SB-4 (5-10'), 1,190 benzene, 16,500 toluene, 25,100 ethylbenzene, 129,000 xylenes, 171,790 BTEX, 11,000 n-propylbenzene, 98,000 1,2,4-trimethylbenzene, 29,800 1,3,5-trimethylbenzene, 21,000 naphthalene. SB-4 (15-20'), 1,180 benzene, 20,400 toluene, 10,400 ethylbenzene, 51,600 xylenes, 83,580 BTEX, 4,540 n-propylbenzene, 33,100 1,2,4-trimethylbenzene. SB-5 (5-10'), 165 benzene, 4,500 toluene, 10,300 ethylbenzene, 115,000 xylenes, 129,965 BTEX, 8,560 n-propylbenzene, 86,100 1,2,4-trimethylbenzene, 23,200 1,3,5-trimethylbenzene, 15,200 naphthalene. SB-5 (15-20'), BDL. SB-6 (10-15'), 228 benzene, 1,400 xylenes, 2,665 BTEX, 5,860 n-propylbenzene. SB-6 (15-20'), BDL. SB-7 (10-15'), 2,760 ethylbenzene, 11,400 xylenes, 14,284 BTEX, 11,100 1,2,4-trimethylbenzene. SB-7 (15-20'), low/BDL. SB-8 (10-15'), 290 benzene, 1,340 xylenes, 2,100 BTEX, 4,100 1,2,4-trimethylbenzene. SB-8 (15-20'), 60 benzene. SB-9 (10-15'), 14,300 1,2,4-trimethylbenzene, 13,900 1,3,5-trimethylbenzene. SB-9 (15-20'), low/BDL. Tyree claimed that the elevated VOCs impacts in soil were identified in soil borings advanced in the vicinity of Getty Marketing's tank field and the former dispenser and downgradient of Getty Marketing former remote fills. The October 2009 investigation suggests that the soils have been adversely impacted by Marketing's operation which only recently ceased in 7/2009. The groundwater data collected from the existing monitoring well network supports this conclusion as the majority of the impacts in groundwater are identified in monitoring wells adjacent to and downgradient of Marketing's former tank system while groundwater impacts near Properties's former 550-gallon tank field are minimal. Tyree requests to close spill 93-11138 and that Marketing address the remaining subsurface impacts under spill 0-04799 which as assigned to Marketing during their 7/2009 tank removal activities. 7/7/2010 - email to Tyree with comments on the SIR. 1) if the ghost tank hasn't been removed, then remove it; 2) register the ghost tank; 3) register

the 550's tanks that were removed; 4) initiate legal case if no one do what DEC requires.

***** 12/1/2010 Getty contacted Steve Sangesland about open spill #0904799. They wanted to use the Oct 2009 Tank Closure report to close out this case, but Sangesland found problems with this report and forwarded these comments back to Tyree.... See Sangesland's comments: I have 4 primary problems with this closure report: 1) 5510 Broadway, Bronx is located about 1 block away from former waterfront (W 230th St used to be On the river before the Marble Hill section of Manhattan was cut off, and the river diverted below W 225th St.) The gist of this comment is a concern that the site may have shallow groundwater and it appears that no groundwater samples were taken when these tanks were pulled. Please determine the depth between the tank grave bottom and groundwater in the area.... Based on the geology I would guess that it's very close. 2) Page 5 of the report talks about petroleum stained soil found below the concrete slab, probably from the prior 550 gal tanks that once were in the area. Then page 6 specifically says No Petroleum Contaminated soil was dug out from the excavation why? Is that why several of the end point samples exceeded TAGM? Was the contaminated soil mixed with the good soil and then redistributed so it wouldn't look so bad? 3) What happened with the Phantom Tank ? Did excavation show there really was not an old tank there? Was the tank confirmed to be there and then left? 4) Tables 1 & 2 (Pages 11 & 12 of report) are not legible, even when it was enlarged. Could someone reprint/resend this table? Because this is not a clean and easy closure, I'm going to forward this case on to June Feng and have it co-listed under the other spill number on this site, Spill #9311138 *****
02/07/2011 - Talked to Chris Copely (cell - 203-414-5980). He is the env. rep. for the property owner (Moeller). He want sto be kept in the loop about any actions taken at this site. He claims they have two active potential buyers for the site. MCT 12/8/2011 - Reviewed 3Q2011, 10/2011, by Tyree. Sampled on 8/26/2011. Max BTEX 7,569 ug/L (MW-9). Tyree requests the abandonment of wells MW-5, 6, 7, 11, 12, and 13. MW-9 was re-installed which was destroyed during the tank removal activities. 2/1/2012 Getty portfolio transferred to KGH."

DEC Region: 2
DER Facility ID: 317657
DEC Memo: "7/25/2006 Sangesland spoke to Eddy Feliciano of Stuyvesant Oil. He said the house has two-275 gal tanks tied together in the basement. One of these tanks appears to have been dented and the tank is leaking from this point. Approx. 4 gallons of #2 oil formed a puddle on the cement floor. Stuyvesant laid down absorbant pads and booms to keep the spill contained. USA Tanks (718-981-5710) was hired to pump the tank out later today. 7/27/2006 Sangesland confirmed with USA Tanks that they did drain the leaking tank and closed off the valves so it's isolated from the second working 275 gal tank. The property owner is trying to decide if they'll repair/remove/replace the leaking tank. Sangesland told USA Tanks that they need to send in the following: 1) Color photos of the floor area showing the spill was cleaned. 2) A written statement saying the area was cleaned and no cracks were seen in the floor which may have caused underground contamination. 3) Documentation of what work was done on the tanks (repair/replace/remove). 9/20/06- DEC Piper spoke w/ Virginia Sardiis. As per conversation, work was completed. DECP iper poned USAP ENV. 718.981.5710.- As per conversation, leak was from tank. They removed one of the tanks and connected the single tank to the burner. Closed. E-doc report upon receipt."

DEC Memo: "1/15/09 Reviewed tank tightness test report dated 1014/08. Report states that tank and line associated with tank 5 was inconclusive. Found leak at ATG riser and leak at manway lines. Notified engineer on-site. Checked database and no spill could be found. Called Tanknology and they have no record of calling in spill. I was told their procedure is to call spill hotline when a tank fails. I called Wayne Murphy of Bronx Community College (718)289-5245 and left message regarding spill and to return me call. 1/16/09 Sent ttf letter to: Wayne Murphy, Chief Administrative Superintendent Bronx Community College West 181st Street/University Avenue Bronx, NY 10453 Received call from Michael Spath of CUNY. Told him about ttf letter. He will provide response after he receives letter. He told me the tank failed because of the manhole gasket and that it was repaired. bf 9/1/09 Received faxed letter from Michael Dillon, Senior stationary engineer at BCC. Tank failed because of a gauge line on top of the tank. No release of fuel. Tank was retested on 1/9/09 and passed. NFA. bf"

Site Description: The site is located in a commercial/residential area of the Kingsbridge Heights section of the Bronx. The property is currently occupied by a two-story brick building which contains a laundromat. The site is bordered by a convenience store and apartment building on the north, by a formerly vacant lot (now under construction for Home/Hospital for the Aged), by a parking garage to the east, and by

S113916991

University Avenue (a.k.a Martin Luther King, Jr. Boulevard) to the west. Before its use as a laundromat the property was previously utilized by a dry cleaner for an unknown length of time. Investigations conducted immediately south of the site (at 2614-2620 University Avenue) in 1997 identified tetrachloroethylene (PCE) at high levels in the soil (200 ppm) and groundwater (110,000 ppb). Based on subsequent investigations, a PCE hot spot was identified. In 2000, excavation of the hot spot area was completed. Confirmatory samples collected from the excavation showed non-detectable levels of PCE and associated breakdown products. Levels of contamination in the groundwater dropped by several orders of magnitude since 1997. The remaining groundwater contamination will be addressed under the Operations, Maintenance and Monitoring Plan. See also site no. 203008, which determined there was no source of contamination on 2628 University Ave. The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites.

Env Problem: The operations contaminated the soil and groundwater on the adjacent property with tetrachloroethylene (PCE) and its associated breakdown products. Excavations addressed soil contamination, and most of the groundwater contamination. The remaining groundwater contamination is being addressed under the Operations, Maintenance and Monitoring Plan.

DEC Memo:

"Tipple conducted site visit. Letter sent outlining requirements for cleanup. 12/24/04 Letter from O'Brien & Gere indicating the cleanup/ investigation will proceed, no start date is noted. 12/19/05 Feroze. Spill is transferred from Ketani to . 12/28/05. Mr. Martin pulver is called and a message is left for him to inform DEC the present status of that situation. A letter is sent to O'BRIEN & GERE to inform DEC about their actions to clean up debris, old tank and to close the old tank. 02/09/06. Feroze. Called O'brien & Gere and left a message them. 02/24/06 Feroze, Talked with Mr. Martin Pulver 718-289-5555, he said that he would talk with O'Brian and Gere that worked on that site. He will inform DEC about remediation actions. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 04/06/06-Hiralkumar Patel. Called at O'Brien & Gere. Randy is no longer working at this company. Left message for Scott Scheidelnan, who is handling now. 04/17/06-Hiralkumar Patel. Spoke with Scott and he gave me number of Mr. Dipasca, who can tell that who is handling this case, as he was handling previously. Mr. Dipasca (732) 225-7380 Ext. Spoke with Peter Dipasca at Edison office of Obrien & Gere. he told me that Randy Waibel was handling this case previously and was working in Syracuse office of NJ. Peter is new to the company and only thing he has the letter that Randy sent out to Mike Tipple at DEC. Peter has sent out copy of this letter to Feroze. now Peter is not handling this matter and Michael Spath from University of NY is handling themselves. asked Peter to get file from Syracuse office as he doesn't know that what kind of work done after spill reported. Michael Spath CUNY Environmental Compliance Manager 535 East 80th Street 5th Floor New York, NY 10021 Ph.: (212) 794 - 5590 Email: Michael.Spath@mail.cuny.edu PBS #: 2-107204. as per PBS records, site has 13 in service tanks and 4 closed-in place tanks. * 13 in service tanks * 4 closed in place tanks * 7 USTs * 4 closed in place tanks are AST in concrete vault. * total capacity of tanks on site is 113855 gal. * 11 tanks are in use to store #2 fuel oil * 1 AST (700 gal) is in use to store Diesel * 1 UST (1000 gal) is in use to store Gasoline. * 4 closed-in place tanks are AST of 15,000 gal capacity each were in use to store #6 fuel oil. * all USTs currently in use are due for tank test. Tried phone number on PBS records for Person name Manny Ballen, but he is no longer working and operator transfer me to power plant. spoke with Anthony Johnson and he told me that Chief Engineers left for the Day. i can contact them tomorrow after 9 O'clock. Chief Engineer: Michael Dillon & Tyrone Fleming (718) 289-5258. Left message for Michael Spath. Received call from Mr. Spath and as per him Woodard and Currr Engineering is handling environmental problem at site. some one from this company will call me during week. as per his records, they have done tank test and sent test result to Benjamin Conlon at DEC. he will send copies through

CUNY- BRONX COLLEGE (Continued)

S106971627

email again. 04/18/06-Hiralkumar Patel. REceived email from Mr. Spath with report. report included tank test results of six tanks only. among these six tanks, 4 tanks of 25,000 gal capacity storing #2 fuel oil, one tank is 1,000 gal capacity storing #2 fuel oil and one tank of 1,000 gal capacity stroing gasoline. this report doesn't include seventh tank of 10,000 gal capacity storing #2 fuel oil. send out email to Mr. Spath requesting information about this seventh tank and contact information about person who is handling environmental matter for university. 04/19/06-Hiralkumar Patel. Received call from Jack O'Neill, who is handling cleaning activities of tanks at site. as per him, they are planning to abondened the four ASTs that are currently not in use. these tanks were in use to store #6 fuel oil and tanks are in concrete vaults. Jack will open vault and clean it. if he finds any cracks on floor or any abnormal situation, he will notify the Department. i also asked him about seventh UST whose tank test data is not available. he will find it and call back.

05/05/06-Hiralkumar Patel. Received email from Michael Spath. the seventh UST was installed in 2002, so its due to tank test in 2007. as i was looking in tank test results that Mr. Spath send me before, found that the tests were done on 09/14/2004. but the tank test failure reported on 11/19/2004. send eamil to clarify this and to send if he has any new test results. 05/16/06-Hiralkumar Patel. Resend email to Mr. Spath. Received email from Mr. Spath. currently he is out of town. will contact soon. 06/05/06-Hiralkumar Patel. Resend email to Mr. Spath. 06/06/06-Hiralkumar Patel. Received email from Mr. Spath. he is looking for the tank which had leak in it. Received another email from Mr. Spath stating that the tank, which was reported leaking, is one of four #6 tanks at Bliss Hall. Woodard & Curran Engineering is working on work plan to premanently closing these tanks. Send email to Mr. Spath to find out which tank had problem and details about work done to correct this leaking tank.

08/14/06-Hiralkumar Patel. spoke with Mr. Spath. they are in process of hiring contractor to abandon four previously closed ASTs. asked Mr. Spath to test each tanks at location whose bottom is unvisible. he will call once he gets contractor. 11/27/06-Hiralkumar Patel. visited site. met Tyrone Fleming (718-289-5258), facility supervisor at university. as per Mr. Fleming, none of the active tanks has any problem. but there is oil spill from one of four 15000 gal Closed-In Place tanks. these tanks are located in Bliss Hall in concrete vault. this vault was in use as Coal storage in past and then they converted this storage into tank vault. spoke with Mike at facility. Mike was in this vault couple of months ago and he noticed oil inside vault. as per Mike, these tanks are out of service since 1984 and oil level readings in all these four tanks are constant since then. these tanks were in use to store #6 oil. from these four tanks, tank #2 has about 60% of oil and remaining three tanks has about 9 of product/sludge in it. all tanks are off-ground on legs. all lines to & from tank are aboveground. Mike hasn't noticed any oil leaking from any tank at time of his observation in tank vault. Mike mentioned that floor was not solid concrete when tanks were installed and he believed some oil may hit ground. Mike believe this oil spill may happened before 1984. spoke with Mr. Spath. they are in process of hiring contractor for spill cleanup and tank abandonment. asked Mr. Spath to call the Department with Contractor's name and number once they finalize it. sent out letter to Mr. Spath requiring endpoint sampling. letter emailed to Mr. Spath. 12/13/06-Hiralkumar Patel. received message from Ms. Hundley. spoke with Ms. Hundley. she asked copy of emails

from Mr. Spath. she will be futher contact on this case. they hired O'Brian & Gere for further cleanup and will send final report at end of work. Esther Hundley Safety Officer City Uuiversity of NY (CUNY) 555 w 57th Street 10th Floor New York, NY 10019 Ph.: (212) 541-0430 Email: esther.hundley@mail.cuny.edu forwarded all emails that i received from Mr. Spath. sent copy of CSL to Ms. Hundley in email. email sent to Ms. Hundley came back undelivered. left message for Ms. Hundley. received call from Ms. Hundley. she gave current email address. sent email again to Ms. Hundley. 01/09/07-Hiralkumar Patel. left message for Ms. Hundley to provide contractor's info who will going to do required soil investigation. received call from Ms. Hundley. they have hired O'Brien & Gere and under them, AB Environmental working at site. AB environment visited site last week and took some sample from product inside tank. they are planning to remove product from tanks on 01/16/07 and after removing tank, will do geoprobe to find any contamination. 02/14/07-Hiralkumar Patel. received call from Ms. Hundley. they finished removing sludge from three tanks out of four. fourth tank had about 10000 gal #6 oil in it and contractor is removing it currently. as per Mr. Hundley, tanks are sitting on cement floor inside concrete vault. as per her, vault floor is solid and if there was any oil spilled inside tank vault was contained at that time. once they remove oil from fourth tank, they will powerwash all four tanks. asked Ms. Hundley to submit report with condition of tank vault. 03/01/07-Hiralkumar Patel. received call from Ms. Hundley. she asked about requirement of cleaning lines of #6 oil tank. she mentioned that as per PBS regulations, lines must be free of oil/sludge. but as these lines were out of service for last 20 years, #6 oil got solidified in it and now it is very hard to removed from lines. discussed with DEC Jacob. he suggest to cap off these lines without any cleaning as it has #6 oil which has solidified. asked Ms. Hundley to cap off these lines without cleanint it. 03/13/07-Hiralkumar Patel. received call from Ms. Hundley. she asked whether she has to re-register #6 tanks which were closed 20 years ago. she asked because they cleaned out tanks now and closed these properly. told Ms. Hundley that as tanks were out of service for last 20 years, may not requires re-registration, but will call back once check with DEC Jacob. 04/17/07-Hiralkumar Patel. received tank closure report. based on available reports and informations, case closed. NFA sent to Ms. Hundley. letter emailed to Ms. Hundley. **tank test result copy that i had from Mr. Spath, i gave that to Brian to update tank test date in PBS Record.**"

DEC Memo: "PBS 2-107204 - TTF Letter sent on 3/26/2009 Sangesland spoke to Mike Dillon at Building Facilities Dept. Gaskets on top of the tank were loose, repairs have been scheduled. Tank appears to be OK 9/21/09. J.Krimgold reviewed a letter submitted by Bronx Community College and dated July 14, 2009. According to the letter the tank failed the test due to two loose fittings on the to of the tank. Fittings were fixed. No release. Case closed."
Remarks: "Caller states they had a fitting failure on a 1080 gallon ast. No spill or resources affected."

 DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 9/17/02 TJD Overfill caused spill. Petro satates toatal of 3 gallons spilled from vent pipe. All impacts are outside residence. Left message for property owner to call back. Property owner: Hop & Hung Lam (718)562 3679 9/20/02 TJD Site inspected by Demeo. 10 x 15 foot area in front yard was impacted by spill. Contaminated soils were removed by Milro. Demeo spoke with Paul Basso 9/18 and required endpoint samples as spill volume is estimated at approximately 20 gallons. At time of inspection soils had been removed and area was backfilled and reseeded. Awaiting analytical results. 12/27/02 TJD Closure report from Milro reviewed. Endpoint samples below TAGM. Spill closed."
 Remarks: "appears to be an overfill from the vent pipe. cleanup in progress by petro."

DEC Memo: "10/3/08: Spill transferred from J. Kolleeney to J.Kann. 10/09/08: J.kann - Met with NYCHA and their consultant (Preferred Environmental) on October 3 to discuss requirements of the site. Proposed and agreed to the installation of 5 borings (collection of gw and soil from each) and 1 additional wells (3 wells remains on site, 2 with product). Work Plan will be submitted shortly. 11/24/08: J.Kann - WP submitted on 11/19/08 5/25/12: J.Kann - assigned priority P0 to site as a part of monthly report tracking. 4/27/16: J.Kann email sent on 6/20/14: Yelena- Based on the Langan site investigation report of 2009 (report), product was detected at the referenced site in MW-1 and MW-3. According to the recommendations in the report, product gauging and removal should be prepared on a monthly basis. If any work has been done in the last few years, please update me. If no work has been done, please have your staff gauge the two wells containing product using the gauging methods used at Seth Low Houses. Once product thickness is determined, please vacuum out the wells and continue gauging and product removal on a monthly basis thereafter and have quarterly reports prepared and submitted to the Department. If free phase product is no longer present at the site, please let me know. - Jennifer November 2009 SIR by Langan DEcDoced."

 DEC Memo: "4/24/2009 TTF letter sent to: Property Manager Northeastern Academy
 532 West 215th Street New York, NY 10034 07/14/09. J.Krimgold reviewed the letter report submitted by Atec Environmental and dated May 21, 2009. Based on the report the tank failed the test either due to outdated vent cap or excessive corrosion of the manhole. Both components were repaired and a new manhole gasket was installed. The tank was retested and passed. Excavation of the tank top to perform repair did not reveal soil contamination. NFA. "

should be no more oil deliveries until the tank system is fixed and tested tight again. informed him that if there is leak found in fill line and if portion of fill line is underground, then further investigation is needed. Mr. Robert will call back after talking to his super to confirm that tank is completely aboveground and not wrap with concrete. 03/17/11-Hiralkumar Patel. 10:53 AM:- received call from Daniel from DD Contracting, company hired to do tank repairs. Daniel is on site right now. he mentioned that site has 1,500 gal tank completely wrapped in concrete. he was told to fix the fill line. fill line runs aboveground and fill port is located on building foundation wall. Daniels did not see any sign of leak from fill line but he was asked to change fill line. no oil found from weep holes on bottom of concrete wrap. supply/return lines run underground. Daniel DD Contracting Ph. (646) 321-2646 03/21/11-Hiralkumar Patel. letter sent to Mr. Robert came back undelivered. 4:15 PM:- spoke with Daniel. he has finished repair and waiting for re-testing. he will call once retesting is scheduled. 03/24/11-Hiralkumar Patel. 3:41 PM:- sent email to Mr. Robert requiring to submit result of retesting of tank system. 03/29/11-Hiralkumar Patel. 11:54 AM:- spoke with operator at Mr. Robert's office. she mentioned that ATS went for retesting but required more repair. technician is on-site today for repair. she will ask technician to call. 12:25 PM:- received message from Daniel. 2:42 PM:- left message for Daniel. 4:22 PM:- spoke with Mr. Robert and Daniel. asked Mr. Robert to either prove that tank/supply/return lines are not leaking (by having isolation test of these parts) or pump out tank until the system is tested tight. also asked Mr. Robert to seal the fill port to prevent any more oil deliveries. told Mr. Robert that if required document is not submitted by end of tomorrow, case will be referred to legal. 03/30/11-Hiralkumar Patel. 10:30 AM:- visited site. met Daniel. site occupies by a five story building with a basement. a 1,500 gal AST is completely wrapped in cinder blocks. weep holes at the bottom of tank wrap. no oil observed coming out from two visible weep holes. tank is about 6 ft away from the boiler in next room. all the lines running aboveground except about 6-7 ft of supply/return lines running under the boiler room floor and fill line running under the sidewalk. found valve connection (old connection from other pipes) in middle of fill line. gauge is not working. Daniel mentioned that they changed a piece of fill line in area where it enters into tank and now waiting for retest (which hasn't done yet) which will occur on 04/04/11. as no sign of any release observed inside the basement and as tank will be re-tested on 04/04/11, approved Daniel's request not to empty out the tank. 1:45 PM:- left message for Mr. Robert. 2:06 PM:- received message from Daniel. 04/15/11-Hiralkumar Patel. 3:26 PM:- left message for Daniel inquiring updates. 05/26/11-Hiralkumar Patel. 1:30 PM:- left message for Mr. Robert. 1:36 PM:- received message from Mr. Robert's office. 06/06/11-Hiralkumar Patel. 4:33 PM:- spoke with Mr. Robert and he mentioned that all work has been completed. spoke with Shin, Mr. Robert's assistance. she mentioned that tank passed the test. asked her to submit a statement (or invoice) from contractor including reason for tank test failure, repair done, any contamination during repair or not and passing tank test result. asked her to submit documents by end of 06/08/11. 4:40 PM:- sent email to Mr. Robert and asked him to submit spill closure report by the end of 06/08/11. 06/07/11-Hiralkumar Patel. 2:12 PM:- received email from Mr. Robert including copy of invoice. as per invoice from DD Contracting, they replace epoxy patch on oil tank with fiberglass

East corner of the property. 7/18/2002 Sangesland spoke with Dave Winslow (consultant) at ATC Associates (212-353-8280). Mr. Winslow requested and Sangesland approved the creation of a new spill number to cover the New spill on the North East corner of the property discussed above in notes from 12/21/2000. ATC is then going to request the closure of this spill number 9306194 based on the excavation of contamination and the soil/water samples taken. Remediation of the North East corner of the property will continue under the New spill number: _____ 8/23/2002 - Sangesland spoke with Dave Winslow at ATC the site will NOT be broken into 2 sites. No new spill number will be opened. 8/26/2002 - Sangesland met with Dave Winslow. Another round of water sampling was conducted. MTBE on the whole site is non detect. VOC and SVOC on the site range from ND to 6.78 ppm. The site of the highest concentration is MW1 on the north east corner of the site. Groundwater flow is to the south, from MW 1 towards MW3. Levels at MW3 were just slightly over the Ambient Water quality guidance values. Levels will naturally attenuate over time. No Further Action. Spill Closed "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 08/31/2005 - Feng - Project transferred from Vought to Feng. 10/18/2005 - Feng - Spill#: 04-06908 has been consolidated into this spill#. 10/24/2005 - Feng - Subsurface Investigation Report, dated 9/15/2003. One (1) monitoring well, W-4, was installed downgradient from MW-2 to a depth of 35' below grade. (4 drill refusal shown on site plan). Boring log indicated strong odors and heavy staining in soil at the depth of 25' - 27'. Analyticals show clean soil of this boring. however, highly contaminated in groundwater. 23,900ppb MTBE, 908ppb Benzene, 477ppb Toluene, 1,310ppb Ethylbenzene, 8,120ppb total Xylene, 137ppb Isopropylbenzene, 394ppb n-Propylbenzene, 982ppb 1,3,5-Trimethylbenzene, 3,040ppb 1,2,4-Trimethylbenzene, 1,130ppb Naphthalene and 301ppb tert-butylbenzene. 10/24/2005 - Feng - Semi Annual Monitoring Report, 7/2004 - 12/2004. 4 monitoring wells onsite, groundwater flow to southwest. no free product. Enhanced Fluid Recovery (montly) on W-2 and W-4. W-1 and W-3 are in relatively low concentration. W-2 is high as 13,236 ppb BTEX and 22,200 ppb MTBE on 8/10/2004, 7,237.6ppb BTEX and 721ppb MTBE on 12/6/2004. W-4 is decreasing, 7,223.4 ppb BTEX and 82,500 ppb MTBE on 8/10/2004, 402.8ppb BTEX and 122ppb MTBE. 12/8/2005 - Feng - Letter to Scott Cunningham (Tyree) for getting the sidewalk permit to install monitoring wells downgradient of W-2 and W-4. Specific work to be performed: monitoring wells *The installation of monitoring wells in sidewalks along Albany Crescent and Bailey Ave across from the above referenced property. . 4/10/2006 - Feng - emailed to Scott Cunningham requesting the status of installation of monitoring wells. (RJF) 4/11/2006 - Feng - Reply from Scott Cunningham I was able to complete drilling in late December 2005 at this site. Delineation was difficult due to the firestation across the street from this site. I did have three wells installed (one on Bailey Avenue, one on Albany Crescent Avenue, and one on the intersection of those two streets) but unfortunately, the surrounding buildings, along with the firestation made it extremely difficult to get fully delineated. No wells were installed across the street from the site. 4/28/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. The site is an active gasoline retail/service station. Groundwater flows to southwest at the depth of 25.70' to 27.30' below grade. 7 monitoring wells onsite. W-1, BTEX BDL, 379 ppb MTBE. W-2, increased and 8,411.4 ppb BTEX, increased and 659 ppb MTBE. W-3, both BDL. W-4, increased and 6,398.1 ppb BTEX, increased and 3,550 ppb MTBE. W-5, BTEX BDL,

119 ppb MTBE. W-6, 382 ppb BTEX, 462 ppb MTBE. W-7, 620.3 ppb BTEX, 20,100 ppb MTBE. EFR done quarterly. (RJF) 4/28/2006 - Feng - Emailed to Scott Cunningham for further delineation around W-7, attached with well location siteplan. (RJF) 5/1/2006 - Feng - Email from Scott Cunningham The EFR events were conducted in 2005 and I did not remove the comment from the bottom of the cover page on the quarterly reports, but there are no EFR events scheduled for 2006. It will not be on the cover page any longer. As far as the additional monitoring well installations you noted on the site map, I do not know what purpose they would serve right now. The levels in MW-4 and MW-7 are elevated and we know where the source of the spill was, which way the groundwater flows, should we wait on the two (or more) new wells until we are closer to closure on this site? I was thinking that we would install monitoring wells closer to the source as the levels decreased in the wells near the perimeter. With the new data we have obtained, I am not sure new monitoring wells are the answer here. I am pretty sure right next to the source would have high levels according to the levels in MW-4 and MW-7, are you concerned with how high they would be right now? Let me know if you agree. 5/1/2006 - Feng - Emailed to Scott Cunningham Yes, I was interested to know what is there upgradient of W-7 for its low BTEX and high MTBE concentration and the plume extent in northeast side for W-3 is away from the plume. If you don't think these two wells are not necessary to delineate the plume, then please submit RAP to treat the contamination. (RJF) 11/15/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 8/2006, by Tyree. Active gasoline retail/service station. Groundwater sampled and gauged 8/21/2006. 7 monitoring wells. DTW 26.02' to 27.48' bg. Flow direction southwest. No LNAPL. BTEX range ND to 5,067 ppb (MW-2). MTBE range ND to 1,630 ppb (MW-7). (RJF) 12/1/2006 - Feng - RAP, 11/22/2006, by Tyree. Tyree proposed EVFR events on MW-2 and MW-7 quarterly. The surrounding monitoring wells will be bonitored for fluctuations in the static level of the wells before and after the quarterly EVFR event, and the Radius of Influence will be determined. Tyree forwards a site plan with current tank location. The new tanks were installed in the same area where the former 550 gallon tanks used to be. Suggested Tyree to try different vacuum level to determine an effective ROI. The RAP is approved. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Quarterly EVR to address the contamination at SW portion of the property. (RJF) 2/7/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 12/2006, by Tyree. Groundwater sampled 11/21/2006. 7 monitoring wells. DTW 25.8' to 27.45' bg. Flows southwest. No LNAPL. MW-1, BTEX BDL, 116 ppb MTBE. MW-2, 3,553 ppb BTEX, 21.9 ppb MTBE. MW-3, BDL. MW-4, 1,760 ppb BTEX, 27.9 ppb MTBE. MW-5, BTEX BDL, 19.3 ppb MTBE. MW-6, 123.12 ppb BTEX, 73.2 ppb MTBE. MW-7, 722 ppb BTEX, 4,150 ppb MTBE. (RJF) 6/19/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 3/2007. Groundwater sampled 3/9/2007. 7 monitoring wells. DTW 26.31' to 28.06' bg. Flows to southwest. No LNAPL. MW-1, 0.64 ppb BTEX, 87.5 ppb MTBE. MW-2, 6,837 ppb BTEX, 57.4 ppb MTBE. MW-3, BDL. MW-4, 4,713 ppb BTEX, 232 ppb MTBE. MW-5, BTEX BDL, 11.3 ppb MTBE. MW-6, 213 ppb BTEX, MTBE BDL. MW-7, 1,014 ppb BTEX, 1,090 ppb MTBE. 7/10/2007 - Feng - Quarterly Monitoring Report, 3/2007 - 5/2007, 5/2007. Groundwater sampled 5/11/2007. 7 monitoring wells. DTW 24.77' to 26.04' bg. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Tyree and Delta. Surrounding properties sketch. Survey the wells, contour next quarter. May need to do deileation downgradient. Calculate the EFR results. (RJF) 5/6/2009 - Quarterly Monitoring Report, 4/2008 - 7/2008, 9/2008, by Tyree. Active gasoline retail service station. Groundwater was gauged and sampled 7/31/2008. 7 monitoring wells. DTW 26.62' to 28.06' bg. Flows to southwest. NO LNAPL. BTEX range ND to 5,481 ppb (W-2). MTBE range ND to 2,570 ppb (W-7). (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active gasoline retail service station. Groundwater was gauged on 6/11/2009, 7/21/2009 and 8/20/2009. 7 monitoring wells. NO LNAPL. DTW 24.04' to 27.56' bg. Flows to south. Groundwater sampled on 6/11/2009. BTEX range ND to 6,709 ppb (MW-2). MTBE range ND to 116 ppb (MW-7). 6 EFR events are scheduled for this year. (RJF) 3/18/2010 - Reviewed Investigation Work Plan, dated 2/12/2010, by Tyree. Tyree proposes to install 6 soil borings around south corner of the site, soil samples to be collected only. 2 wells are also proposed to be installed across Albany Crescent Road. Comments to Tyree asking for groundwater samples from SB-101 and SB-104 to see the extent of the groundwater contmaination. Revised work plan within 30 days. (RJF) 3/22/2010 - Tyree email explaining the reasons why not to take groundwater samples from SB-101 and SB-104. The objectives of the work plan are to determine the residual soil contamination and offsite migration, if any. Tyree requests DEC to reconsider the sampling of groundwater from SB-101 and SB-104. 3/29/2010 - Approve IWP proposing 6 soil borings collecting only soil samples and 2 monitoring wells across Albany Crescent Road. Investigation report by 6/2010. (RJF) 6/3/2010 - 1Q2010, 1/2010 - 3/2010, 5/2010, by Tyree. Monthly gauging and quarterly sampling. The groundwater was sampled on 3/18/2010. NO LNAPL. DTW 25.79 (MW-1) to 27.23' (MW-3). Flows to southwest. BTEX range ND to 2,172 ug/L (MW-4). MTBE range ND to 78.5 ug/L (MW-7). 6 VEFR events were conducted in 2009. The site investigation including 6 soil borings and 2 downgradient wells are being scheduled. FDNY permission to access area received from FDNY on 4/1/2010. 12/13/2011 - Reviewed 3Q2011, 11/2011, by Tyree. 9 wells were gauged and sampled. No product. Flows to west. High BTEX concentration in MW-2, 7,981 ug/L BTEX. MW-4, 3,188 ug/L BTEX. 2/1/2012 - KGH meets with R2 staff to discuss Getty Bankruptcy Case and closure petitions. 3/8/2012 - Reviewed 4Q2011 Report from Tyree which included their latest request for closure. As evidenced by this chronology, Tyree/Getty has conducted a long-term effort to meet groundwater standards across this site. A low-level (primarily xylene)exceedence persists in the area of MW-2. More than likely this is due to residual trapped in the

shallow bedrock of the area. Surrounding wells demonstrate that groundwater attenuates naturally in a very short distance and is not an off-site threat. The NYSDEC accepts the Tyree/Getty motion that they have done all that is feasible under the circumstances. Therefore, the Department is requiring No Further Action at this time. Spill is being closed as currently Not Meeting Standards. Additional data may be submitted in the future for consideration of an upgrade in closure status. NFA - KGH"

DEC Region: 2
DER Facility ID: 93669
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT NO REGISTRATION FOR 2376.3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 7/20/04-Vought-Changed site address from 2376 to 2375 Jerome Avenue. File review by Vought: See also closed spills: 9604011, 9606024, 9613200 and 9613206 at same location. Letter from DEC ODowd to Getty (Hanley)-2/11/97. The Department is mandating that the following work be done within 10 days: 1)full system precision testing of existing underground storage tanks 2)pumping out of product from service station drainage ports 3)an underground injection control investigation to determine the endpoints of the drains 4)determine if any 550 gal USTs exist at this site, their status and registration of them with the PBS Unit. Emergency Spill Response Report-Feb 1997. NYFD responded to complaints made by residents of nearby buildings of gasoline odors. Spill as result of a fuel delivery overfill. In order to mitigate a hazardous condition at the time for the spill, the excess fuel was flushed through drains and ultimately found it's way into the municipal sewer system . Operational tanks include two (4000-gallon) and one (2000-gallon) gasoline USTs, Twelve (12) 550-gallon underground storage tanks previously abandoned in place are located to the east of the station building adjacent to Jerome Avenue. Two pump islands located along Jerome Avenue. A dye test and sewer inspection were performed. Storm drains on property had solid walls and bottoms . The discharge from both storm drains showed dye entering the sewer manhole located on west 184th Street . Tank tests were performed and passed for operational USTs. Letter from NYFD to Getty (Hanley)-3/18/97. You are therefore ordered to discontinue all motor fuel deliveries until approval has been given by this Department to resume . Tank Closure Report (Tyree)-August 1998. Reason for tank closure was property divestment. Apartment buildings located adjacent to the site to the west and a commercial building located to the north of the site . Removal of one (550-gallon) waste oil UST, two (4000-gallon) gasoline USTs and one (2000-gallon) gasoline UST. Twelve endpoint soil samples

S102232691

were collected. No soil for disposal was generated during the tank closure work . Soil analyticals show 171ppb MTBE(CTB2), 9930ppb ethylbenzene(DTB1), 24900ppb xylene(DTB1), 8480ppb MTBE(DTB1), 7061ppb xylene(DTB1) and 15700ppb MTBE(DTB1). Soil analyticals also show minor SVOC exceedences attributable to fill material. Quarterly Monitoring Report (Tyree)-June 1999 thru June 2001. Four monitoring wells onsite. Groundwater at depths of 9-11' below grade and flow to the west-southwest. Total Phase High Vacuum Extraction performed monthly on all four wells from Jan 2000 thru Dec 2000. June 2001 groundwater analyticals show 7.25ppb benzene(W2), 764ppb MTBE(W2), 107ppb benzene(W3), 71.6ppb benzene(W4), 20.4ppb toluene(W4), 169.8ppb xylene(W4) and 149ppb MTBE(W4). Request for No Further Action (Tyree)-9/6/01. Quarterly Monitoring Report (Tyree) July 2001 thru Dec 2002. Quarterly gauging and sampling and semi-annual reporting. Four monitoring wells onsite. Groundwater at depths of 9-11' below grade and flow to the west-southwest. Request for No Further Action (Tyree)-7/9/02. Tyree will continue monitoring activities on a quarterly basis until said letter is received . Semi-Annual Monitoring Report (Tyree)-Jan 2003 thru June 2004. Four monitoring wells onsite. Groundwater flow to the west and at depth of 9-10' below grade. Semi-annual gauging and sampling. Current site status is Perez Communications and Electronics . Parking lot to the north, commercial property to the east and residential apartment buildings to the west and south . Geoprobe Workplan (Tyree)-5/27/04. Proposal for the installation of 7 or more borings: from the former underground, gasoline storage tanks and throughout the site property . Soil and groundwater samples will be collected. Unless you indicate otherwise, Tyree will proceed with the work mentioned above on June 4th 2004. 7/22/04-Vought-File review continued: Investigation Report (Tyree)-6/28/04. Three Geoprobe borings performed. Groundwater encountered at 10'. Only three out of eight borings (B-2, 5 and 6) were installed because the manager of the property was not cooperative and would not let us advance the other five borings (B-1,3,4,7 and 8). If additional work is required, Tyree also requests that a letter be sent to Mr. Perez at: Mr. Perez Perez Communications and Electronics, Inc. 2375 Jerome Avenue Bronx, NY 10468 Ph 718-329-2744 Vought called Perez from phone number obtained via public information. Phone number disconnected. Vought spoke to Dave Pachan and he has same number as information. 7/23/04-Vought-Left message for Pachan inquiring as to Mr. Perez's first name for failure to cooperate letter. Vought also sent cooperation letter to Perez Electronics and cc'd Getty Properties. 9/3/04-Vought-Sent Stipulation Agreement with due date of 10/04/04 which includes requirements of: 1)well installation downgradient of B5/B6, adjacent to southern pump island, at proposed boring location B3, B7 and B8 from 5/27/04 proposal 2)surrounding area site plan. 10/15/04-Vought-Sent Tyree Delta email for STIP status. 12/1/04-Vought-Received email from Paul Lindell. Developer contact info is Joey Rishty (732-897-0400, 908-309-882). The delay in executing the Stipulation Agreement for this site is due to the pending construction plans of Joey Rishty . Since we dont not know the exact location of the proposed structure and the foundation details, we cant move forward with a subusrface investigation since we wont know where to place our borings/wells, how much if any impacted soil will be encountered and how construction will affect our remedial plans for this site . Vought called Rishty for contact information and was told to call back. 12/2/04-Vought-Called Rishty

GETTY (Continued)

S102232691

for contact information and left a message to return call. 12/3/04-Vought-Received message from Rishty requesting copy of DEC's requirements. Vought faxed him copy of 9/3/04 Stipulation Agreement and required him to call back upon review. 12/14/04-Vought-Called Rishty for address to send letter requiring stip compliance prior to development: Joseph Rishty CTK Realty LLC. PO Box 77 Allenhurst, NJ 07711 ph: 732-897-0700 cell:908-309-8822 Fax: 732-897-0475 Vought faxed copy of Getty Stipulation and requirement letter and sent hardcopy via mail. Getty cc'd on requirement letter to Rishty. Vought sent email and fax to Delta and Tyree requesting status of overdue Stip and site meeting. Vought also sent letter to developer requiring adherence to STIP prior to development. 1/21/05-Vought-Quarterly Monitoring Report (Tyree)-Four monitoring wells onsite. Groundwater at depth of 9-10' below grade and apparent groundwater flow to the west. Site on semi-annual monitoring. Groundwater analyticals show 10.5ppb benzene(MW2), 956ppb MTBE(MW2), 53.2ppb benzene(MW3), 118ppb MTBE(MW3), 39.3ppb benzene(MW4), 20.4ppb toluene(MW4), 50.1ppb ethylbenzene(MW4) and 265.2ppb xylene(MW4). DEC requires: 1)quarterly monitoring reports (as opposed to semiannual) 2)Well installation at former boring locations B3, B7 and B8, adjacent to southern pump island and downgradient of B5 and B6 3)surrounding property sketch 4)determination of actual groundwater flow 5)development schedule and properties intended use 6)signing of STIP 7)vapor barrier/passive ventilation system. Site visit on 1/21/05 with Lindell, Hatcher and Rishty. Meeting resulted in: 1)Getty will sign Stipulation 2)Getty will perform hotspot excavation of soil and associated endpoint sampling 3)no basement will be included in retail stores and foundation depth will go to 3'bg 4)vapor barrier will be installed onsite 5)Getty will install four monitoring wells in sidewalk (two in Jerome and two downgradient on West 184th Street) 6)Quarterly reports will be submitted 7)groundwater flow submitted (to the west) is actual groundwater flow. DEC no longer requires well installation at B3, B7,B8 and adjacent pump island due to soil excavation of hotspots, development plans and agreement to install downgradient wells from these locations. Vought sent Lindell and Hatcher copy of NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York dated October 2004. 2/18/05-Vought-Stipulation implemented by Kunkel with 2/10/05 date. Vought faxed and sent copies to Shea, Lindell and Hatcher. 7/6/05-Vought-New file review by Vought: Groundwater Investigation (Tyree Cunningham)-4/6/05. Eight geoprobe borings, collection of soil and groundwater samples and seven soil gas samples. Soil gas analyticals show max of 706ppb benzene(SG5), 34ppb toluene(SG2), 100ppb ethylbenzene(SG6), 104ppb xylene(SG2), 980ppb MTBE(SG3). Soil analyticals show: 101000ppb ethylbenzene(B1 9-10'bg), 256000ppb xylene(B1 9-10'bg), 398ppb benzene(B2 9-10'bg), 17500ppb toluene(B2 9-10'bg), 121000ppb ethylbenzene(B2 9-10'bg), 782000ppb xylene(B2 9-10'bg). Excavation Report (Tyree Cunningham)-6/30/05. No samples were collected from the bottom of the excavation due to the presence of groundwater in the hole . No bottom samples were collected due to groundater. A total of 1016.5 tons of soil were removed from the site. Soil analyticals show: 46500ppb ethylbenzene(EX1 South), 24140ppb xylene(EX1 South), 569ppb MTBE(EX1 South), 8820ppb ethylbenzene(EX2 North), 9668ppb xylene(EX2 North), 1280ppb benzene(EX2 South), 32000ppb toluene(EX2 South), 951000ppb xylene(EX2 South), 19800ppb ethylbenzene(EX2 East), 57600ppb xylene(EX2 East), 10800ppb toluene(EX2 West), 44900ppb ethylbenzene(EX2 West), 306000ppb xylene(EX2 West). DEC requires:

1)Submission of RAP prior to building approval so that remedial system (if necessary) can be located. 2)installation of vapor barrier and mitigation system due to soil gas detections of BTEX in areas not excavated 3)delineation of groundwater contamination. Vought called Lindell to discuss and sent email with same. Vought called Rishtey who assured Vought that no construction will take place prior to DEC approval. 7/22/05-Vought-Received message from Rishtey that additional 500 tons of soil are going to be excavated by Tyree. Vought called Rishtey and agreed to additional excavation. 8/8/05-Vought-Notified Rishtey, Lindell and Hatcher that Imdad Islam will be new PM. Vought spoke to Rishtey who said that excavation has already taken place. 8/22/05- Responded as follows to Paul Lindell's email asking for Dept. permission to proceed with the site development work for constructing residential building at the site: Dear Mr. Lindell, In reponse to your email and as a follow up of and further to our telephone discussion today, pls make a note of the following issues: 1. The site's historical investigation results show that both soil and groundwater at the site have been impacted by petroleum-related contamination. Some contaminated soil has been excavated and removed so far from the site, and it appears more contaminated soil may exist. 2. Even though the groundwater contamination was detected long time ago, no remedial measures have been taken other than monitoring. However, the monitoring data reveals that dissolved phase residual contamination still exist. 3. A complete and precise delineation of the extent of petroleum contamination to soil and groundwater has not been done as yet. 4. Under the above situation and as per signed Stipulation Agreement, the Dept. requires a detailed Investigation Summary Report along with a proposed recommended Remedial Plan both for soil and groundwater. 5. The Dept. may not allow to proceed with any development work on the site without any approved and pragmatic remedial system in place. Plllease contact me if you have any questions or concerns. Sincerely, Imdadul Islam 8/24/05- Went for a site visit today and met Paul Lindell (Delta), Paul Hatcher & Scott Cunningham (Tyree) at the site. Issued a letter requiring ISRP submission by the end of Sept./05.-II 9/8/05- Received the followng email from Paul Lindell. Imdad- We are in receipt of your letter dated August 24, 2005. Tyree is nearly complete with its remedial proposal and is attempting to get the required ground water delineation drilling conducted next week. I hope to have their draft of the proposal tomorrow. Once I have completed my review of the remedial proposal I will forward for your review and comment. At this point, we will most likely base our remedial proposal on the most recent ground water data obtained from the wells on site. We can validate the proposal once the delineation data is in. Regarding the deadlines associated with the Stipulation Agreement, we kept Jeff Vought appraised on the progress of this investigation and the various hurdles we encountered with moving this investigation forward. He acknowledged the difficulties and appreciated the updates and was fine with the delays encountered. I and Tyree will continue the updates going forward. Regards, Paul 11/14/05- The site being Getty's property, spill case is reassigned to Rui of Joe-Sun's group. 12/8/2005 - Feng - Email from Paul Lindell (Delta) inquired the status of this site. They submitted the RAP. This site was issued a violation for excavation at the site by Department of Building. And asked for recommendations and comments for the submitted RAP before new year. 12/14/2005 - Feng - Reviewed the file. The site will be developed as a commercial building on top

GETTY (Continued)

S102232691

of the site. There are 2 (30 FT DIAMETER) CRATERS APPROX 6-8 FT IN DEPTH CAUSING REMAINING LEVEL PAVEMENT TO CRACK & (FORMER GAS STATION) SINK. REMEDY: MAKE ALL REPAIRS . A. In the Subsurface Investigation Report, dated June 28, 2004, Tyree stated that three (3) borings were performed on 6/14/2004. B-5 and B-6 which located downgradient from the former pump island were found high BTEX concentration in groundwater. The groundwater sample collected from B-5 indicated to have 268 ppb Benzene, 54.8 ppb Toluene, 1,960 ppb Ethylbenzene and 5,909 ppb Total Xylenes. Furthermore, groundwater sample collected from B-6 was detected to have 27 ppb Benzene, 17 ppb Toluene, 2,260 ppb Ethylbenzene and 7,610 ppb Total Xylenes. B. In the Subsurface Investigation Report, dated April 6, 2005, Tyree mentioned that they performed a groundwater investigation consisting of eight (8) soil borings . In fact, only soil and soil gas samples analytical results were presented in the report. The soil samples collected from locations B-1 and B-2 at depth of 9-10 feet below grade revealed extremely high concentration. C. In Post Excavation Report, dated June 30, 2005, Tyree reported has performed a limited contaminated soil excavation on the property on June 15, June 16, and June 20. Soil samples taken from Ex-2 South at eight (8) feet below grade on 6/20/2005 revealed elevation of 1,140,410 ppb BTEX. D. In Post Excavation Report, dated August 9, 2005, Tyree reported has performed a limited contaminated soil excavation on the property on July 22 and July 25, 2005. Soil samples taken from Ex-2 South at eight (8) feet below grade on 7/25/2005 revealed elevation of 1,014,720 ppb BTEX. E. In the Subsurface Investigation Report, dated September 29, 2005, nine (9) borings were performed on 9/21/2005. Among these borings, five (5) were around the property and four (4) on the sidewalk. Up to 1,300 ppb MTBE found in GP-3 groundwater sample, and 1,176 ppb BTEX found in GP-8 groundwater sample. 12/16/2005 - Feng - Email to Scott Cunningham (Tyree) with comments above and requested: 1) Groundwater/soil concentration locate where the future building will be locate, i mean the samples collected upon reaching the terminus of the foundation excavation. 2) Groundwater/soil concentration or endpoint samples of the excavations, i mean when removing the contaminated soil off the site. 3) Dimensions of the excavations. 4) Construction detail and vapor mitigation of the building, like vapor barrier and ventilation system design. 12/21/2005 - Feng - Email from Scott Cunningham (Tyree) and said would send the monitoring reports over. 12/29/2005 - Feng - Formally rejected the RAP (proposed MNA). Received the monitoring reports. Reviewed RAP and the entire file that submitted by Tyree. Tyree proposed Monitored Natural Attenuation for the site. This site is going to develop and a commercial building will be on top of it. Basically, this site has not enough groundwater information for the area where the future building locate, extremely high soil concentration was observed even after excavation. RAP rejected and requested: 1) delineation of the groundwater contamination on where the building locate. 2) construction detail and vapor mitigation design. 3) propose another RAP. (RJF) 1/4/2005 - Feng - Quarterly Monitoring Report, 8/2005 - 10/2005. 3 monitoring wells locate in 3 corners of the site. W-2, 14.4 ppb BTEX and 949 ppb MTBE. W-3, 8.98 ppb BTEX and 86.6 ppb MTBE. W-4, not accessible. 2/13/2006 - Feng - Reviewed the construction details (drawings submitted by Just Architecture) on 2/10/2006. Emailed to Scott Cunningham (Tyree) requested vapor barrier specification since it wasn't on the drawings. And asked about the status of extending passive venting pipe to Ex.1 and application of ORC. (RJF) 2/24/2006

- Feng - Approve via email the installation of Passive Vapor Extraction System in area of Ex 2 (letter 1/19/2006, drawing attached), and the application of ORC in area of Ex 1 (letter 2/22/2006) to address the soil contamination in these area that couldn't be removed off the site anymore due to location problem. Still need the vapor barrier detail, thickness and material, etc. and the weight of ORC that going to be used. (RJF) 3/17/2006 - Feng - Approve the installation of vapor barrier system Griffolyn Type-65 and thickness of 8 mil (email from Just Architecture, 3/14/2006). Since there is no basement, and contamination is mainly in the soil below south sidewalk which cannot be removed, and water table at 10'-12', so thickness of 8 mil was approved. letter sent to Kevin Shea (Getty Properties) and CC to Tyree. (RJF) 8/28/2006 - Feng - Update from Paul Lindell (Delta), the remedial work is held by the developer now. The NYC Buildings Dept has issued another violation because of the property condition. Getty could only do their work when the developer has done certain things on his site. (RJF) 10/17/2006 - Feng - Quarterly Monitoring Report, 5/2006 - 7/2006, 7/2006, by Tyree. DTW 9.49' to 10.57' bg, flow direction west. No LNAPL. BTEX range from non-detect to 367.1 ppb. MTBE range from non-detect to 245 ppb. (RJF) 11/13/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 10/2006, 10/2006, by Tyree. Groundwater sampled and gauged 9/25/2006. 2 monitoring wells. MW-1, MW-2, MW-3, MW-4, MW-5 and MW-6 were destroyed during the excavation 6/2006 and 8/2006. DTW 10.71' to 11.20' bg. Flows to west. No LNAPL. MW-7, 1,016.44 ppb BTEX, 4.81 ppb MTBE. MW-8, BDL. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Construction started. PVES will be installed after developer constructs the proposed building on the site. 9/19/2006 ORC Advanced solution applied to the contaminated soil. (RJF) 5/10/2007 - Feng - Spoke to D. Madigan (Tyree). The building is up and the vapor barrier was installed. A passive well was installed and will be connected to the building this week. (RJF) 11/6/2007 - Feng - Reviewed the spill closure request, letter from Tyree dated 6/14/2007. Tyree performed the ORC application and the installation of the PVES at the proximity of north sidewalk of West 184th Street. Vapor barrier installed for the new building. But the latest submitted quarterly report of 10/2006 indicated the groundwater concentration of 1,016 ppb BTEX in the MW-7. Spill closure request denied and additional work required to conduct at the MW-7 area. Work plan due 12/21/2007. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. Monroe college campus is opened onsite. Tyree will grab water samples (GeoProbe) from MW-7 area. (RJF) 8/6/2008 - Reviewed the Subsurface Investigation Report dated January 2008, by Tyree, pdf copy via email. On 12/3/2007, 2 soil borings were advanced in the vicinity of former MW-7 using GeoProbe. Soil was screened began at 5 feet bgs until groundwater was met at 11 feet. No PID readings. 2 soil samples were collected at 5'-10' bg. Soil analyticals are ND. 2 groundwater samples were taken and slight VOCs exceedances were detected. B-1, 2.2 ppb benzene. B-2, 11.6 ppb benzene, 11.4 ppb MTBE. Tyree requested spill closure. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. Need old hydrographs. Will review the closure petition. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Petition for closure with updated maps, contours and hydrographs for historical data by 1/2009. (RJF) 12/14/2009 - Reviewed Spill Closure Request, dated 6/12/2009, by Tyree. Email Tyree comments, in eDoc. Resubmit the closure request by

1/2010. (RJF) 11/2010 - (KGH) Getty Petitions R2 for Spill Closure
12/2011 - (KGH) Central Office BTS(Hale)is requested to assist OGC
with coordination of DEC response to Notice of Bankruptcy Filing:
Chapter 11, CaseNo.: 11-15606 Getty Petroleum Marketing, Inc.,et al.
BTS is also provided with a list of 15 spill numbers for which Getty
has petitioned but not yet received closure. KGH begins review of
files available in EDOCs. 2/1/2012 - KGH meets with R2 staff to
discuss Getty Bankruptcy Case and closure petitions. Consensus of
senior staff is that Spill # 97-02759 has been addressed to the
extent feasible and it was appropriate to consider closure. 2/8/12 -
KGH - an overfill during delivery in 6/1997 caused a surface spill of
gasoline into the sewer system which resulted in vapor impacts to
neighboring buildings. This was quickly resolved by NYFD. Subsequent
investigation by DEC identified significant petroleum soil
contamination which was excavated in 2005 to the extent feasible.
Approximately 1500 tons of soil was removed. The site was redeveloped
in 2007 and vapor mitigation (barrier and passive vent) was
engineered into the new construction. Inaccessible residual soil
contamination may remain but will biodegrade over time. GW
concentrations have steadily decreased since source removal and were
very close to drinking water standards when last sampled in 2008. The
Department is requiring No Further Action at this time. Spill is
being closed as currently Not Meeting Standards. Additional data may
be submitted in the future for consideration of an upgrade in closure
status. NFA"

Remarks: "AREA IS GOING TO BE EXCAVATED AND TESTED."

 Town: New York City
 Record Added Date: 09/27/2016
 Record Updated Date: 11/03/2016
 Update By: SXDEWES
 Site Description:

Location: The site is located in an urban area at 2409 Jerome Avenue in the Fordham Heights neighborhood of the Bronx. The site is identified on the New York City Tax Map as Block 3199, Lots 106 and 113. The site is bound by a 2-story commercial building (2415 Jerome Ave) followed by West Fordham Road to the north, Jerome Avenue to the east, a 2-story academic facility (2375 Jerome Avenue) followed by West 184th Street to the south, and a 5-story multifamily residential buildings (2390-2410 Davidson Avenue) followed by Davidson Avenue to the west. Site Features: The site is rectangular shaped and encompasses an approximate area of 25,200 square feet. The proposed site is comprised of an asphalt-paved parking lot and two 1-story structures used for auto repair. The topography of the site generally slopes to the east. An NYCTA elevated structure (the "4 & -line") is east of the site, above Jerome Avenue. The transit structure is offset approximately 28 feet from the east property line. Current Zoning and Land Use: The proposed site is located within residential zoning district R7-1 with a C2-4 commercial overlay. R7 districts are classified as medium-density apartment house districts. The district has a maximum floor area ratio (FAR) of 3.44. The surrounding parcels are located in residential and commercial zoning districts. Past Use of the Site: The site was used as a fuel dispensing station and auto repair facility from 1927 to 1989, greasing and auto laundry facility (circa 1945 to 1989), and auto repair facility from 1927 to the present. Thirteen closed 550-gallon gasoline underground storage tanks (UST) and one closed 4,000-gallon gasoline UST were associated with the former fuel dispensing station. The thirteen closed 550-gallon USTs and closed 4,000-gallon USTs were installed in December 1968 and December 1978, respectively. Based on the NYSDEC petroleum bulk storage (PBS) records (PBS # 2-188492) and an interview with site personnel, these USTs were decommissioned and removed from the site between 1988 and 1991. A petroleum spill (Spill No.: 88-05383) was reported to the NYSDEC during the removal of a UST in September 1988 when an unknown amount of gasoline was released into surface soil and groundwater. The spill was subsequently closed by the NYSDEC in February 1989. Site Geology and Hydrogeology: The subsurface strata consists of a layer of historic fill material that extends to depths of up to 9 feet bgs followed by native soil

andbedrock. The historic fill consists of brown-black, medium to fine sand with varying amounts of silt, clay, gravel, and debris. Native soil consisting of a layer of gray-brown clay with varying amounts of sand and silt, followed by a layer of brown-black, medium to fine sand with varying amounts of gravel, silt, and clay was encountered beneath the historic fill layer. Bedrock, consisting of fine-grained biotite-quartz gneiss, is present at about 15 to 18 feet bgs across the site; bedrock is weathered near the contact with overlying soil in isolated locations. Depth to groundwater ranges from about 9.63 to 10.00 feet bgs. The poor recharge experienced during groundwater sampling likely indicates groundwater is perched on bedrock. Groundwater is expected to flow to the west towards the Harlem River, which is located about 3,000 feet west of the proposed brownfield property.

Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

FINDS:

Registry ID: 110004528093

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 04/21/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 04/21/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

North Map:	5940553 YONKERS, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3604970081F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of TRC Environmental Consultants on May 23, 2017.

TARGET PROPERTY

Landing Road
Bronx, NY 10468

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 300 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

Deed Exhibit 1

QUITCLAIM DEED

THIS QUITCLAIM DEED, made as of the 1st day of June, Nineteen Hundred and Ninety-nine (1999), between CONSOLIDATED RAIL CORPORATION, a Pennsylvania corporation, whose mailing address is Two Commerce Square, 2001 Market Street (19-B), P.O. Box 41419, Philadelphia, PA 19101-1419, hereinafter called "Grantor", and NEW YORK CENTRAL LINES LLC, a Delaware Limited Liability Company, whose tax and mailing address is 500 Water Street (J-910), Jacksonville, FL 32202, hereinafter called "Grantee", WITNESSETH:

(Wherever used herein, the terms "Grantor" and "Grantee" may be construed in the singular or plural as the context may require or admit, and for purposes of exceptions, reservations and/or covenants, shall include the successors and assigns of each.)

WHEREAS, as part of a plan of corporate reorganization, Grantor has created Grantee as its wholly owned subsidiary; and

WHEREAS, as part of that plan of reorganization, Grantor has agreed to a tax free contribution to the capital assets of Grantee of certain real estate interests, including lines of railroad thereon, in several states within the United States and certain provinces in the Dominion of Canada;

NOW THEREFORE, KNOW ALL MEN BY THESE PRESENTS, THAT, for and in consideration of the premises above, Grantor does hereby GRANT, CONVEY, RELEASE, REMISE and forever QUITCLAIM unto Grantee, all right, title and interest of Grantor in and to certain portions of Grantor's railroad rights-of-way and real property, operating or nonoperating and regardless of width, including any permanent easements for rail carriage, railroad use and purposes, located, within three (3) Segment(s) in the County of Bronx, New York, and consisting of 3.56 miles of right-of-way, and 64.51 acres, more or less, collectively designated "the Premises";

ALL as generally shown on Exhibit A, and more particularly described on Exhibit B, with Beginning and Ending Points of each Segment shown on Exhibits B-1 through B-6, all of which are attached hereto and incorporated herein;

NOTE: Reduced prints of each Valuation Section Map referenced herein are attached hereto and incorporated herein as collective Exhibit C; print reduction may alter any scale stated on such Maps.

TOGETHER WITH: (a) all buildings, structures, fixtures and improvements on the Premises, in "as is, where is" condition, including but not limited to all tracks, rails, ties, ballast, grading, switches, crossings, bridges, trestles, supports, culverts, signals, crossing diamonds and protection devices, radio antennae, communication lines, poles and facilities, loading platforms, depots, and any other associated structures, that are affixed as of the date of this deed to the Premises, (b) all strips and gores, (c) all and singular the rights, alleys, ways, waters, minerals and mineral rights, timber and timber rights, air rights, hereditaments, franchises, privileges, advantages and appurtenances to the same belonging or in anyway incident or appertaining, including any items, rights or interests retained, excepted or reserved in any post-acquisition conveyances, (d) all reversions, remainders, rents, issues and profits thereof, (e) any easements for support or retention rights in streets, waterways or adjacent lands, (f) any rights to cross any river, stream, creek or other body of water within the Premises, or to cross or lay tracks in any streets adjacent to or connecting parcels herein conveyed, (g) all right, title and interest of Grantor, or any predecessor of NY. BRONX CO.

Grantor in the Premises, created and/or held by the hostile, actual, visible, exclusive and notorious occupation of any portion thereof for a continuous period of twenty-one (21) years or more prior to the date of this Deed, (h) all connected and/or contiguous sidetracks, spur tracks, lead tracks and yards, and facilities thereon, and (i) all contracts, leases, licenses, agreements, and all rights in and third party easements or occupations in, on, under, over or along the Premises;

It being the intent of this Deed to include all right, title and interest held by Grantor in and to any lands and improvements within said County, between said Beginning Point and said ending Point, whether in any recorded or unrecorded deeds (other than identified in Exhibit B);

TO HAVE AND TO HOLD the Premises, all remised, released and quitclaimed herein, and the appurtenances thereto, and all the estate, right, title, lien, interest and claim whatsoever of Grantor therein, either in law or equity, unto the proper use, benefit and enjoyment of Grantee, Grantee's successors and assigns, forever, including the continuation of operation of a line of railroad thereon;

SUBJECT TO: (A) reservations, exceptions, easements, covenants, restrictions and limitations of record or platted affecting the same; (B) any existing rail crossings, public utilities and roadways; (C) any, pipes, wires, poles, cables, conduit, culverts, drainage courses or systems (and appurtenances) now in, on, under, over or across the same (and any contracted rights to retain, same); (D) any streams, rivers, creeks or other navigable waterways passing under or across the same; and (E) any agreements for location and use of fiber optic cable, conduit and related facilities in, on or along a portion of the Premises (the "Fiber Optic Agreement(s)").

THIS INSTRUMENT is executed and delivered by Grantor, and accepted by Grantee, subject to the covenants set forth herein, which shall be deemed part of the consideration of this conveyance and shall be in lieu of any rights, rule, law, custom or statute of the State of New York, now or hereafter in force with respect to any covenants. Grantor, however, does warrant and covenant to assign or convey to Grantee any right, title or interest in and to the Premises acquired by Grantor after the date of this Deed.

Description of Property lying and situate in the Borough and County of Bronx and State of New York.

Parcel One

All that certain piece or parcel of land being all of Lot 74, Block 2604 **LESS AND EXCEPT** those portions conveyed by that certain deed dated September 16, 1988, between Consolidated Rail Corporation and Britestarr Homes, Inc., said portions being described as Parcels A, B, C and D, containing 26.971 acres, more or less as shown on a Plat of Survey prepared by Jack C. Compton, Licensed Land Surveyor No. 49209, of VEP Associates, Inc., 1250 Broadway, New York, New York, dated November 23, 1987, last revised January 13, 1988.

Parcel Two

All that certain piece or parcel of land being a portion of Lot 295, Block 2599, more fully described as follows:

BEGINNING at the east corner of said Lot 295, Block 2599; thence in a westerly direction, along the division line between Lot 295, Block 2599 and Lot 61, Block 2599, and the projection thereof, a distance of 225 feet, more or less to the southeasterly line of the lands now or formerly of National Railroad Passenger Corporation (Amtrak); thence along said southeasterly line a distance of 260 feet, more or less to the easterly line of Lot 295, Block 2599; thence in a southerly direction a distance of 230 feet, more or less to the **POINT OF BEGINNING**.

Parcel Three

All that certain piece or parcel of land being a portion of Lot 200, Block 2599, more fully described as follows:

BEGINNING at the easternmost corner of Lot 200, Block 2599; thence in a southwesterly direction along the southeasterly line of said Lot 200 a distance of 155 feet, more or less, to a point; thence in a northwesterly direction a distance of 50 feet, more or less, to the southeasterly line of the lands now or formerly of National Railroad Passenger Corporation (Amtrak); thence along said southeasterly line, in a northeasterly direction, a distance of 100 feet, more or less, to the division line between Lot 200, Block 2599 and Lot 295, Block 2599; thence in an easterly direction a distance of 80 feet, more or less, to the **POINT OF BEGINNING**.

Parcel Four

All that certain piece or parcel of land being all of Lot 28, Block 2730 **LESS AND EXCEPT** that portion conveyed by Conveyance Document No. PC-CRC-ATK-RP-29, being part of a line of railroad identified as Line Code 4207 in the records of the United States Railway Association. Said conveyance being from Consolidated Rail Corporation to National Railroad Passenger Corporation (Amtrak).

Description of Property lying and situate in the Borough and County of Bronx and State of New York.

Parcel One

All that certain piece or parcel of land being all of Lot 74, Block 2604 LESS AND EXCEPT those portions conveyed by that certain deed dated September 16, 1988, between Consolidated Rail Corporation and Britestarr Homes, Inc., said portions being described as Parcels A, B, C and D, containing 26.971 acres, more or less as shown on a Plat of Survey prepared by Jack C. The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE.
